## ACKNOWLEDGMENTS

**Ian R. O'Brien**, Chief, Statistical Compendia Branch, was responsible for the technical supervision and coordination of this volume. Assisting in the research and analytical phases of assigned sections and in the development aspects of new tables were **Richard P. Kersey**, **Jean F. Mullin**, **Michael Sellner**, and **Sean R. Wilburn**. **Catherine Lavender** provided primary editorial assistance. Other editorial assistance was rendered by **Stacey Barber**, **Alethea S. Carter**, **Brian Clark**, **Jennifer Grimes**, **April C. Harris**, **Connie Nadzadi**, **Alexandra Nguyen**, **Christine Nguyen**, **Juan Rodriguez**, and **Kevin Younes**.

Maps were designed and produced by **Connie Beard**, **Jessica Dobrowski**, and **Rachael Linonis** of the Cartographic Products Branch within the Geography Division.

**Monique D. Lindsay**, **Christine E. Geter**, **Theodora Forgione**, **Linda Chen**, and **Donald Meyd** of the Administrative and Customer Services Division, **Francis Grailand Hall**, Chief, provided publications and printing management, graphics design and composition, and editorial review for print and electronic media. General direction and production management were provided by **Claudette E. Bennett**, Assistant Division Chief.

The cooperation of many contributors to this volume is gratefully acknowledged. The source note below each table credits the various government and private sector agencies that have collaborated in furnishing the information for the *Statistical Abstract*.

## Preface

---

The *Statistical Abstract of the United States*, published since 1878, is a comprehensive collection of statistics on the social, political, and economic organization of the United States. It is designed to serve as a convenient volume for statistical reference and as a guide to other statistical publications and sources. The latter function is served by the introductory text to each section, the source note appearing below each table, and Appendix I, which is comprised of the *Guide to Sources of Statistics*, the *Guide to State Statistical Abstracts*, and the *Guide to Foreign Statistical Abstracts*.

This volume includes a selection of data from many statistical sources, both government and private. Publications cited as sources usually contain additional statistical detail and more comprehensive discussions of definitions and concepts. Data not available in publications issued by the contributing agency, but obtained from the Internet or unpublished records are identified in the source notes. More information on the subjects covered in the tables may generally be obtained from the source.

Except as indicated, figures are for the United States as presently constituted. Although emphasis in the *Statistical Abstract* is primarily given to national data, many tables present data for regions and individual states and a smaller number for metropolitan areas and cities. Appendix II, Metropolitan and Micropolitan Statistical Areas: Concepts, Components, and Population, presents explanatory text, a complete current listing, and population data for metropolitan and micropolitan areas defined as of November 2008. Statistics for the Commonwealth of Puerto Rico and for island areas of the United States are included in many state tables and are supplemented by information in Section 29. Additional information for states, cities, counties, metropolitan areas, and other small units, as well as more historical data, are available in various

supplements to the *Statistical Abstract* (see inside back cover).

Statistics in this edition are generally for the most recent year or period available by summer 2010. Each year over 1,400 tables and charts are reviewed and evaluated; new tables and charts of current interest are added, continuing series are updated, and less timely data are condensed or eliminated. Text notes and appendices are revised as appropriate. In addition two special features USA Statistics in Brief, and State Rankings can be found on our Web site:  
<<http://www.census.gov/compendia/statab/>>.

**Changes in this edition**—This year we have introduced 65 new tables covering a wide range of subject areas. These include a presentation of new data from the 2007 Economic Census, a comprehensive revision to the Bureau of Economic Analysis's (BEA) National Income and Product Accounts (NIPA), as well as new data from the American Housing Survey and new data from the National Center for Health Statistics' National Survey of Family Growth. In addition, we have introduced new material on a wide variety of topics, such as, sleep deprivation, cyber-bullying, financial crimes, earthquakes, and hours spent doing unpaid housework. For a complete list of new tables, see "New Tables," p. xi.

**Statistical Abstract on other media**—The *Abstract* is available on the Internet and on CD-ROM. Both versions contain the same material as the book, except for a few copyrighted tables for which we did not receive permission to release in these formats. Our Internet site <<http://www.census.gov/compendia/statab/>> contains this 2011 edition plus selected earlier editions in Adobe Acrobat .pdf format. The CD-ROM version and internet site also include spreadsheet files for each table in the book.

**Statistics for states and metropolitan areas**—Extensive data for the states and metropolitan areas of the United States can be found in the *State and Metropolitan Area Data Book: 2010*. This publication, as well as, selected rankings of the states and metropolitan areas, is also available on our Internet site at <<http://www.census.gov/compendia/smadb>>.

**Statistics for counties and cities**—Extensive data for counties can be found in the *County and City Data Book: 2007*. It features 175 data items covering everything from age and agriculture to water use and retail trade for all states and counties with U.S. totals for comparison. Also included are 80 data items for cities with population of 25,000 or more. Six tables present nearly 80 additional data items from the 2005 American Community Survey for 242 incorporated places with populations of 100,000 or more. This publication is available on our Internet site at <<http://www.census.gov/statab/www/ccdb.html>>. For a database with over 6,800 county items, check out USA Counties at <<http://censtats.census.gov/usa/usa.shtml>>.

**Limitations of the data**—The contents of this volume were taken from many sources. All data from censuses, surveys, and from administrative records are

subject to error arising from a number of factors: Sampling variability (for statistics based on samples), reporting errors in the data for individual units, incomplete coverage, nonresponse, imputations, and processing error. (See also Appendix III, p. 921). The Census Bureau cannot accept responsibility for the accuracy or limitations of the data presented here, other than for those for which it collects. The responsibility for selection of the material and for proper presentation, however, rests with the Census Bureau.

**For additional information on data presented**—Please consult the source publications available in local libraries, on the Internet, or contact the agency indicated in the source notes. Contact the Census Bureau only if it is cited as the source.

**Suggestions and comments**—Users of the Statistical Abstract and its supplements (see inside back cover) are urged to make their data needs known for consideration in planning future editions. Suggestions and comments for improving coverage and presentation of data should be sent to the Director, U.S. Census Bureau, Washington, DC 20233; or e-mail us at <[ACSD.US.Data@census.gov](mailto:ACSD.US.Data@census.gov)> or visit <[ask.census.gov](http://ask.census.gov)> for further information on the Abstract.

## Guide to Tabular Presentation

### Example of Table Structure

**Table 535. Seizure Statistics for Intellectual Property Rights (IPR) by Commodity and Trading Partner: 2008 and 2009**

[In thousands of dollars (272,729 represents \$272,729,000, except as indicated). Customs and Border Protection (CBP) is dedicated to protecting against the importation of goods which infringe/violate Intellectual Property Rights (IPR) by devoting substantial resources toward identifying and seizing shipments of infringing articles]

Commodity	2008	2009	Trading partner	2008	2009
Number of IPR Seizures	14,992	14,841	China	221,662	204,656
Total domestic value of IPR seizures <sup>1</sup>	272,729	260,698	Hong Kong	13,434	26,887
Footwear	102,317	99,779	India	16,258	3,047
Consumer electronics <sup>2</sup>	22,998	31,774	Taiwan	2,632	2,454
Handbags/wallets/backpacks	29,609	21,502	Korea, South	1,028	1,510
Wearing apparel	25,120	21,462	Paraguay	(NA)	1,496
Watches/parts	(NA)	15,534	Philippines	(NA)	1,480
Computers/Technology Components	7,590	12,546	Switzerland	(NA)	1,278
Media <sup>3</sup>	5,967	11,100	Pakistan	780	711
Pharmaceuticals	28,107	11,058	Vietnam	748	604
All other commodities	29,942	35,943	All other countries	13,938	16,575

NA Not available. <sup>1</sup> Domestic value is the cost of the seized goods, plus the costs of shipping and importing the goods into the U.S. and an amount for profit. <sup>2</sup> Consumer electronics includes cell phones and accessories, radios, power strips, electrical tools and appliances. <sup>3</sup> Includes motion pictures on tape, laser disc, and DVD; interactive and computer software on CD-ROM and floppy discs; and music on CD or tape.

Source: U.S. Department of Homeland Security, Customs and Border Protection, "Import, Commercial Enforcement, Intellectual Property Rights, Seizure Statistics," <[http://www.cbp.gov/xp/cgov/trade/priority\\_trade/ipri/seizure/](http://www.cbp.gov/xp/cgov/trade/priority_trade/ipri/seizure/)>.

**Headnotes** immediately below table titles provide information important for correct interpretation or evaluation of the table as a whole or for a major segment of it.

**Footnotes** below the bottom rule of tables give information relating to specific items or figures within the table.

**Unit indicators** show the *specified quantities* in which data items are presented. They are used for two primary reasons. Sometimes data are not available in absolute form and are estimates (as in the case of many surveys). In other cases we round the numbers in order to save space to show more data, as in the case above.

### EXAMPLES OF UNIT INDICATOR INTERPRETATION FROM TABLE

Year	Item	Unit Indicator	Number shown	Multiplier
2008	Total domestic value of IPR seizures.	\$ Thousands	272,729	1,000

#### To Determine the Figure it is Necessary to Multiply the Number Shown by the Unit Indicator:

Value of seizures by Customs and Border Protection –  $272,729 \times \$1,000 = \$272,729,000$  (\$273 million)

When a table presents data with more than one unit indicator, they are found in the headnotes and column headings (Tables 2 and 26), spanner (Table 37), stub (Table 25), or unit column (Table 155). When the data in a table are shown in the same unit indicator, it is shown as the first part of the headnote (Table 2). If no unit indicator is shown, data presented are in absolute form (Table 1).

**Vertical rules** are used to separate independent sections of a table (Table 1), or in tables where the stub is continued into one or more additional columns (Table 2).

**Averages**—An average is a single number or value that is often used to represent the "typical value" of a group of numbers. It is regarded as a measure of "location" or "central tendency" of a group of numbers.

The *arithmetic mean* is the type of average used most frequently. It is derived by summing the individual item values of a particular group and dividing the total by the number of items. The arithmetic mean is often referred to as simply the "mean" or "average."

The *median* of a group of numbers is the middle number or value when each item in the group is arranged according to size (lowest to highest or visa versa); it generally has the same number of items above it as well as below it. If there is an even number of items in the group, the median is taken to be the average of the two middle numbers.

*Per capita* (or per person) quantities—a per capita figure represents an average computed for every person in a specified group (or population). It is derived by taking the total for an item (such as income,

taxes, or retail sales) and dividing it by the number of persons in the specified population.

**Index numbers**—An index number is the measure of difference or change, usually expressed as a percent, relating one quantity (the variable) of a specified kind to another quantity of the same kind. Index numbers are widely used to express changes in prices over periods of time, but may also be used to express differences between related subjects for a single point in time.

To compute a price index, a base year or period is selected. The base year price (of the commodity or service) is then designated as the base or reference price to which the prices for other years or periods are related. Many price indexes use the year 1982 as the base year; in tables this is shown as “1982 = 100.” A method of expressing the price relationship is: The price of a set of one or more items for a related year (e.g. 1990) **divided by** the price of the same set of items for the base year (e.g. 1982). The result multiplied by 100 provides the index number. When 100 is subtracted from the index number, the result equals the percent change in price from the base year.

**Average annual percent change—**

Unless otherwise stated in the *Abstract* (as in Section 1, Population), average annual percent change is computed by use of a *compound interest formula*. This formula assumes that the rate of change is constant throughout a specified compounding period (1 year for average annual rates of change). The formula is similar to that used to compute the balance of a savings account that receives compound interest. According to this formula, at the end of a compounding period the amount of accrued change (e.g., school enrollment or bank interest) is added to the amount that existed at the beginning of the period. As a result, over time (e.g., with each year or quarter), the same rate of change is applied to a larger and larger figure.

The *exponential formula*, which is based on continuous compounding, is often used to measure population change. It is preferred by population experts, because they view population and population-related subjects as changing without interruption, ever ongoing. Both exponential and compound interest formulas assume a constant rate of change. The former, however, applies the amount of change continuously to the base rather

than at the end of each compounding period. When the average annual rates are small (e.g., less than 5 percent) both formulas give virtually the same results. For an explanation of these two formulas as they relate to population, see U.S. Census Bureau, *The Methods and Materials of Demography*, Vol. 2, 3d printing (rev.), 1975, pp. 372–381.

**Current and constant dollars—**

Statistics in some tables in a number of sections are expressed in both current and constant dollars (see, e.g., Table 659 in Section 13, Income, Expenditures, Poverty, and Wealth). Current dollar figures reflect actual prices or costs prevailing during the specified year(s). Constant dollar figures are estimates representing an effort to remove the effects of price changes from statistical series reported in dollar terms. In general, constant dollar series are derived by dividing current dollar estimates by the appropriate price index for the appropriate period (e.g., the Consumer Price Index). The result is a series as it would presumably exist if prices were the same throughout, as in the base year—in other words, as if the dollar had constant purchasing power. Any changes in this constant dollar series would reflect only changes in real volume of output, income, expenditures, or other measure.

**Explanation of Symbols**

The following symbols, used in the tables throughout this book, are explained in condensed form in footnotes to the tables where they appear:

- Represents zero or rounds to less than half the unit of measurement shown.
- B Base figure too small to meet statistical standards for reliability of a derived figure.
- D Figure withheld to avoid disclosure pertaining to a specific organization or individual.
- NA Data not enumerated, tabulated, or otherwise available separately.
- S Figure does not meet publication standards for reasons other than that covered by symbol B, above.
- X Figure not applicable because column heading and stub line make entry impossible, absurd, or meaningless.
- Z Entry would amount to less than half the unit of measurement shown.

In many tables, details will not add to the totals shown because of rounding.

# Guide to Tabular Presentation

## Example of Table Structure

**Table 535. Seizure Statistics for Intellectual Property Rights (IPR) by Commodity and Trading Partner: 2008 and 2009**

[In thousands of dollars (272,729 represents \$272,729,000, except as indicated). Customs and Border Protection (CBP) is dedicated to protecting against the importation of goods which infringe/violate Intellectual Property Rights (IPR) by devoting substantial resources toward identifying and seizing shipments of infringing articles]

Commodity	2008	2009	Trading partner	2008	2009
Number of IPR Seizures .....	14,992	14,841	China .....	221,662	204,656
Total domestic value of IPR seizures <sup>1</sup> .....	272,729	260,698	Hong Kong .....	13,434	26,887
Footwear .....	102,317	99,779	India .....	16,258	3,047
Consumer electronics <sup>2</sup> .....	22,998	31,774	Taiwan .....	2,632	2,454

NA Not available. <sup>1</sup> Domestic value is the cost of the seized goods, plus the costs of shipping and importing the goods into the U.S. and an amount for profit. <sup>2</sup> Consumer electronics includes cell phones and accessories, radios, power strips, electrical tools and appliances. <sup>3</sup> Includes motion pictures on tape, laser disc, and DVD; interactive and computer software on CD-ROM and floppy discs; and music on CD or tape.

Source: U.S. Department of Homeland Security, Customs and Border Protection, "Import, Commercial Enforcement, Intellectual Property Rights, Seizure Statistics," <[http://www.cbp.gov/xp/cgov/trade/priority\\_trade/ipr/seizure/](http://www.cbp.gov/xp/cgov/trade/priority_trade/ipr/seizure/)>.

*Headnotes* immediately below table titles provide information important for correct interpretation or evaluation of the table as a whole or for a major segment of it.

*Footnotes* below the bottom rule of tables give information relating to specific items or figures within the table.

*Unit indicators* show the *specified quantities* in which data items are presented. They are used for two primary reasons. Sometimes data are not available in absolute form and are estimates (as in the case of many surveys). In other cases we round the numbers in order to save space to show more data, as in the case above.

## EXAMPLES OF UNIT INDICATOR INTERPRETATION FROM TABLE

Year	Item	Unit Indicator	Number shown	Multiplier
2008 .....	Total domestic value of IPR seizures .	\$ Thousands .....	272,729	1,000

### To Determine the Figure it is Necessary to Multiply the Number Shown by the Unit Indicator:

Value of seizures by Customs and Border Protection –  $272,729 \times \$1,000 = \$272,729,000$  (\$273 million)

When a table presents data with more than one unit indicator, they are found in the headnotes and column headings (Tables 2 and 26), spanner (Table 37), stub (Table 25), or unit column (Table 155). When the data in a table are shown in the same unit indicator, it is shown as the first part of the headnote (Table 2). If no unit indicator is shown, data presented are in absolute form (Table 1).

*Vertical rules* are used to separate independent sections of a table (Table 1), or in tables where the stub is continued into one or more additional columns (Table 2).

**Averages**—An average is a single number or value that is often used to represent the "typical value" of a group of numbers. It is regarded as a measure of "location" or "central tendency" of a group of numbers.

The *arithmetic mean* is the type of average used most frequently. It is derived by summing the individual item values of a particular group and dividing the total by the number of items. The arithmetic mean is often referred to as simply the "mean" or "average."

The *median* of a group of numbers is the middle number or value when each item in the group is arranged according to size (lowest to highest or visa versa); it generally has the same number of items above it as well as below it. If there is an even number of items in the group, the median is taken to be the average of the two middle numbers.

*Per capita* (or per person) quantities—a per capita figure represents an average computed for every person in a specified group (or population). It is derived by taking the total for an item (such as income,

taxes, or retail sales) and dividing it by the number of persons in the specified population.

**Index numbers**—An index number is the measure of difference or change, usually expressed as a percent, relating one quantity (the variable) of a specified kind to another quantity of the same kind. Index numbers are widely used to express changes in prices over periods of time, but may also be used to express differences between related subjects for a single point in time.

To compute a price index, a base year or period is selected. The base year price (of the commodity or service) is then designated as the base or reference price to which the prices for other years or periods are related. Many price indexes use the year 1982 as the base year; in tables this is shown as "1982 = 100." A method of expressing the price relationship is: The price of a set of one or more items for a related year (e.g. 1990) **divided by** the price of the same set of items for the base year (e.g. 1982). The result multiplied by 100 provides the index number. When 100 is subtracted from the index number, the result equals the percent change in price from the base year.

**Average annual percent change**—Unless otherwise stated in the *Abstract* (as in Section 1, Population), average annual percent change is computed by use of a *compound interest formula*. This formula assumes that the rate of change is constant throughout a specified compounding period (1 year for average annual rates of change). The formula is similar to that used to compute the balance of a savings account that receives compound interest. According to this formula, at the end of a compounding period the amount of accrued change (e.g., school enrollment or bank interest) is added to the amount that existed at the beginning of the period. As a result, over time (e.g., with each year or quarter), the same rate of change is applied to a larger and larger figure.

The *exponential formula*, which is based on continuous compounding, is often used to measure population change. It is preferred by population experts, because they view population and population-related subjects as changing without interruption, ever ongoing. Both exponential and compound interest formulas assume a constant rate of change. The former, however, applies the amount of change continuously to the base rather

than at the end of each compounding period. When the average annual rates are small (e.g., less than 5 percent) both formulas give virtually the same results. For an explanation of these two formulas as they relate to population, see U.S. Census Bureau, *The Methods and Materials of Demography*, Vol. 2, 3d printing (rev.), 1975, pp. 372–381.

#### **Current and constant dollars**—

Statistics in some tables in a number of sections are expressed in both current and constant dollars (see, e.g., Table 659 in Section 13, Income, Expenditures, Poverty, and Wealth). Current dollar figures reflect actual prices or costs prevailing during the specified year(s). Constant dollar figures are estimates representing an effort to remove the effects of price changes from statistical series reported in dollar terms. In general, constant dollar series are derived by dividing current dollar estimates by the appropriate price index for the appropriate period (e.g., the Consumer Price Index). The result is a series as it would presumably exist if prices were the same throughout, as in the base year—in other words, as if the dollar had constant purchasing power. Any changes in this constant dollar series would reflect only changes in real volume of output, income, expenditures, or other measure.

#### **Explanation of Symbols**

The following symbols, used in the tables throughout this book, are explained in condensed form in footnotes to the tables where they appear:

- Represents zero or rounds to less than half the unit of measurement shown.
- B Base figure too small to meet statistical standards for reliability of a derived figure.
- D Figure withheld to avoid disclosure pertaining to a specific organization or individual.
- NA Data not enumerated, tabulated, or otherwise available separately.
- S Figure does not meet publication standards for reasons other than that covered by symbol B, above.
- X Figure not applicable because column heading and stub line make entry impossible, absurd, or meaningless.
- Z Entry would amount to less than half the unit of measurement shown.

In many tables, details will not add to the totals shown because of rounding.

# Telephone & Internet Contacts

To help Abstract users find more data and information about statistical publications, we are issuing this list of contacts for federal agencies with major statistical programs. The intent is to give a single, first-contact point-of-entry for users of statistics. These agencies will provide general information on their statistical programs and publications, as well as specific information on how to order their publications. We are also including the Internet (World Wide Web) addresses for many of these agencies. These URLs were current in July 2010.

## Section 1

# Population

---

This section presents statistics on the growth, distribution, and characteristics of the U.S. population. The principal source of these data is the U.S. Census Bureau, which conducts a decennial census of population, a monthly population survey, a program of population estimates and projections, and a number of other periodic surveys.

### **Decennial censuses—**

The U.S. Constitution provides for a census of the population every 10 years, primarily to establish a basis for apportionment of members of the House of Representatives among the states. For over a century after the first census in 1790, the census organization was a temporary one, created only for each decennial census. In 1902, the Census Bureau was established as a permanent federal agency, responsible for enumerating the population and also for compiling statistics on other population and housing characteristics.

Historically, the enumeration of the population has been a complete (100 percent) count. That is, an attempt is made to account for every person, for each person's residence, and for other characteristics (sex, age, family relationships, etc.). Since the 1940 census, in addition to the complete count information, some data have been obtained from representative samples of the population. In the 1990 and 2000 censuses, variable sampling rates were employed. For most of the country, 1 in every 6 households (about 17 percent) received the long form or sample questionnaire; in governmental units estimated to have fewer than 2,500 inhabitants, every other household (50 percent) received the sample questionnaire to enhance the reliability of sample data for small areas. Exact agreement is not to be expected between sample data and the 100-percent count. Sample data may be used with confidence where large numbers are involved and assumed to indicate trends and relationships where small numbers are involved.

**Current Population Survey (CPS)**—This is a monthly nationwide survey of a scientifically selected sample representing the noninstitutionalized civilian population. The sample is located in 824 areas with coverage in every state and the District of Columbia and is subject to sampling error. At the present time, about 60,000 occupied households are eligible for interview every month; of these, about 8 percent are, for various reasons, unavailable for interview.

While the primary purpose of the CPS is to obtain monthly statistics on the labor force, it also serves as a vehicle for inquiries on other subjects. Using CPS data, the Census Bureau issues a series of publications under the general title of *Current Population Reports*.

Estimates of population characteristics based on the CPS will not agree with the counts from the census because the CPS and the census use different procedures for collecting and processing the data for racial groups, the Hispanic population, and other topics. Caution should also be used when comparing estimates for various years because of the periodic introduction of changes into the CPS. Beginning in January 1994, a number of changes were introduced into the CPS that affect all data comparisons with prior years. These changes included the results of a major redesign of the survey questionnaire and collection methodology and the introduction of 1990 census population controls, adjusted for the estimated undercount. Beginning with the 2001 CPS Annual Demographic Supplement, the independent estimates used as control totals for the CPS are based on civilian population benchmarks consistent with Census 2000. In March 2002, the sample size of the Annual Demographic Supplement was increased to approximately 78,000. In 2003 the name of the March supplement was changed to Annual Social and Economic Supplement. These changes in population controls had relatively little impact on derived measures such as

means, medians, and percent distribution, but did have a significant impact on levels.

### **American Community Survey (ACS)—**

This is a nationwide survey to obtain data about demographic, social, economic, and housing information of people, households, and housing units. The survey collects the same type of information that has been collected every 10 years from the long-form questionnaire of the census, which the American Community Survey will replace. Beginning 2006, the estimates include the household population and the population living in institutions, college dormitories, and other group quarters.

### **Population estimates and projec-**

**tions**—Estimates of the United States population are derived by updating the resident population enumerated in Census 2000 with information on the components of population change: births, deaths, and net international migration. The April 1, 2000, population used in these estimates reflects modifications to the Census 2000 population as documented in the Count Question Resolution program.

Registered births and deaths are estimated from data supplied by the National Center for Health Statistics. The net international migration component consists of four parts: (1) the net international migration of the foreign born, (2) the net migration of natives to and from the United States, (3) the net migration between the United States and Puerto Rico, and (4) the net overseas movement of the Armed Forces population. Data from the ACS are used to estimate the annual net migration of the foreign-born population. Estimates of the net migration of natives and net migration between Puerto Rico and the United States prior to 2005 are derived from the Demographic Analysis and Population Estimates (DAPE) project (see Population Division Working Paper Series, No. 63 and No. 64). Estimates for net migration between Puerto Rico and the U.S. for 2005 and later years are derived from the ACS and the Puerto Rico Community Survey. Estimates of the net overseas movement of the Armed Forces are derived from data collected by the Defense Manpower Data Center.

Estimates for state and county areas are based on the same components of change data and sources as the national estimates with the addition of net internal migration. Estimates of net internal migration are derived from federal income tax returns from the Internal Revenue Service, group quarters data from the Federal-State Cooperative Program, and Medicare data from the Centers for Medicare and Medicaid Services.

The population by age for April 1, 1990, reflects modifications to the 1990 census data counts. The review of detailed 1990 information indicated that respondents tended to report age as of the date of completion of the questionnaire, not as of April 1, 1990. In addition, there may have been a tendency for respondents to round up their age if they were close to having a birthday. A detailed explanation of the age modification procedure appears in 1990 Census of Population and Housing, Data Paper Listing CPH-L74.

Population estimates and projections are available on the Census Bureau Web site, see <<http://www.census.gov>>. These estimates and projections are consistent with official decennial census figures with no adjustment for estimated net census coverage. However, the categories for these estimates and projections by race have been modified and are not comparable to the census race categories (see section below under "Race"). For details on methodology, see the sources cited below the individual tables.

**Immigration**—Immigration (migration to a country) is one component of international migration; the other component is emigration (migration *from* a country). In its simplest form, international migration is defined as any movement across a national border. In the United States, federal statistics on international migration are produced primarily by the U.S. Census Bureau and the Office of Immigration Statistics of the U.S. Department of Homeland Security (DHS).

The Census Bureau collects data used to estimate international migration through its decennial censuses and numerous surveys of the U.S. population.

The Office of Immigration Statistics publishes immigration data in annual flow reports and the *Yearbook of Immigration Statistics*. Data for these publications are collected from several administrative data sources including the DS-230 Application for Immigrant Visa and Alien Registration (U.S. Department of State) for new arrivals, and the I-485 Application to Register Permanent Residence or Adjust Status (U.S. Citizenship and Immigration Services—USCIS) for persons adjusting immigrant status.

An immigrant, or legal permanent resident, is a foreign national who has been granted lawful permanent residence in the United States. New arrivals are foreign nationals living abroad who apply for an immigrant visa at a consular office of the Department of State, while individuals adjusting status are already living in the United States and file an application for adjustment of status to lawful permanent residence with USCIS. Individuals adjusting status include refugees, asylees, and various classes of nonimmigrants. A refugee is an alien outside the United States who is unable or unwilling to return to his or her country of origin because of persecution or a well-founded fear of persecution. Asylees must meet the same criteria as refugees, but are located in the United States or at a port of entry. After 1 year of residence, refugees and asylees are eligible to adjust to legal permanent resident status. Nonimmigrants are foreign nationals granted temporary entry into the United States. The major activities for which nonimmigrant admission is authorized include temporary visits for business or pleasure, academic or vocational study, temporary employment, and to act as a representative of a foreign government or international organization. DHS collects information on the characteristics of a proportion of nonimmigrant admissions, those recorded on the I-94 Arrival/Departure Record.

U.S. immigration law gives preferential immigration status to persons with a close family relationship with a U.S. citizen or legal permanent resident, persons with needed job skills, persons who qualify as refugees or asylees, and persons who are from countries with relatively low levels of immigration to the

United States. Immigration to the United States can be divided into two general categories: (1) classes of admission subject to the annual worldwide limitation and (2) classes of admission exempt from worldwide limitations. Numerical limits are imposed on visas issued and not on admissions. In 2008, the annual limit for preference visas subject to limitation was 388,704, which included a family-sponsored preference limit of 226,000 and an employment-based preference limit of 162,704. Classes of admission exempt from the worldwide limitation include immediate relatives of U.S. citizens, refugees and asylees adjusting to permanent residence, and other various classes of special immigrants.

#### **Metropolitan and micropolitan areas—**

The U.S. Office of Management and Budget (OMB) defines metropolitan and micropolitan statistical areas according to published standards that are applied to Census Bureau data. The general concept of a metropolitan or micropolitan statistical area is that of a core area containing a substantial population nucleus, together with adjacent communities having a high degree of economic and social integration with that core. Currently defined metropolitan and micropolitan statistical areas are based on application of 2000 standards to 2000 decennial census data as updated by application of those standards to more recent Census Bureau population estimates. The term “metropolitan area” (MA) was adopted in 1990 and referred collectively to metropolitan statistical areas (MSAs), consolidated metropolitan statistical areas (CMSAs), and primary micropolitan statistical areas (PMSAs). The term “core-based statistical area” (CBSA) became effective in 2003 and refers collectively to metropolitan and micropolitan statistical areas. For descriptive details and a list of titles and components of metropolitan and micropolitan statistical areas, see Appendix II.

**Urban and rural—**For Census 2000, the Census Bureau classified as urban all territory, population, and housing units located within urbanized areas (UAs) and urban clusters (UCs). A UA consists of densely settled territory that contains 50,000 or more people, while a UC consists of densely settled territory with at least 2,500 people but fewer than 50,000

people. From the 1950 census through the 1990 census, the urban population consisted of all people living in UAs and most places outside of UAs with a census population of 2,500 or more.

UAs and UCs encompass territory that generally consists of:

- A cluster of one or more block groups or census blocks each of which has a population density of at least 1,000 people per square mile at the time.
- Surrounding block groups and census blocks each of which has a population density of at least 500 people per square mile at the time.
- Less densely settled blocks that form enclaves or indentations, or are used to connect discontinuous areas with qualifying densities.

They also may include an airport located adjacent to qualifying densely settled area if it has an annual enplanement (aircraft boarding) of at least 10,000 people.

"Rural" for Census 2000 consists of all territory, population, and housing units located outside of UAs and UCs. Prior to Census 2000, rural consisted of all territory, population, and housing outside of UAs and outside of other places designated as "urban." For Census 2000, many more geographic entities, including metropolitan areas, counties, and places, contain both urban and rural territory, population, and housing units.

**Residence**—In determining residence, the Census Bureau counts each person as an inhabitant of a usual place of residence (i.e., the place where one lives and sleeps most of the time). While this place is not necessarily a person's legal residence or voting residence, the use of these different bases of classification would produce the same results in the vast majority of cases.

**Race**—For the 1990 census, the Census Bureau collected and published racial statistics as outlined in Statistical Policy Directive No. 15 issued by the OMB. This directive provided standards on ethnic and racial categories for statistical reporting to be used by all federal agencies. According to the directive, the basic racial categories were American Indian or Alaska Native, Asian or Pacific Islander, Black, and

White. (The directive identified Hispanic origin as an ethnicity.) The question on race for Census 2000 was different from the one for the 1990 census in several ways. Most significantly, respondents were given the option of selecting one or more race categories to indicate their racial identities. Because of these changes, the Census 2000 data on race are not directly comparable with data from the 1990 census or earlier censuses. Caution must be used when interpreting changes in the racial composition of the United States population over time. Census 2000 adheres to the federal standards for collecting and presenting data on race and ethnicity as established by the OMB in October 1997. Starting with Census 2000, the OMB requires federal agencies to use a minimum of five race categories: White, Black or African American, American Indian or Alaska Native, Asian, and Native Hawaiian or Other Pacific Islander. Additionally, to collect data on individuals of mixed race parentage, respondents were allowed to select one or more races. For respondents unable to identify with any of these five race categories, the OMB approved and included a sixth category—"Some other race" on the Census 2000 questionnaire. The Census 2000 question on race included 15 separate response categories and three areas where respondents could write in a more specific race group. The response categories and write-in answers can be combined to create the five minimum OMB race categories plus "Some other race." People who responded to the question on race by indicating only one race are referred to as the *race alone* population, or the group that reported only one race category. Six categories make up this population: White alone, Black or African American alone, American Indian and Alaska Native alone, Asian alone, Native Hawaiian and Other Pacific Islander alone, and Some other race alone. Individuals who chose more than one of the six race categories are referred to as the *Two or More Races* population, or as the group that reported more than one race. Additionally, respondents who reported one race together with those who reported the same race plus one or more other races are combined to create the *race alone* or in *combination* categories. For example, the *White alone* or

*in combination group* consists of those respondents who reported only White or who reported White combined with one or more other race groups, such as "White and Black or African American," or "White and Asian and American Indian and Alaska Native." Another way to think of the group who reported White alone or in combination is as the total number of people who identified entirely or partially as White. This group is also described as people who reported White, whether or not they reported any other race.

The *alone or in combination* categories are tallies of *responses* rather than *respondents*. That is, the alone or in combination categories are not mutually exclusive. Individuals who reported two races were counted in two separate and distinct alone or in combination race categories, while those who reported three races were counted in three categories, and so on. Consequently, the sum of all alone or in combination categories equals the number of races reported, which exceeds the total population.

The concept of race, as used by the Census Bureau, reflects self-identification by people according to the race or races with which they most closely identify. These categories are sociopolitical constructs and should not be interpreted as being scientific or anthropological in nature. Furthermore, the race categories include both racial and national-origin groups. Additionally, data are available for the American Indian and Alaska Native tribes. A detailed explanation of race can be found at <<http://www.census.gov/prod/cen2000/doc/sf1.pdf>>.

Data for the population by race for April 1, 2000, (shown in Tables 6, 9, and 10) are modified counts and are not comparable to Census 2000 race categories. These numbers were computed using Census 2000 data by race and had been modified to be consistent with the 1997 OMB's "Revisions to the Standards for the Classification of Federal Data on Race and Ethnicity," (Federal Register Notice, Vol. 62, No 210, October 1997). A detailed explanation of the race modification procedure appears at <<http://www.census.gov/popest/archives/files/MRSF-01-US1.html>>.

In the CPS and other household sample surveys in which data are obtained through personal interview, respondents are asked to classify their race as: (1) White; (2) Black, African American, or Negro; (3) American Indian or Alaska Native; (4) Asian; or (5) Native Hawaiian or Other Pacific Islander. Beginning January 2003, respondents were allowed to report more than one race to indicate their mixed racial heritage.

**Hispanic population**—The Census Bureau collected data on the Hispanic-origin population in the 2000 census by using a self-identification question. Persons of Spanish/Hispanic/Latino origin are those who classified themselves in one of the specific Hispanic origin categories listed on the questionnaire—Mexican, Puerto Rican, Cuban, as well as those who indicated that they were of Other Spanish/Hispanic/Latino origin (persons whose origins are from Spain, the Spanish-speaking countries of Central or South America, or the Dominican Republic).

In the CPS, information on Hispanic persons is gathered by using a self-identification question. The respondents are first asked whether or not they are of Hispanic, Spanish, or Latino origin and based on their response are further classified into the following categories: Mexican or Mexican American or Chicano; Puerto Rican; Cuban; Central or South American; or Other Hispanic, Spanish, or Latino origin group.

Traditional and current data collection and classification treat race and Hispanic origin as two separate and distinct concepts in accordance with guidelines from the OMB. Race and Hispanic origin are two separate concepts in the federal statistical system. People who are Hispanic may be any race and people in each race group may be either Hispanic or Not Hispanic. Also, each person has two attributes, their race (or races) and whether or not they are Hispanic. The overlap of race and Hispanic origin is the main comparability issue. For example, Black Hispanics (Hispanic Blacks) are included in both the number of Blacks and in the number of Hispanics. For further information, see <<http://www.census.gov/population/www/socdemo/compraceho.html>>.

**Foreign-born and native populations—**

The Census Bureau separates the U.S. resident population into two groups based on whether or not a person was a U.S. citizen or U.S. national at the time of birth. Anyone born in the United States, Puerto Rico, or a U.S. Island Area (such as Guam), or born abroad to a U.S. citizen parent is a U.S. citizen at the time of birth and consequently included in the *native population*. The term *foreign-born population* refers to anyone who is not a U.S. citizen or a U.S. national at birth. This includes naturalized U.S. citizens, legal permanent resident aliens (immigrants), temporary migrants (such as foreign students), humanitarian migrants (such as refugees), and people illegally present in the United States. The Census Bureau provides a variety of demographic, social, economic, geographic, and housing information on the foreign-born population in the United States at <<http://www.census.gov/population/www/socdemo/foreign/>>.

**Mobility status—**The U.S. population is classified according to mobility status on the basis of a comparison between the place of residence of each individual at the time of the survey or census and the place of residence at a specified earlier date. Nonmovers are all persons who were living in the same house or apartment at the end of the period as at the beginning of the period. Movers are all persons who were living in a different house or apartment at the end of the period than at the beginning of the period. Movers are further classified as to whether they were living in the same or different county, state, region, or were movers from abroad. Movers from abroad include all persons whose place of residence was outside the United States (including Puerto Rico, other U.S. Island Area, or a foreign country) at the beginning of the period.

**Living arrangements—**Living arrangements refer to residency in households or in group quarters. A “household” comprises all persons who occupy a “housing unit,” that is, a house, an apartment or other group of rooms, or a single room that constitutes “separate living quarters.” A household includes the related family members and all the unrelated persons, if any, such as lodgers, foster children, or

employees who share the housing unit. A person living alone or a group of unrelated persons sharing the same housing unit is also counted as a household. See text, Section 20, Construction and Housing, for definition of housing unit.

All persons not living in housing units are classified as living in group quarters. These individuals may be institutionalized, e.g., under care or custody in juvenile facilities, jails, correctional centers, hospitals, or nursing homes; or they may be residents in noninstitutional group quarters such as college dormitories, group homes, or military barracks.

**Householder—**The householder is the person in whose name the home is owned or rented. If a home is owned or rented jointly by a married couple, either the husband or the wife may be listed first.

**Family—**The term family refers to a group of two or more persons related by birth, marriage, or adoption and residing together in a household. A family includes among its members the householder.

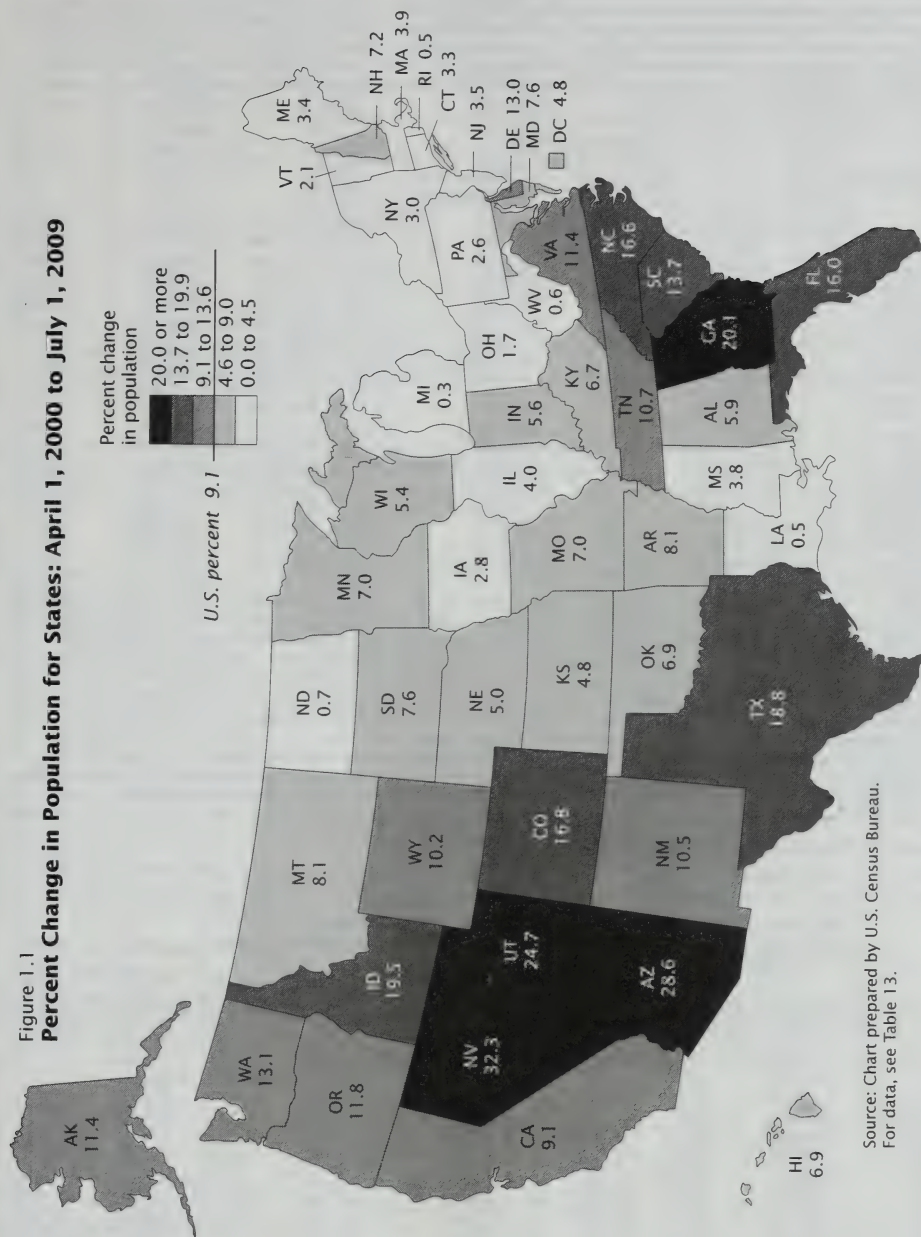

**Subfamily—**A subfamily consists of a married couple and their children, if any, or one parent with one or more never-married children under 18 years old living in a household. Subfamilies are divided into “related” and “unrelated” subfamilies. A related subfamily is related to, but does not include, the householder or the spouse of the householder. Members of a related subfamily are also members of the family with whom they live. The number of related subfamilies, therefore, is not included in the count of families. An unrelated subfamily may include persons such as guests, lodgers, or resident employees and their spouses and/or children; none of whom is related to the householder.

**Married couple—**A married couple is defined as a husband and wife living together in the same household, with or without children and other relatives.

**Statistical reliability—**For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

Figure 1.1

# **Percent Change in Population for States: April 1, 2000 to July 1, 2009**

Source: Chart prepared by U.S. Census Bureau.  
For data, see Table 13.

Table 1. Population and Area: 1790 to 2000

[Area figures represent area on indicated date including in some cases considerable areas not then organized or settled, and not covered by the census. Area data include Alaska beginning in 1870 and Hawaii beginning in 1900. Total area figures for 1790 to 1970 have been recalculated on the basis of the remeasurement of states and counties for the 1980 census, but not on the basis of subsequent censuses. The land and water area figures for past censuses have not been adjusted and are not strictly comparable with the total area data for comparable dates because the land areas were derived from different base data, and these values are known to have changed with the construction of reservoirs, draining of lakes, etc. Density figures are based on land area measurements as reported in earlier censuses]

Census date	Resident population				Area (square miles)		
	Number	Per square mile of land area	Increase over preceding census		Total	Land	Water <sup>1</sup>
			Number	Percent			
1790 (Aug. 2) .....	3,929,214	4.5	(X)	(X)	891,364	864,746	24,065
1800 (Aug. 4) .....	5,308,483	6.1	1,379,269	35.1	891,364	864,746	24,065
1810 (Aug. 6) .....	7,239,881	4.3	1,931,398	36.4	1,722,685	1,681,828	34,175
1820 (Aug. 7) .....	9,638,453	5.5	2,398,572	33.1	1,792,552	1,749,462	38,544
1830 (June 1) .....	12,866,020	7.4	3,227,567	33.5	1,792,552	1,749,462	38,544
1840 (June 1) .....	17,069,453	9.8	4,203,433	32.7	1,792,552	1,749,462	38,544
1850 (June 1) .....	23,191,876	7.9	6,122,423	35.9	2,991,655	2,940,042	52,705
1860 (June 1) .....	31,443,321	10.6	8,251,445	35.6	3,021,295	2,969,640	52,747
1870 (June 1) .....	<sup>2</sup> 39,818,449	<sup>2</sup> 11.2	8,375,128	26.6	3,612,299	3,540,705	68,082
1880 (June 1) .....	50,189,209	14.2	10,370,760	26.0	3,612,299	3,540,705	68,082

1970 (Apr. 1) .....	203,302,031	57.5	23,978,856	13.4	3,618,770	3,536,855	78,444
1980 (Apr. 1) .....	<sup>3</sup> 226,542,199	64.0	23,240,168	11.4	3,618,770	3,539,289	79,481
1990 (Apr. 1) .....	<sup>4</sup> 248,718,302	70.3	22,176,103	9.8	<sup>5</sup> 3,717,796	3,536,278	<sup>5</sup> 181,518
2000 (Apr. 1) .....	<sup>6</sup> 281,424,603	79.6	32,706,301	13.1	3,794,083	3,537,438	256,645

X Not applicable. <sup>1</sup> Data for 1790 to 1980 cover inland water only. Data for 1990 comprise Great Lakes, inland, and coastal water. Data for 2000 comprise Great Lakes, inland, territorial, and coastal water. <sup>2</sup> Revised to include adjustments for underenumeration in southern states; unrevised number is 38,558,371 (10.9 per square mile). <sup>3</sup> Total population count has been revised since the 1980 census publications. Numbers by age, race, Hispanic origin, and sex have not been corrected. <sup>4</sup> The April 1, 1990, census count includes count question resolution corrections processed through December 1997, and does not include adjustments for census coverage errors. <sup>5</sup> Data reflect corrections made after publication of the results. <sup>6</sup> Reflects modifications to the Census 2000 population as documented in the Count Question Resolution program.

Table 4. Components of Population Change: 2000 to 2009

[In thousands, except percent (281,425 represents 281,425,000). Resident population]

Period	Population as of beginning of period	Net increase <sup>1</sup>		Births	Deaths	Net international migration <sup>3</sup>	Population as of end of period
		Total	Percent <sup>2</sup>				
April 1, 2000 to July 1, 2000 <sup>4</sup> .....	281,425	747	0.3	989	561	319	282,172
July 1, 2001 to July 1, 2002.....	285,082	2,722	1.0	4,007	2,430	1,078	287,804
July 1, 2002 to July 1, 2003.....	287,804	2,523	0.9	4,053	2,423	822	290,326
July 1, 2003 to July 1, 2004.....	290,326	2,719	0.9	4,113	2,450	986	293,046
July 1, 2004 to July 1, 2005.....	293,046	2,707	0.9	4,121	2,433	948	295,753
July 1, 2005 to July 1, 2006.....	295,753	2,840	1.0	4,178	2,418	1,006	298,593
July 1, 2006 to July 1, 2007.....	298,593	2,987	1.0	4,305	2,425	866	301,580
July 1, 2007 to July 1, 2008.....	301,580	2,795	0.9	4,283	2,439	863	304,375
July 1, 2008 to July 1, 2009.....	304,375	2,632	0.9	4,263	2,486	855	307,007

<sup>1</sup> Net increase includes a residual. This residual represents the change in population that cannot be attributed to any specific demographic component. <sup>2</sup> Percent of population at beginning of period. <sup>3</sup> Net international migration includes the international migration of both native and foreign-born populations. Specifically, it includes: (a) the net international migration of the foreign born, (b) the net migration between the United States and Puerto Rico, (c) the net migration of natives to and from the United States, and (d) the net movement of the Armed Forces population between the United States and overseas. <sup>4</sup> The April 1, 2000, population estimates base reflects changes to the Census 2000 population from the Count Question Resolution program and geographic program revisions.

Source: U.S. Census Bureau, "Population, Population change and estimated components of population change: April 1, 2000 to July 1, 2009," December 2009, <<http://www.census.gov/popest/national/files/NST-EST2009-aldata.txt>>.

Table 5. Components of Population Change by Race and Hispanic Origin: 2000 to 2009

[In thousands (25,582 represents 25,582,000). Resident population. Covers period April 1, 2000, to July 1, 2009. The April 1, 2000, Population Estimates base reflects changes to the Census 2000 population from the Count Question Resolution program]

Race and Hispanic origin	April 1, 2000 to July 1, 2009				
	Net increase <sup>1</sup>	Natural increase	Births	Deaths	Net international migration <sup>2</sup>
Total.....	25,582	15,876	38,359	22,483	8,944
One race.....	24,156	14,557	36,894	22,337	8,850
White.....	16,192	9,744	28,859	19,115	5,840
Black or African American.....	3,936	3,062	5,783	2,720	777
American Indian and Alaska Native.....	487	403	513	110	77
Asian.....	3,425	1,270	1,650	379	2,119
Native Hawaiian and Other Pacific Islander.....	116	78	90	12	36
Two or more races.....	1,426	1,318	1,464	146	95
Race alone or in combination: <sup>3</sup>					
White.....	17,483	10,949	30,186	19,237	5,914
Black or African American.....	4,699	3,779	6,539	2,760	818
American Indian and Alaska Native.....	736	625	816	192	99
Asian.....	3,983	1,779	2,204	425	2,164
Native Hawaiian and Other Pacific Islander.....	231	180	210	30	48
Hispanic <sup>4</sup> .....	13,113	8,216	9,261	1,045	4,776
White alone, not Hispanic.....	4,274	2,435	20,573	18,138	1,343

<sup>1</sup> See footnote 1, Table 4. <sup>2</sup> See footnote 3, Table 4. <sup>3</sup> In combination with one or more other races. The sum of the five race groups adds to more than the total population because individuals may report more than one race. <sup>4</sup> Persons of Hispanic origin may be any race.

<sup>1</sup> Total population count has been revised since the 1980 census publications. Numbers by age and sex have not been corrected. <sup>2</sup> The data shown have been modified from the official 1990 census counts. See text of this section for explanation. The April 1, 1990, estimates base (248,790,925) includes count question resolution corrections processed through August 1997. It generally does not include adjustments for census coverage errors. However, it includes adjustments estimated for the 1995 Test Census in various localities in California, New Jersey, and Louisiana, and the 1998 census dress rehearsals in localities in California and Wisconsin. These adjustments amounted to a total of 81,052 persons. <sup>3</sup> The April 1, 2000 population estimates base reflects changes to the Census 2000 population from the Count Question Resolution program.

**Table 11. Resident Population Projections by Race, Hispanic-Origin Status, and Age: 2010 and 2015**

(In thousands, except as indicated (310,233 represents 310,233,000). As of July 1. Projections are based on assumptions about future births, deaths, and net international migration. More information on methodology and assumptions is available at <<http://www.census.gov/population/www/projections/methodstatement.html>>. For definition of median, see Guide to Tabular Presentation.)

[Prior to 1960, excludes Alaska and Hawaii. The median center is located at the intersection of two median lines, a north-south line constructed so that half of the nation's population lives east and half lives west of it, and an east-west line selected so that half of the nation's population lives north and half lives south of it. The mean center of population is that point at which an imaginary, flat, weightless, and rigid map of the United States would balance if weights of identical value were placed on it so that each weight represented the location of one person on the date of the census.]

Year	Median center		Mean center		
	Latitude-N	Longitude	Latitude-N	Longitude-W	Approximate location
1790 (August 2)	(NA)	(NA)	39 16 30	76 11 12	In Kent County, MD, 23 miles E of Baltimore MD

**Table 14. State Resident Population—Projections: 2010 to 2030**

[In thousands (4,596 represents 4,596,000) As of July 1. These state projections were produced in correspondence with the U.S. interim projections released in March 2004. Projections in this table were developed for each of the 50 states and the District of Columbia by age and sex for the years 2000 to 2030, based on Census 2000 results. These projections differ from forecasts in that they represent the results of the mathematical projection model given that current state-specific trends in fertility, mortality, domestic migration, and net international migration continue. The projections to 2009 have been superseded by population estimates which are shown in Table 12. Minus sign (–) indicates decrease]

State	Number (1,000)					Change, 2000 to 2030		Rank	
						Number (1,000)	Percent	Total popula- tion, 2030	Percent change, 2000 to 2030

X Not applicable. <sup>1</sup> Total population change includes a residual. This residual represents the change in population that cannot be attributed to any specific demographic component. <sup>2</sup> Net international migration includes the international migration of both native and foreign-born populations. Specifically, it includes: (a) the net international migration of the foreign born, (b) the net migration between the United States and Puerto Rico, (c) the net migration of natives to and from the United States, and (d) the net movement of the Armed Forces population between the United States and overseas.

<sup>1</sup> The age dependency ratio is derived by dividing the combined under 18 and 65-and-over populations by the 18-to-64 population and multiplying by 100. <sup>2</sup> The child dependency ratio is derived by dividing the population under 18 by the 18-to-64 population and multiplying by 100. <sup>3</sup> The old-age dependency ratio is derived by dividing the population 65 and over by the 18-to-64 population and multiplying by 100.

**Table 18. Resident Population by Age and State—Projections: 2010 and 2015**

[In thousands (1,092 represents 1,092,000). As of July 1. These projections were produced in correspondence with the U.S. interim projections released in March 2004. Projections in this table were developed for each of the 50 states and the District of Columbia by age and sex for the years 2000 to 2030, based on Census 2000 results. These projections differ from forecasts in that they represent the results of the mathematical projection model given that current state-specific trends in fertility, mortality, domestic migration and net international migration continue. The projections to 2009 have been superseded by population estimates which are shown in Table 16]

State	Population (1,000)										Percent of population, 2015	
	Under 18 years old		18 to 44 years old		45 to 64 years old		65 to 74 years old		75 years old and over		Under 18 years old	65 years old and over
	2010	2015	2010	2015	2010	2015	2010	2015	2010	2015

**Table 20. Large Metropolitan Statistical Areas—Population: 2000 to 2009**

[As of April 1; beginning 2005 as of July 1 (695 represents 695,000). Covers metropolitan statistical areas with 250,000 and over population in 2009, as defined by the U.S. Office of Management and Budget as of November 2008. All geographic boundaries for 2000 to 2009 population estimates are defined as of January 1, 2009. For definitions and components of all metropolitan and micropolitan areas, see Appendix II. Minus sign (–) indicates decrease]

<sup>1</sup> The April 1, 2000, estimates base reflects changes to the Census 2000 population resulting from legal boundary updates as of January 1 of the estimates year, other geographic program changes, and Count Question Resolution actions. <sup>2</sup> Broomfield County, CO, was formed from parts of Adams, Boulder, Jefferson, and Weld Counties, CO, on November 15, 2001, and is coextensive with Broomfield city. For purposes of defining and presenting data for metropolitan statistical areas, Broomfield city is treated as if it were a county at the time of the 2000 census. <sup>3</sup> The portion of Sullivan city in Crawford County, Missouri, is legally part of the St. Louis, MO–IL MSA. Data shown here do not include this area.

<sup>1</sup> Total population change includes residual. This residual represents the change in population that cannot be attributed to any specific demographic component of change. See "State & County terms & definitions" at <<http://www.census.gov/popest/topics/states/terms/states.html>>. <sup>2</sup> Broomfield County, CO, was formed from parts of Adams, Boulder, Jefferson, and Weld Counties, CO on November 15, 2001, and is coextensive with Broomfield city. For purposes of defining and presenting data for metropolitan statistical areas, Broomfield city is treated as if it were a county at the time of the 2000 census. <sup>3</sup> The portion of Sullivan city in Crawford County, Missouri, is legally part of the St. Louis, MO-IL MSA. Data shown here do not include this area.

Source: U.S. Census Bureau, "Table 10—Cumulative Estimates of the Components of Population Change for Metropolitan and Micropolitan Statistical Areas: April 1, 2000 to July 1, 2009 (CBSA-EST2009-10)," <<http://www.census.gov/popest/metro/CBSA-est2009-comp-chg.html>>.

**Table 22. Metropolitan Statistical Areas With More Than 750,000 Persons in 2009—Population by Age: 2009**

[In thousands (858 represents 858,000). As of July 1. Covers metropolitan statistical areas as defined by the U.S. Office of Management and Budget as of November 2008. All geographic boundaries are defined as of January 1, 2009. For definitions and components of all metropolitan and micropolitan areas, see Appendix II]

Table 25. Population in Coastal Counties: 1980 to 2009

[Population as of April 1, except as indicated (3,537 represents 3,537,000). Areas as defined by U.S. National Oceanic and Atmospheric Administration, 1992. Covers 675 counties and equivalent areas with at least 15 percent of their land area either in a coastal watershed (drainage area) or in a coastal cataloging unit (a coastal area between watersheds). See Appendix III]

Year	Total	Counties in coastal regions					Balance of United States

X Not applicable. <sup>1</sup> Reflects modifications to the Census 2000 population as documented in the Count Question Resolution program and geographic program revisions. <sup>2</sup> Calculated on the basis of land area data from the 2000 census. <sup>3</sup> Covers establishments with payroll. Excludes most government employees, railroad employees, self-employed persons. Employees are for the week including March 12.

**Table 45. Estimated Unauthorized Immigrants by Selected States and Countries of Birth: 2000 and 2009**

[In thousands (8,460 represents 8,460,000). As of January. Unauthorized immigrants refers to foreign-born persons who entered the United States without inspection or who were admitted temporarily and stayed past the date they were required to leave. Unauthorized aliens who have applied for but have not yet received approval to lawfully remain in the United States are considered to be unauthorized. These estimates were calculated using a "residual method," whereby estimates of the legally resident foreign-born population were subtracted from the total foreign-born population in order to derive the unauthorized immigrant population. All of these component populations were resident in the United States on January 1, 2009, and entered during the 1980–2008 period. Persons who entered the United States prior to 1980 were assumed to be legally resident. Estimates of the legally resident foreign-born were based primarily on administrative data of the Department of Homeland Security, while estimates of the total foreign-born population were obtained from the American Community Survey of the U.S. Census Bureau. Estimates for 2000 are based on the same methodology, assumptions, and definitions with the exception that data from Census 2000 were used to estimate the foreign-born population in 2000 that entered the United States from January 1, 1980 through December 31, 1999]

**Table 52. Population by Selected Ancestry Group and Region: 2008**

[In thousands (304,060 represents 304,060,000). Covers single and multiple ancestries. Ancestry refers to a person's ethnic origin or descent, roots, or heritage; or the place of birth of the person, the person's parents, or ancestors before their arrival in the United States. The American Community Survey universe includes the household population and the population living in institutions, college dormitories, and other group quarters. Based on a sample and subject to sampling variability; see text, this section and Appendix III. For composition of regions, see map, inside front cover]

NA Not available. <sup>1</sup> Includes persons of other races not shown separately. <sup>2</sup> Includes persons who are married with spouse present, married with spouse absent, and separated. <sup>3</sup> Beginning 2005, data represent persons who selected this race group only and exclude persons reporting more than one race. The CPS in 1990 and 2000 only allowed respondents to report one race group. See also comments on race in the text for this section. <sup>4</sup> Hispanic persons may be any race.

**Table 68. Parents and Children in Stay-At-Home Parent Family Groups: 1995 to 2009**

[In thousands (22,973 represents 22,973,000). Family groups with children include those families that maintain their own household (family households with own children); those that live in the home of a relative (related subfamilies); and those that live in the home of a nonrelative (unrelated subfamilies). Stay-at-home family groups are married-couple family groups with children under 15 where one parent is in the labor force all of the previous year and their spouse is out of the labor force for the entire year with the reason 'taking care of home and family.' Only married couples with children under 15 are included. Based on Current Population Survey; see Appendix III]

Year	Married-couple family groups with children under 15 years old			Children under 15 years old in married-couple family groups		
	Total	With stay-at-home mothers	With stay-at-home fathers	Total	With stay-at-home mothers	With stay-at-home fathers

Table 75. Self-Described Religious Identification of Adult Population: 1990 to 2008

[In thousands (175,440 represents 175,440,000). The methodology of the American Religious Identification Survey (ARIS) 2008 replicated that used in previous surveys. The three surveys are based on random-digit-dialing telephone surveys of residential households in the continental U.S.A. (48 states): 54,461 interviews in 2008, 50,281 in 2001, and 113,723 in 1990. Respondents were asked to describe themselves in terms of religion with an open-ended question. Interviewers did not prompt or offer a suggested list of potential answers. Moreover, the self-description of respondents was not based on whether established religious bodies, institutions, churches, mosques or synagogues considered them to be members. Quite the contrary, the surveys sought to determine whether the respondents themselves regarded themselves as adherents of a religious community. Subjective rather than objective standards of religious identification were tapped by the surveys]

## Section 2

# Births, Deaths, Marriages, and Divorces

---

This section presents vital statistics data on births, deaths, abortions, fetal deaths, fertility, life expectancy, marriages, and divorces. Vital statistics are compiled for the country as a whole by the National Center for Health Statistics (NCHS) and published in its annual report, *Vital Statistics of the United States*, in certain reports of the *Vital and Health Statistics* series, *National Vital Statistics Reports and Health, United States*. Reports in this field are also issued by the various state bureaus of vital statistics. Data on fertility and selected characteristics of women who had a child in the last year, and on marital status and marital history are compiled by the U.S. Census Bureau from its Current Population Survey (CPS; see text, Section 1) and published in *Current Population Reports*, P20 Series. Data on abortions are published by the Alan Guttmacher Institute, New York, NY, in selected issues of *Perspectives on Sexual and Reproductive Health* online at <[www.guttmacher.org/sections/abortion.php](http://www.guttmacher.org/sections/abortion.php)>.

**Registration of vital events**—The registration of births, deaths, fetal deaths, and other vital events in the United States is primarily a state and local function. There are 57 vital registration jurisdictions in the United States: the 50 states, five territories (Puerto Rico, etc.) District of Columbia, and New York City. Each of the 57 jurisdictions has a direct statistical reporting relationship with NCHS. Vital events occurring to U.S. residents outside the United States are not included in the data.

**Births and deaths**—The live-birth, death, and fetal-death statistics prepared by NCHS are based on vital records filed in the registration offices of all states, New York City, and the District of Columbia. The annual collection of death statistics on a national basis began in 1900 with a national death-registration area of ten states and the District of Columbia; a similar annual collection of birth statistics for a national birth-registration area began in 1915, also with ten reporting

states and the District of Columbia. Since 1933, the birth- and death-registration areas have comprised the entire United States, including Alaska (beginning 1959) and Hawaii (beginning 1960). National statistics on fetal deaths were first compiled for 1918 and annually since 1922. Prior to 1951, birth statistics came from a complete count of records received in the Public Health Service (now received in NCHS). From 1951 through 1971, they were based on a 50-percent sample of all registered births (except for a complete count in 1955 and a 20- to 50-percent sample in 1967). Beginning in 1972, they have been based on a complete count for states participating in the Vital Statistics Cooperative Program (VSCP) (for details, see the technical appendix in *Vital Statistics of the United States*) and on a 50-percent sample of all other areas. Beginning in 1986, all reporting areas participated in the VSCP. Mortality data have been based on a complete count of records for each area (except for a 50-percent sample in 1972). Beginning in 1970, births to and deaths of nonresident aliens of the United States and U.S. citizens outside the United States have been excluded from the data. Fetal deaths and deaths among Armed Forces abroad are excluded. Data based on samples are subject to sampling error; for details, see annual issues of *Vital Statistics of the United States*.

Mortality statistics by cause of death are compiled in accordance with World Health Organization regulations according to the *International Classification of Diseases* (ICD). The ICD is revised approximately every 10 years. The tenth revision of the ICD was employed beginning in 1999. Deaths for prior years were classified according to the revision of the ICD in use at the time. Each revision of the ICD introduces a number of discontinuities in mortality statistics; for a discussion of those between the ninth and tenth revisions of the ICD, see *National Vital Statistics Reports*, Vol. 56, Nos. 2 and 10. Preliminary mortality data are

based on a percentage of death records weighted up to the total number of deaths reported for the given year; for a discussion of preliminary data, see *National Vital Statistics Reports*, Vol. 56, No. 16. Information on tests of statistical significance, differences between death rates, and standard errors can also be found in the reports mentioned above. Some of the tables present age-adjusted death rates in addition to crude death rates. Age-adjusted death rates shown in this section were prepared using the direct method, in which age-specific death rates for a population of interest are applied to a standard population distributed by age. Age adjustment eliminates the differences in observed rates between points in time or among compared population groups that result from age differences in population composition.

**Fertility and life expectancy**—The total fertility rate, defined as the number of births that 1,000 women would have in their lifetime if, at each year of age, they experienced the birth rates occurring in the specified year, is compiled and published by NCHS. Other data relating to social and medical factors that affect fertility rates, such as contraceptive use and birth expectations, are collected and made available by both NCHS and the Census Bureau. NCHS figures are based on information in birth and fetal death certificates and on the periodic National Surveys of Family Growth; Census Bureau data are based on decennial censuses and the CPS. Data on life expectancy, the average remaining lifetime in years for persons who attain a given age, are computed and published by NCHS. For details, see *National Vital Statistics Reports*, Vol. 57, No. 14 and <<http://www.cdc.gov/nchs/fastats/lifexpec.htm>>.

**Marriage and divorce**—In 1957 and 1958 respectively, the National Office of Vital Statistics established marriage- and divorce-registration areas. Beginning in 1957, the marriage-registration area comprised 30 states, plus Alaska, Hawaii, Puerto Rico, and the Virgin Islands; it currently includes 42 states and the District of Columbia. The divorce-registration area, starting in 1958 with 14 states, Alaska, Hawaii, and the Virgin Islands, currently includes a total of 31 states and

the Virgin Islands. Procedures for estimating the number of marriages and divorces in the registration states are discussed in *Vital Statistics of the United States*, Vol. III—*Marriage and Divorce*. Total counts of events for registration and nonregistration states are gathered by collecting already summarized data on marriages and divorces reported by state offices of vital statistics and by county offices of registration. The collection and publication of detailed marriage and divorce statistics was suspended beginning in January 1996. For additional information, contact the National Center for Health Statistics online at <<http://www.cdc.gov/nchs/dataawh/datasite/frnotice.htm>>.

**Vital statistics rates**—Except as noted, vital statistics rates computed by NCHS are based on decennial census population figures as of April 1 for 1960, 1970, 1980, 1990, and 2000; and on midyear population figures for other years, as estimated by the Census Bureau (see text, Section 1).

**Race**—Data by race for births, deaths, marriages, and divorces from NCHS are based on information contained in the certificates of registration. The Census Bureau's Current Population Survey obtains information on race by asking respondents to classify their race as (1) White, (2) Black, (3) American Indian or Alaska Native, (4) Native Hawaiian or Other Pacific Islander, and (5) Asian. Beginning with the 1989 data year, NCHS is tabulating its birth data primarily by race of the mother. In 1988 and prior years, births were tabulated by race of the child, which was determined from the race of the parents as entered on the birth certificate. Trend data by race shown in this section are by race of mother beginning with the 1980 data. Hispanic origin of the mother is reported and tabulated independently of race. Thus, persons of Hispanic origin may be any race. The majority of women of Hispanic origin are reported as White.

**Statistical reliability**—For a discussion of statistical collection, estimation, and sampling procedures and measures of reliability applicable to data from NCHS and the Census Bureau, see Appendix III.

Table 78. Live Births, Deaths, Marriages, and Divorces: 1960 to 2007

[4,258 represents 4,258,000. Beginning 1970, excludes births to, and deaths of nonresidents of the United States. See Appendix III]

Year	Number					Rate per 1,000 population				
	Births (1,000)	Deaths		Marriages <sup>2</sup> (1,000)	Divorces <sup>3</sup> (1,000)	Births	Deaths		Marriages <sup>2</sup>	Divorces <sup>3</sup>
		Total (1,000)	Infant <sup>1</sup> (1,000)				Total	Infant <sup>1</sup>

— Represents or rounds to zero. NA Not available. <sup>1</sup> Includes persons of other groups, not shown separately. <sup>2</sup> Persons of Hispanic origin may be any race. <sup>3</sup> Per 1,000 estimated population. <sup>4</sup> Number of births per 1,000 women aged 15 to 44 years.  
Source: U.S. National Center for Health Statistics, National Vital Statistics Reports (NVSr), *Births: Final Data for 2007*, Vol. 58, No. 24, August 2010.

**Table 83. Total Fertility Rate by Race and Hispanic Origin: 1980 to 2007**

[Based on race of mother. Excludes births to nonresidents of United States. The *total fertility rate* is the number of births that 1,000 women would have in their lifetime if, at each year of age, they experienced the birth rates occurring in the specified year. A total fertility rate of 2,110 represents "replacement level" fertility for the total population under current mortality conditions (assuming no net immigration). See Appendix III]

Race and Hispanic origin	1980	1990	2000	2003	2004	2005	2006	2007
<b>Total</b> <sup>1</sup>	<b>1,840</b>	<b>2,081</b>	<b>2,056</b>	<b>2,043</b>	<b>2,046</b>	<b>2,054</b>	<b>2,101</b>	<b>2,122</b>

Table 92. Women Who Had a Child in the Last Year by Selected Characteristics: 1990 to 2008

[58,381 represents 58,381,000. As of June. Covers civilian noninstitutional population. Since the number of women who had a birth during the 12-month period was tabulated and not the actual numbers of births, some small underestimation of fertility for this period may exist due to the omission of: (1) Multiple births, (2) Two or more live births spaced within the 12-month period (the woman is counted only once), (3) Women who had births in the period and who did not survive to the survey date, (4) Women who were in institutions and therefore not in the survey universe. These losses may be somewhat offset by the inclusion in the Current Population Survey (CPS) of births to immigrants who did not have their children born in the United States and births to nonresident women. These births would not have been recorded in the vital registration system. Based on June supplement, Current Population Survey. The 2003 Current Population Survey allowed respondents to choose more than one race. Beginning 2003 data represent persons who selected this race group only and exclude persons reporting more than one race. The Current Population Survey in prior years allowed respondents to report only one race group. See also comments on race in Section 1]

Characteristic	Total women (1,000)	Percent childless	Women who had a child in the last year

Kost, *Trends in the Characteristics of Women Obtaining Abortions, 1974–2004*, New York: Guttmacher Institute, 2008; and unpublished data from the Guttmacher Institute.

Table 101. Abortions—Number and Rate by State of Occurrence: 2000 and 2005, and by Residence: 2005

[Number of abortions by state of occurrence from surveys of hospitals, clinics, and physicians identified as providers of abortion services conducted by the Guttmacher Institute. The Guttmacher Institute reallocates abortions to the woman's state of residence for survey years. Abortion rates are computed per 1,000 women 15 to 44 years of age on July 1 of specified year]

<sup>1</sup> Life expectancies for 2000–2007 were calculated using a revised methodology and may differ from those previously published. <sup>2</sup> Multiple-race data were reported by 25 states and the District of Columbia in 2006, by 21 states and the District of Columbia in 2005, by 15 states in 2004, and by 7 states in 2003. The multiple-race data for these reporting areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other reporting areas. <sup>3</sup> Based on middle mortality assumptions; for details, see source U.S. Census Bureau, 2008 National Population Projections (released August, 2008), <<http://www.census.gov/population/www/projections/2008projections.html>>.

Source: Except as noted, U.S. National Center for Health Statistics, National Vital Statistics Reports (NVSR), *Deaths: Final Data for 2007*, Vol. 58, No. 19, May 2010.

Table 104. Selected Life Table Values: 1959 to 2007

[Decennial life tables are based on population data from a decennial census and reported deaths of the 3-year period surrounding the census year; the census year is the middle year. The annual tables are based on deaths in a single year, and except for census years, on postcensal population estimates. Beginning in 1970, data excludes deaths of nonresidents of the United States. See Appendix III]

Age and sex	All races					White					Black <sup>1</sup>

**Table 105. Expectation of Life and Expected Deaths by Race, Sex, and Age: 2007**

[Life expectancies were calculated using a revised methodology and may differ from those previously published. The methodology uses vital statistics death rates for ages under 66 and modeled probabilities of death for ages 66 to 100 based on blended vital statistics and Medicare probabilities of dying]

Age (years)	Expectation of life in years					Expected deaths per 1,000 alive at specified age <sup>2</sup>

<sup>1</sup> Includes other races, not shown separately. <sup>2</sup> Based on the proportion of the cohort who are alive at the beginning of the indicated age who will die before reaching the age shown plus 1. For example, out of every 1,000 people alive and exactly 50 years old at the beginning of the period, 4.07 people will die before reaching their 51st birthdays.

Table 106. Life Expectancy by Sex, Race, and State: 1979 to 1991

[Average number of years of life remaining. Excludes deaths of nonresidents of the United States. Decennial life tables are based on population data from a decennial census and reported deaths of the 3-year period surrounding the census year; the census year is the middle year. The annual tables are based on deaths in a single year, and except for census years, on postcensal population estimates]

**Table 107. Deaths and Death Rates by Sex, Race, and Hispanic Origin: 1970 to 2007**

[1,921 represents 1,921,000. Rates are per 1,000 population for specified groups. Excludes deaths of nonresidents of the United States and fetal deaths. For explanation of age adjustment, see text, this section. The standard population for age adjustment is the projected year 2000 population of the United States. See Appendix III. Data for Hispanic origin and specified races other than White and Black should be interpreted with caution because of inconsistencies between reporting Hispanic origin and race on death certificates and censuses and surveys]

NA Not available. <sup>1</sup> Infant (under 1 year of age), neonatal (under 28 days), early neonatal (under 7 days), and postneonatal (28 days-11 months). <sup>2</sup> Number of fetal deaths of 20 weeks or more gestation per 1,000 live births plus fetal deaths. <sup>3</sup> Number of fetal deaths of 28 weeks or more gestation (late fetal deaths) per 1,000 live births plus late fetal deaths. <sup>4</sup> Number of late fetal deaths plus infant deaths within 7 days of birth per 1,000 live births plus late fetal deaths. <sup>5</sup> Per 100,000 live births from deliveries and complications of pregnancy, childbirth, and the puerperium. Beginning 2000, deaths are classified according to the tenth revision of the International Classification of Diseases; earlier years classified according to the revision in use at the time; see text, this section. <sup>6</sup> Increase partially reflects the use of a separate item on the death certificate on pregnancy status by an increasing number of states. <sup>7</sup> Infant deaths are tabulated by race of decedent; fetal deaths and live births are tabulated by race of mother.

**Table 120. Deaths and Death Rates by Leading Causes of Death and Age: 2007**

[Rates per 100,000 population in specified group. Data are based on the tenth revision of the International Classification of Diseases (ICD). See Appendix III]

Age and cause of death	Number	Rate	Age and cause of death	Number	Rate
ALL AGES <sup>1</sup>					
All causes	2,423,712	803.6	Accidents	16,931	39.2
Diseases of heart	616,067	204.3	Malignant neoplasms	13,288	30.8
Malignant neoplasms	562,875	186.6	Diseases of heart	11,839	27.4
Cerebrovascular diseases	135,952	45.1	Intentional self-harm (suicide)	6,722	15.6
Chronic lower respiratory diseases	127,924	42.4	Human immunodeficiency virus (HIV) disease	3,572	8.3
Accidents (unintentional injuries)	123,706	41.0	Assault (homicide)	3,052	7.1
Alzheimer's disease	74,632	24.7	Chronic liver disease and cirrhosis	2,570	6.0
Diabetes mellitus	71,382	23.7	Cerebrovascular diseases	2,133	4.9
Influenza and pneumonia	52,717	17.5	Diabetes mellitus	1,984	4.6
Nephritis, nephrotic syndrome and nephrosis	46,448	15.4	Septicemia	910	2.1
Septicemia	34,828	11.5	45 TO 54 YEARS		
1 TO 4 YEARS			All causes	184,686	420.9
All causes	4,703	28.6	Malignant neoplasms	50,167	114.3
Accidents (unintentional injuries)	1,588	9.6	Diseases of heart	37,434	85.3
Congenital malformations, deformations and chromosomal abnormalities	546	3.3	Accidents	20,315	46.3
Malignant neoplasms	364	2.2	Chronic liver disease and cirrhosis	8,212	18.7
Assault (homicide)	398	2.4	Intentional self-harm (suicide)	7,778	17.7
Diseases of heart	173	1.1	Cerebrovascular diseases	6,385	14.6
Influenza and pneumonia	109	0.7	Diabetes mellitus	5,753	13.1
Septicemia	78	0.5	Human immunodeficiency virus (HIV) disease	4,156	9.5
Certain conditions originating in the perinatal period	70	0.4	Chronic lower respiratory diseases	4,153	9.5
In situ neoplasms, benign neoplasms and neoplasms of uncertain or unknown behavior	59	0.4	Viral hepatitis	2,815	6.4
Cerebrovascular diseases	52	0.3	Assault (homicide)	2,140	4.9
5 TO 14 YEARS			Septicemia	2,431	5.5
All causes	6,147	15.3	55 TO 64 YEARS		
Accidents (unintentional injuries)	2,194	5.5	All causes	287,110	877.7
Malignant neoplasms	959	2.4	Malignant neoplasms	103,171	315.4
Assault (homicide)	346	0.9	Diseases of heart	65,527	200.3
Congenital malformations, deformations and chromosomal abnormalities	374	0.9	Chronic lower respiratory diseases	12,777	39.1
Diseases of heart	241	0.6	Accidents (unintentional injuries)	12,193	37.3
Intentional self-harm (suicide)	184	0.5	Diabetes mellitus	11,304	34.6
Chronic lower respiratory diseases	118	0.3	Cerebrovascular diseases	10,500	32.1
In situ neoplasms, benign neoplasms and neoplasms of uncertain or unknown behavior	84	0.2	Chronic liver disease and cirrhosis	8,004	24.5
Cerebrovascular diseases	83	0.2	Intentional self-harm (suicide)	5,069	15.5
Septicemia	74	0.2	Nephritis, nephrotic syndrome and nephrosis	4,440	13.6
15 TO 24 YEARS			Septicemia	4,231	12.9
All causes	33,982	79.9	65 TO 74 YEARS		
Accidents (unintentional injuries)	15,897	37.4	All causes	389,238	2,011.3
Assault (homicide)	5,551	13.1	Malignant neoplasms	138,466	715.5
Intentional self-harm (suicide)	4,140	9.7	Diseases of heart	89,589	462.9
Malignant neoplasms	1,653	3.9	Chronic lower respiratory diseases	28,664	148.1
Diseases of heart	1,084	2.6	Cerebrovascular diseases	18,007	93.0
Congenital malformations, deformations and chromosomal abnormalities	402	0.9	Diabetes mellitus	15,112	78.1
Cerebrovascular diseases	195	0.5	Accidents (unintentional injuries)	8,753	45.2
Human immunodeficiency virus (HIV) disease (B20-B24)	160	0.4	Nephritis, nephrotic syndrome and nephrosis	7,752	40.1
Influenza and pneumonia	163	0.4	Septicemia	6,345	32.8
Pregnancy, childbirth and the puerperium	160	0.4	Influenza and pneumonia	5,547	28.7
Diabetes mellitus	168	0.4	Chronic liver disease and cirrhosis	5,167	26.7
Septicemia	160	0.4	75 TO 84 YEARS		
25 TO 34 YEARS			All causes	652,682	5,011.6
All causes	42,572	104.9	Diseases of heart	171,257	1,315.0
Accidents (unintentional injuries)	14,977	36.9	Malignant neoplasms	163,608	1,256.3
Intentional self-harm (suicide)	5,278	13.0	Chronic lower respiratory diseases	48,041	368.9
Assault (homicide)	4,758	11.7	Cerebrovascular diseases	41,979	322.3
Malignant neoplasms	3,463	8.5	Alzheimer's disease	23,009	176.7
Diseases of heart	3,223	7.9	Diabetes mellitus	21,189	162.7
Human immunodeficiency virus (HIV) disease	1,091	2.7	Influenza and pneumonia	14,859	114.1
Diabetes mellitus	610	1.5	Nephritis, nephrotic syndrome and nephrosis	14,711	113.0
Cerebrovascular diseases	505	1.2	Accidents (unintentional injuries)	13,736	105.5
Congenital malformations, deformations and chromosomal abnormalities	417	1.0	Septicemia	10,403	79.9
Influenza and pneumonia	331	0.8	85 YEARS AND OVER		
Septicemia	297	0.7	All causes	713,647	12,946.5
35 TO 44 YEARS			Diseases of heart	235,249	4,267.7
All causes	79,606	184.4	Malignant neoplasms	87,656	1,590.2
<sup>1</sup> Includes deaths under 1 year of age.

NA Not available. <sup>1</sup> Age-adjusted death rates were prepared using the direct method, in which age-specific death rates for a population of interest are applied to a standard population distributed by age. Age adjustment eliminates the differences in observed rates between points in time or among compared population groups that result from age differences in population composition. <sup>2</sup> The total number of deaths in a given time period divided by the total resident population as of July 1. <sup>3</sup> Persons of Hispanic origin may be any race. Prior to 1997 excludes data from states lacking an Hispanic-origin item on their death certificates. See text, this section.

B Base figure too small to meet statistical standards. <sup>1</sup> Age-adjusted death rates were prepared using the direct method, in which age-specific death rates for a population of interest are applied to a standard population distributed by age. Age adjustment eliminates the differences in observed rates between points in time or among compared population groups that result from age differences in population composition. <sup>2</sup> The total number of deaths in a given time period divided by the total resident population as of July 1. <sup>3</sup> Persons of Hispanic origin may be any race. Excludes data from states lacking an Hispanic-origin item on their death certificates.

## Section 3

# Health and Nutrition

---

This section presents statistics on health expenditures and insurance coverage, including Medicare and Medicaid, medical personnel, hospitals, nursing homes and other care facilities, injuries, diseases, disability status, nutritional intake of the population, and food consumption. Summary statistics showing recent trends on health care and discussions of selected health issues are published annually by the U.S. National Center for Health Statistics (NCHS) in *Health, United States*. Data on national health expenditures, medical costs, and insurance coverage are compiled by the U.S. Centers for Medicare & Medicaid Services (CMS) and appear on the CMS Web site at <<http://www.cms.gov/NationalHealthExpendData/>> and in the annual *Medicare and Medicaid Statistical Supplement* to the *Health Care Financing Review*. Statistics on health insurance are also collected by NCHS and are published in Series 10 of *Vital and Health Statistics*. NCHS also conducts periodic surveys of nutrient levels in the population, including estimates of food and nutrient intake, overweight and obesity, hypercholesterolemia, hypertension, and clinical signs of malnutrition. Data are published in Series 10 and 11 of *Vital and Health Statistics*. Statistics on hospitals are published annually by the Health Forum, L.L.C.; an American Hospital Association (AHA) company, in AHA Hospital Statistics. The primary source for data on nutrition and on annual per capita consumption of food is *Diet Quality and Food Consumption*, issued by the U.S. Department of Agriculture. Data are available on the Web site at <<http://www.ers.usda.gov/Briefing/DietQuality>>.

### National health expenditures—

CMS compiles estimates of national health expenditures (NHE) to measure spending for health care in the United States. The NHE accounts are structured to show spending by type of expenditure (i.e., hospital care, physician and clinical care, dental care, and other professional care; home health care; retail sales

of prescription drugs; other medical nondurables; vision products and other medical durables; nursing home care and other personal health expenditures; plus other health expenditures such as public health activities, administration, and the net cost of private health insurance; plus medical sector investment, the sum of noncommercial medical research and capital formation in medical sector structures and equipment; and by source of funding (e.g., private health insurance, out-of-pocket payments, and a range of public programs including Medicare, Medicaid, and those operated by the U.S. Department of Veterans Affairs (VA)).

Data used to estimate health expenditures come from existing sources, which are tabulated for other purposes. The type of expenditure estimates rely upon statistics produced by such groups as the AHA, the Census Bureau, and the U.S. Department of Health and Human Services (HHS). Source of funding estimates are constructed using administrative and statistical records from the Medicare and Medicaid programs, the U.S. Department of Defense and VA medical programs, the Social Security Administration, Census Bureau's *Governmental Finances*, state and local governments, other HHS agencies, and other nongovernment sources.

**Medicare, Medicaid, and CHIP**—Since July 1966, the federal Medicare program has provided two coordinated plans for nearly all people aged 65 and over:

- (1) a hospital insurance plan, which covers hospital and related services and
- (2) a voluntary supplementary medical insurance plan, financed partially by monthly premiums paid by participants, which partly covers physicians' and related medical services. Such insurance also applies, since July 1973, to disabled beneficiaries of any age after 24 months of entitlement to cash benefits under the social security or railroad retirement programs and to persons with end stage renal disease. On January 1, 2006,

Medicare began to provide coverage for prescription drugs as mandated by the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA). This benefit is available on a voluntary basis to everyone with Medicare, and beneficiaries pay a monthly premium to enroll in one of Medicare's prescription drug plans.

Medicaid is a health insurance program for certain low-income people. These include: certain low-income families with children; people on supplemental security income; certain low-income pregnant women and children; and people who have very high medical bills. There are special rules for those who live in nursing homes and for disabled children living at home. Medicaid is funded and administered through a state/federal partnership. Although there are broad federal requirements for Medicaid, states have a wide degree of flexibility to design their program. The Children's Health Insurance Program Reauthorization Act of 2009 (CHIPRA or Public Law 111-3) reauthorized the Children's Health Insurance Program (CHIP). The program went into effect on April 1, 2009. CHIP replaces the State Children's Health Insurance Program (SCHIP). It will preserve coverage for the millions of children who rely on CHIP today and provides the resources for states to reach millions of additional uninsured children. CHIP was designed as a federal/state partnership, similar to Medicaid, with the goal of expanding health insurance to children whose families earn too much money to be eligible for Medicaid, but not enough money to purchase private insurance.

**Health resources**—Hospital statistics based on data from AHA's yearly survey are published annually in *AHA Hospital Statistics* and cover all hospitals accepted for registration by the Association. To be accepted for registration, a hospital must meet certain requirements relating to number of beds, construction, equipment, medical and nursing staff, patient care, clinical records, surgical and obstetrical facilities, diagnostic and treatment facilities, laboratory services, etc. Data obtained from NCHS cover all

U.S. hospitals that meet certain criteria for inclusion. The criteria are published in *Vital and Health Statistics* reports, Series 13. Statistics on the demographic characteristics of persons employed in the health occupations are compiled by the U.S. Bureau of Labor Statistics and reported in *Employment and Earnings* (monthly) (see Table 615, Section 12, Labor Force, Employment, and Earnings). Data based on surveys of health personnel and utilization of health facilities providing long-term care, ambulatory care, emergency room care, and hospital care are presented in NCHS Series 13, data from the National Health Interview Survey. Statistics on patient visits to health care providers, as reported in health interviews, appear in NCHS Series 10, data from the National Health Care Survey.

The CMS's *Health Care Financing Review* and its annual *Medicare and Medicaid Statistical Supplement* present data for hospitals and nursing homes as well as extended care facilities and home health agencies. These data are based on records of the Medicare program and differ from those of other sources because they are limited to facilities meeting federal eligibility standards for participation in Medicare.

**Disability and illness**—General health statistics, including morbidity, disability, injuries, preventive care, and findings from physiological testing are collected by NCHS in its National Health Interview Survey and its National Health and Nutrition Examination Surveys and appear in *Vital and Health Statistics*, Series 10 and 11, respectively. Annual incidence data on notifiable diseases are compiled by the Public Health Service (PHS) at its Centers for Disease Control and Prevention in Atlanta, Georgia, and are published as a supplement to its *Morbidity and Mortality Weekly Report* (MMWR). The list of diseases is revised annually and includes those which, by mutual agreement of the states and PHS, are communicable diseases of national importance.

**Statistical reliability**—For discussion of statistical collection, estimation, and sampling procedures and measures of reliability applicable to data from NCHS and CMS, see Appendix III.

Table 130. National Health Expenditures—Summary, 1960 to 2008, and Projections, 2009 to 2019

[In billions of dollars (27 represents \$27,000,000,000). Excludes Puerto Rico and Island Areas]

**Table 141. Children's Health Insurance Program (CHIP)—Enrollment and Expenditures by State: 2000 and 2009**

[(3,357.4 represents 3,357,400) For year ending September 30. This program provides health benefits coverage to children living in families whose incomes exceed the eligibility limits for Medicaid. Although it is generally targeted to families with incomes at or below 200 percent of the federal poverty level, each state may set its own income eligibility limits, within certain guidelines. States have three options: they may expand their Medicaid programs, develop a separate child health program that functions independently of Medicaid, or do a combination of both. See text, this section, regarding the change from SCHIP to CHIP]

<sup>1</sup> Persons who had payments made on their behalf at any time during the fiscal year. <sup>2</sup> Payments are for fiscal year and reflect federal and state contribution payments. Data exclude disproportionate share hospital payments. Disproportionate share hospitals receive higher Medicaid reimbursement than other hospitals because they treat a disproportionate share of Medicaid patients. <sup>3</sup> 2008 data not available for Hawaii, North Dakota, Utah, Vermont, and Wisconsin; 2007 data are reported.

**Table 159. Osteopathic Physicians: 2001 to 2010**

[As of May 31. Osteopathic physicians are fully qualified physicians licensed to practice medicine and to perform surgery. Osteopathic medicine has a strong emphasis on the interrelationship of the body's nerves, muscles, bones and organs. Doctors of osteopathic medicine, or D.O.s, apply the philosophy of treating the whole person to the prevention, diagnosis and treatment of illness, disease, and injury]

Characteristics	2001	2005	2010	Characteristics	2001	2005	2010
Total number of D.O.s .....	46,990	56,512	70,480	Unknown .....	28	318	412
Female .....	10,875	15,147	22,537	Self-identified practice specialty <sup>1</sup> .....	31,996	38,442	50,355
Male .....	36,115	41,365	47,942	Family and general practice .....	14,102	17,800	19,720
Age .....				General internal Medicine .....	2,592	3,107	5,641
Less than 35 years old .....	9,866	12,983	16,277	General pediatrics/adolescent medicine .....	958	1,176	2,211
35 to 44 years old .....	14,798	16,179	20,118	Obstetrics and gynecology .....	1,219	1,465	2,165
45 to 54 years old .....	12,754	13,845	15,950	Pediatric specialties .....	320	348	380
55 to 64 years old .....	4,706	7,998	11,195	Osteopathic specialties <sup>2</sup> .....	414	464	902
65 years old and over .....	4,838	5,189	6,528	Other specialties .....	12,001	13,431	18,984
				Unknown .....	390	651	352

<sup>1</sup> D.O.s are assumed to be in active practice if they are under age 65 and have not informed the AOA that they have retired or are inactive. D.O.s are assumed to be in postdoctoral training (internship, residency or fellowship) if they graduated within the last 3 years or if the AOA has received information that they are in a postdoctoral program. <sup>2</sup> Osteopathic self-identified practice specialties include FOM (Family Practice/OMT), FPO (Family Practice/OMM), NMO (Neuromusculoskeletal Med/OMM), NMS (Neuromusculoskeletal Med/OMT), OM1 (Osteopathic Manipulative Med +1), OMM (Spec Prof in Osteo Manip Med), OMS (Sports Medicine-OMM), and OMT (Osteo Manipulative Medicine). OMT is the therapeutic application of manually guided forces by an osteopathic physician to improve physiologic function and/or support homeostasis that has been altered by somatic dysfunction. OMM is the application of osteopathic philosophy, structural diagnosis, and use of OMT in the patient's diagnosis and management.

Male	21.7	20.3	45.9	47.5	22.3	22.2	10.1	10.0
Female	11.9	10.8	44.8	46.2	27.0	27.3	16.3	15.8
<b>AGE</b>								
Under 18 years old	12.3	10.1	53.8	56.6	26.2	26.1	7.6	7.3
18 to 44 years old	23.5	22.7	45.2	46.3	19.1	19.4	12.2	11.7
45 to 64 years old	15.0	14.4	43.4	44.5	25.7	25.7	15.9	15.5
65 to 74 years old	9.0	7.0	34.5	35.7	34.5	36.4	22.1	20.9
75 years old and over	5.8	3.9	29.3	29.4	39.3	39.1	25.6	27.6
<b>RACE</b> <sup>2,3</sup>								
Race alone:								
White	16.1	15.4	45.1	46.2	25.2	25.1	13.6	13.3
Black or African American	17.2	15.4	46.7	48.3	23.4	24.2	12.6	12.2
American Indian or Alaska Native	21.3	15.4	43.0	42.8	20.0	29.1	15.7	12.7
Asian	20.3	18.2	49.2	53.7	20.8	20.9	9.7	7.2
Two or more races	12.1	11.9	41.7	44.9	28.2	25.2	18.0	18.0
<b>HISPANIC ORIGIN AND RACE</b> <sup>2,3,4</sup>								
Hispanic or Latino	26.8	24.3	41.8	44.0	19.8	20.6	11.6	11.1
Mexican	31.0	26.6	40.8	43.4	17.8	19.1	10.3	11.0
Not Hispanic or Latino	15.2	13.7	45.9	47.3	25.3	25.6	13.6	13.4
White, non-Hispanic	14.5	13.1	45.4	46.7	25.9	26.2	14.1	14.0
Black, non-Hispanic	17.1	15.2	46.8	48.7	23.5	23.9	12.6	12.1

<sup>1</sup> Includes other categories not shown separately. <sup>2</sup> Estimates are age adjusted to the year 2000 standard using six age groups: Under 18 years, 18-44 years, 45-54 years, 55-64 years, 65-74 years, and 75 years and over. <sup>3</sup> Estimates by race and Hispanic origin are tabulated using the 1997 standards for federal data on race and ethnicity. Estimates for specific race groups are shown when they meet requirements for statistical reliability and confidentiality. The categories "White only," "Black or African American only," "American Indian and Alaska Native (AI/AN) only," and "Asian only" include persons who reported only one racial group; and the category "2 or more races" includes persons who reported more than one of the five racial groups in the 1997 standards or one of the five racial groups and "Some other race." <sup>4</sup> Persons of Hispanic or Latino origin may be any race or combination of races.

**Table 163. Adults 18 Years and Over Who Used Complementary and Alternative Medicine (CAM) in the Past Twelve Months by Type of Therapy: 2002 and 2007**

[The denominators for statistics shown exclude persons with unknown CAM information. Estimates were age adjusted to the year 2000 U.S. standard population using four age groups: 18 to 24 years, 25 to 44 years, 45 to 64 years, and 65 years and over]

Therapy	2002		2007	
	Number (1,000)	Percent	Number (1,000)	Percent
<b>Alternative medical systems:</b>				
Acupuncture	2,136	1.1	3,141	1.4
Homeopathic treatment	3,433	1.7	3,909	1.8
<b>Biologically based therapies:</b>				
Nonvitamin, nonmineral, natural products <sup>1</sup>	38,183	18.9	38,797	17.7
Diet-based therapies <sup>2,3</sup>	7,099	3.5	7,893	3.6
Vegetarian diet	3,184	1.6	3,351	1.5
Atkins diet	3,417	1.7	2,673	1.2
South Beach	(X)	(X)	2,334	1.1
Megavitamin therapy	5,739	2.8	(X)	(X)
<b>Manipulative and body-based therapies:</b>				
Chiropractic care <sup>4</sup>	15,226	7.5	(X)	(X)
Chiropractic or osteopathic manipulation <sup>4</sup>	(X)	(X)	18,740	8.6
Massage	10,052	5.0	18,068	8.3
Movement therapies	(X)	(X)	3,146	1.5
Pilates	(X)	(X)	3,015	1.4
<b>Mind-body therapies:</b>				
Meditation	15,336	7.6	20,541	9.4
Guided imagery	4,194	2.1	4,866	2.2
Progressive relaxation	6,185	3.0	6,454	2.9
Deep breathing exercises	23,457	11.6	27,794	12.7
Yoga	10,386	5.1	13,172	6.1
Tai chi	2,565	1.3	2,267	1.0
Energy healing therapy/Reiki	1,080	0.5	1,216	0.5

X Not applicable. <sup>1</sup> While questions were asked about nonvitamin, nonmineral, natural products in both 2002 and 2007, the data are not comparable due primarily to question order and the specific nonvitamin, nonmineral, natural product covered.

<sup>2</sup> The totals of the numbers and percents of the categories listed under "Diet-based therapies" are greater than the number and percent of their respective category heading because respondents could choose more than one of the categories. <sup>3</sup> While questions were asked about Diet-based therapies in both 2002 and 2007, the data are not comparable because respondents were asked about the South Beach Diet in 2007, but not in 2002. <sup>4</sup> While questions were asked about chiropractic therapy in both 2002 and 2007, the data are not comparable because respondents were asked about chiropractic care in 2002 and chiropractic or osteopathic manipulation in 2007.

<sup>1</sup> Based on Census Bureau estimated civilian population as of July 1. Population estimates based on the 1990 census were used to calculate rates for 1990 through 2000. Population estimates based on the 2000 census were used to calculate rates for 2001 through 2007. <sup>2</sup> Includes other types of surgical procedures, not shown separately. <sup>3</sup> Excluding skull, nose, and jaw. <sup>4</sup> It is possible for a discharge to have more than one of these recorded. <sup>5</sup> Includes other nonsurgical procedures, not shown separately. <sup>6</sup> Using contrast material. <sup>7</sup> Also known as CAT scan.

**Table 168. Hospitals—Summary Characteristics: 1990 to 2008**

[For beds, (1,213 represents 1,213,000). Covers hospitals accepted for registration by the American Hospital Association; see text, this section. Short-term hospitals have an average patient stay of less than 30 days; long-term, an average stay of longer duration. Special hospitals include obstetrics and gynecology; eye, ear, nose, and throat; rehabilitation; orthopedic; and chronic and other special hospitals except psychiatric, tuberculosis, alcoholism, and chemical dependency hospitals]

Item	1990	1995	2000	2003	2004	2005	2006	2007	2008

**Table 171. Hospital Use Rates by Type of Hospital: 1990 to 2008**

Type of Hospital	1990	1995	2000	2004	2005	2006	2007	2008
Community hospitals: <sup>1</sup>								
Admissions per 1,000 population <sup>2</sup>	125	116	117	119	119	118	117	118
Admissions per bed	34	35	40	43	44	44	43	44
Average length of stay (days) <sup>3</sup>	7.2	6.5	5.8	5.6	5.6	5.5	5.5	5.5
Outpatient visits per admission	9.7	13.4	15.8	16.3	16.5	16.9	17.1	17.5
Outpatient visits per 1,000 population <sup>2</sup>	1,207	1,556	1,852	1,946	1,976	2,002	2,000	2,053
Surgical operations (million <sup>4</sup> )	21.9	23.2	26.1	27.4	27.5	28.1	28.1	27.5
Number per admission	0.7	0.7	0.8	0.8	0.8	0.7	0.8	0.8
Nonfederal psychiatric:								
Admissions per 1,000 population <sup>2</sup>	2.9	2.7	2.4	2.7	2.5	2.3	2.3	2.4
Days in hospital per 1,000 population <sup>2</sup>	190	122	93	88	89	83	82	80

<sup>1</sup> Short term (average length of stay less than 30 days) general and special (e.g., obstetrics and gynecology; eye, ear, nose and throat; rehabilitation, etc. except psychiatric, tuberculosis, alcoholism and chemical dependency). Excludes hospital units of institutions. <sup>2</sup> Based on U.S. Census Bureau estimated resident population as of July 1. Estimates reflect revisions based on the 2000 census of population. 1990 and 2000 based on enumerated resident population as of April 1. <sup>3</sup> Number of inpatient days divided by number of admissions. <sup>4</sup> 21.9 represents 21,900,000.

**Table 172. Hospital Utilization Rates by Sex: 1990 to 2007**

[[30,788 represents 30,788,000]. Represents estimates of inpatients discharged from noninstitutional, short-stay hospitals, exclusive of federal hospitals. Excludes newborn infants. Based on sample data collected from the National Hospital Discharge Survey, a sample survey of hospital records of patients discharged in year shown; subject to sampling variability]

Item and sex	1990	1995	2000	2002	2003	2004	2005	2006	2007
Patients discharged (1,000)	30,788	30,722	31,706	33,727	34,738	34,864	34,667	34,854	34,369
Patients discharged per 1,000 persons, total <sup>1</sup>	122	116	113	118	120	119	117	117	114
Male	100	94	91	95	98	97	96	95	94
Female	143	136	134	139	141	141	138	138	134
Days of care per 1,000 persons, total <sup>1</sup>	784	620	555	572	578	574	562	558	554
Male	694	551	486	506	507	505	498	495	494
Female	869	686	620	635	646	641	624	619	612
Average stay (days)	6.4	5.4	4.9	4.9	4.8	4.8	4.8	4.8	4.8
Male	6.9	5.8	5.3	5.3	5.2	5.2	5.2	5.2	5.3
Female	6.1	5.0	4.6	4.6	4.6	4.5	4.5	4.5	4.6

<sup>1</sup> Rates are computed using Census Bureau estimates of the civilian population as of July 1. Rates for 1990 and 1995 were based on population estimates adjusted for the net underenumeration in the 1990 census. Rates for 2000 and later were calculated using 2000-based postcensal estimates.

<sup>1</sup> The first-listed diagnosis is the one specified as the principal diagnosis or the first diagnosis listed on the face sheet or discharge summary of the medical record. It is usually the main cause of the hospitalization. The number of first-listed diagnoses is the same as the number of discharges. <sup>2</sup> Crude estimates. <sup>3</sup> Includes discharges with first-listed diagnoses not shown in table.

<sup>4</sup> Estimates are considered unreliable. <sup>5</sup> These estimates are for nonfederal short-stay hospitals only and do not include mental illness discharges from other types of facilities such as Veterans Affairs hospitals. <sup>6</sup> Includes abuse, dependence, and withdrawal. These estimates are for non-federal short-stay hospitals only and do not include alcohol and drug discharges from other types of facilities or programs such as the Department of Veterans Affairs or day treatment programs.

Table 176. Selected Cosmetic Plastic Surgical and Nonsurgical Procedures: 2003 to 2009

[In thousands (8,252.0 represents 8,252,000). As of December 31. The final data are projected to reflect nationwide statistics and are based on a survey of doctors who have been certified by the American Board of Medical Specialties recognized boards, including but not limited to the American Board of Plastic Surgery. Data for the procedures include but are not limited to those performed by American Society for Aesthetic Plastic Surgery (ASAPS) members. ASAPS members are plastic surgeons certified by the American Board of Plastic Surgery who specialize in cosmetic surgery of the face and the entire body. Procedures are ranked by total number in the most current year]

Procedure	2003	2004	2005	2006	2007	2008	2009

**Table 178. Cancer—Estimated New Cases, 2010, and Survival Rates: 1990–1992 to 1999–2006**

[1,530 represents 1,530,000. The 5-year relative survival rate, which is derived by adjusting the observed survival rate for expected mortality, represents the likelihood that a person will not die from causes directly related to their cancer within 5 years. Survival data shown are based on those patients diagnosed while residents of an area listed below during the time periods shown. Data are based on information collected as part of the National Cancer Institute's Surveillance, Epidemiology and End Results (SEER) program, a collection of 9 population-based registries in five states (Connecticut, Hawaii, Iowa, New Mexico, Utah) and four metropolitan areas (Atlanta, Detroit, San Francisco-Oakland, and Seattle-Puget Sound)]

Syphilis (1,000)	69	134	69	32	33	33	37	41	46

<sup>1</sup> Acquired immunodeficiency syndrome was not a notifiable disease until 1984. Includes all cases reported to the Division of HIV/AIDS Prevention, National Center for HIV/AIDS, Viral Hepatitis, STD, and TB Prevention. <sup>2</sup> Disease was not notifiable. <sup>3</sup> Includes foodborne, infant, wound, and unspecified cases. <sup>4</sup> Chickenpox was taken off the nationally notifiable list in 1991 but many states continue to report. <sup>5</sup> The national surveillance case definitions for the arboviral diseases was revised in 2005, and nonneuroinvasive arboviral diseases were added to the list of nationally notifiable infectious diseases. <sup>6</sup> Data on chronic hepatitis B and hepatitis C virus infection (past or present) are not included because they are undergoing data quality review. <sup>7</sup> Whooping cough. <sup>8</sup> German measles. Excludes congenital syndrome. <sup>9</sup> Excludes typhoid fever. <sup>10</sup> Bacillary dysentery. <sup>11</sup> Newly reported active cases.

**Table 182. Reported AIDS Cases for Adults and Adolescents by Transmission Category and Sex: 2007**

[Provisional. For cases reported in the year shown. Includes Puerto Rico, Virgin Islands, Guam, and U.S. Pacific Islands. Acquired immunodeficiency syndrome (AIDS) is a specific group of diseases or conditions which are indicative of severe immunosuppression related to infection with the human immunodeficiency virus (HIV). Data are subject to retrospective changes and may differ from those data in Table 180. For information on HIV death rates, go to Table 126]

Transmission category	2007			Cumulative through 2007 <sup>1</sup>		
	Total	Male	Female	Total	Male	Female

Other/risk not reported or identified	10,005	6,442	3,563	114,224	77,328	36,896

X Not applicable. <sup>1</sup> Includes persons with a diagnosis of AIDS, reported from the beginning of the epidemic through 2007. Cumulative total includes persons with characteristics unknown. The first AIDS cases were reported in the United States in June 1981.

Source: U.S. Centers for Disease Control and Prevention, Atlanta, GA, *HIV/AIDS Surveillance Report, 2007*, Volume 19, <<http://www.cdc.gov/hiv/surveillance/resources/reports/2007report/>> (revised February 2009).

**Table 183. Estimated Numbers of Persons Living With Acquired Immunodeficiency Syndrome (AIDS) by Year, Age, and Selected Characteristics: 2000 to 2007**

[Includes Puerto Rico, Virgin Islands, Guam, and U.S. Pacific Islands. These numbers do not represent reported case counts. Rather, these numbers are point estimates, which result from adjustments of reported case counts. The reported case counts are adjusted for reporting delays and for redistribution of cases in persons initially reported without an identified risk factor. The estimates do not include adjustment for incomplete reporting. See the Commentary section in the report]

Age and characteristic	2000	2004	2005	2006	2007

— Represents zero. B Figure too small to meet statistical standards for reliability of a derived figure. <sup>1</sup> Respondents were asked if they had ever been told by a health professional that they had an ulcer or diabetes. A person may be represented in more than one column. <sup>2</sup> Excludes borderline diabetes. <sup>3</sup> Respondents were asked if they had been told in the last 12 months by a health professional that they had weak or failing kidneys or any kind of liver condition. <sup>4</sup> Excludes kidney stones, bladder infections, or incontinence. <sup>5</sup> Respondents were asked if they had ever been told by a health professional that they had some form of arthritis, rheumatoid arthritis, gout, lupus or fibromyalgia. Those that answered “yes” were classified as having an arthritis diagnosis. Respondents with joint symptoms (excluding back and neck) that began more than 3 months prior to interview were classified as having chronic joint symptoms. <sup>6</sup> Total includes other races not shown separately. <sup>7</sup> Refers to persons who indicated only a single race group. <sup>8</sup> Figures do not meet standard of reliability or precision. <sup>9</sup> Refers to all persons who indicated more than one race group. <sup>10</sup> Persons of Hispanic or Latino origin may be of any race or combination of races.

NA Not available. — Represents or rounds to zero. <sup>1</sup> Illicit drugs include marijuana/hashish, cocaine (including crack), heroin, hallucinogens, inhalants, or prescription-type psychotherapeutics used nonmedically. <sup>2</sup> Nonmedical use of prescription-type psychotherapeutics includes the nonmedical use of pain relievers, tranquilizers, stimulants, or sedatives and does not include over-the-counter drugs. <sup>3</sup> Includes data from new methamphetamine items added in 2006 and 2007. Previous estimates have been adjusted to be comparable with new data and differ from those in reports prior to the 2007 data year. <sup>4</sup> Binge alcohol use is defined as drinking five or more drinks on the same occasion (i.e., at the same time or within a couple of hours of each other) on at least 1 day in the past 30 days.

**Table 204. Estimated Use of Selected Drugs by State: 2007 to 2008**

[19,966 represents 19,966,000. Data in this table cover a 2-year period. Data is based on the National Survey on Drug Use and Health (NSDUH). Current users are those persons 12 years old and over who used drugs at least once within month prior to this study. Based on national sample of respondents (see also headnote, Table 203). The state estimates were produced by combining the prevalence rate based on the state sample data and the prevalence rate based on a national regression model applied to local-area county and census block group/tract-level estimates from the state (i.e., a survey-weighted hierarchical Bayes estimation approach). The parameters of the regression model are estimated from the entire national sample. For comparison purposes, the data shown here display estimates for all 50 states and the District of Columbia utilizing the modeled estimates for all 51 areas]

Table 205. Cumulative Percent Distribution of Population by Height and Sex: 2007 to 2008

[Data are based on National Health and Nutrition Examination Survey (NHANES), a sample of the civilian noninstitutional population. For this survey, the respondent participates in an interview and a physical examination. For persons 20 years old and over. Height was measured without shoes. Based on sample and subject to sampling variability; see source]

**Table 207. Age-Adjusted Percent Distributions of Body Mass Index (BMI) Among Persons 18 Years Old and Over by Selected Characteristics: 2007 to 2008**

[See headnote, Table 205. Body Mass Index (BMI) is a measure that adjusts body weight for height. It is calculated as weight in kilograms divided by height in meters squared. For both men and women, underweight is indicated by a BMI under 18.5; healthy weight is indicated by a BMI greater than or equal to 18.5 and less than 25.0; overweight is greater than or equal to 25.0 and less than 30.0; obesity is indicated by a BMI greater than or equal to 30.0. BMI is calculated from the measurement of the participants' weight and height during the examination. For definition of age adjustment, see text, Section 2. Based on the National Health and Nutrition Examination Survey (NHANES)]

Selected characteristic	Underweight	Healthy weight	Above healthy weight		
			Total	Overweight	Obese
Total <sup>1</sup> (age-adjusted) . . . . .	1.8	31.6	66.6	33.9	32.6
Total <sup>1</sup> (crude) . . . . .	1.8	31.2	67.0	34.0	33.0
Age: <sup>2</sup>					
18 to 44 years old . . . . .	2.1	35.5	62.4	32.2	30.3
45 to 64 years old . . . . .	<sup>3</sup> 1.6	26.9	71.5	34.2	37.3
65 to 74 years old . . . . .	(B)	25.7	73.3	36.5	36.8
75 years old and over . . . . .	1.7	30.3	68.0	41.7	26.2
Sex:					
Male . . . . .	1.1	28.2	70.7	39.9	30.8
Female . . . . .	2.5	34.8	62.7	28.2	34.5
Race/ethnicity and sex:					
Not Hispanic or Latino:					
White, male . . . . .	<sup>3</sup> 1.2	27.8	71.1	40.5	30.5

**Table 210. Households and Persons Having Problems With Access to Food: 2004 to 2008**

[112,967 represents 112,967,000. Food-secure means that a household had access at all times to enough food for an active healthy life for all household members, with no need for recourse to socially unacceptable food sources or extraordinary coping behaviors to meet their basic food needs. Food-insecure households had limited or uncertain ability to acquire acceptable foods in socially acceptable ways. Households with very low food security (a subset of food-insecure households) were those in which food intake of one or more household members was reduced and normal eating patterns disrupted due to inadequate resources for food. The severity of food insecurity in households is measured through a series of questions about experiences and behaviors known to characterize households that are having difficulty meeting basic food needs. These experiences and behaviors generally occur in an ordered sequence as the severity of food insecurity increases. As resources become more constrained, adults in typical households first worry about having enough food, then they stretch household resources and juggle other necessities, then decrease the quality and variety of household members' diets, then decrease the frequency and quantity of adults' food intake, and finally decrease the frequency and quantity of children's food intake. All questions refer to the previous 12 months and include a qualifying phrase reminding respondents to report only those occurrences that resulted from inadequate financial resources. Restrictions to food intake due to dieting or busy schedules are excluded. The omission of homeless persons may be a cause of underreporting. Data are from the Food Security Supplement to the Current Population Survey (CPS); for details about the CPS, see text, Section 1 and Appendix III]

Household food	Number (1,000)					Percent distribution

With very low food security among children <sup>3</sup> . . . . .	545	606	430	691	1,077	0.7	0.8	0.6	0.9	1.5

<sup>1</sup> Prior to 2006, USDA described these households as food insecure without hunger. <sup>2</sup> Food intake of one or more members in these households was reduced and normal eating patterns disrupted at some time during the year because of the household's food insecurity. Prior to 2006, USDA described these households as food insecure with hunger. <sup>3</sup> Percentages omit households with no children. The food security survey measures food security status at the household level. Not all children residing in food-insecure households were directly affected by the households' food insecurity. Similarly, not all children in households classified as having very low food security among children were subject to the reductions in food intake and disruptions in eating patterns that characterize this condition. Young children, in particular, are often protected from effects of the households' food insecurity.

## Section 4

# Education

---

This section presents data primarily concerning formal education as a whole, at various levels, and for public and private schools. Data shown relate to the school-age population and school enrollment, educational attainment, education personnel, and financial aspects of education. In addition, data are shown for charter schools, security measures used in schools, computer usage in schools, and adult education. The chief sources are the decennial census of population and the Current Population Survey (CPS), both conducted by the U.S. Census Bureau (see text, Section 1, Population); annual, biennial, and other periodic surveys conducted by the National Center for Education Statistics (NCES), a part of the U.S. Department of Education; and surveys conducted by the National Education Association.

The censuses of population have included data on school enrollment since 1840 and on educational attainment since 1940. The CPS has reported on school enrollment annually since 1945 and on educational attainment periodically since 1947.

The NCES is continuing the pattern of statistical studies and surveys conducted by the U.S. Office of Education since 1870. The annual *Digest of Education Statistics* provides summary data on pupils, staff, finances, including government expenditures, and organization at the elementary, secondary, and higher education levels. It is also a primary source for detailed information on federal funds for education, projections of enrollment, graduates, and teachers. The *Condition of Education*, issued annually, presents a summary of information on education of particular interest to policymakers. NCES also conducts special studies periodically.

The census of governments, conducted by the Census Bureau every 5 years (for the years ending in "2" and "7"), provides data on school district finances and state and local government expenditures for education. Reports published by the Bureau of Labor Statistics contain data relating

civilian labor force experience to educational attainment (see also Tables 592, 618, and 626 in Section 12, Labor Force, Employment, and Earnings).

**Types and sources of data**— The statistics in this section are of two general types. One type, exemplified by data from the Census Bureau, is based on direct interviews with individuals to obtain information about their own and their family members' education. Data of this type relate to school enrollment and level of education attained, classified by age, sex, and other characteristics of the population. The school enrollment statistics reflect attendance or enrollment in any regular school within a given period; educational attainment statistics reflect the highest grade completed by an individual, or beginning 1992, the highest diploma or degree received.

Beginning in 2001, the CPS used Census 2000 population controls. From 1994 to 2000, the CPS used 1990 census population controls plus adjustment for undercount. Also the survey changed from paper to computer-assisted technology. For years 1981 through 1993, 1980 census population controls were used; 1971 through 1980, 1970 census population controls had been used. These changes had little impact on summary measures (e.g., medians) and proportional measures (e.g., enrollment rates); however, use of the controls may have significant impact on absolute numbers.

The second type, generally exemplified by data from the NCES and the National Education Association, is based on reports from administrators of educational institutions and of state and local agencies having jurisdiction over education. Data of this type relate to enrollment, attendance, staff, and finances for the nation, individual states, and local areas.

Unlike the NCES, the Census Bureau does not regularly include specialized vocational, trade, business, or correspondence

schools in its surveys. The NCES includes nursery schools and kindergartens that are part of regular grade schools in their enrollment figures. The Census Bureau includes all nursery schools and kindergartens. At the higher education level, the statistics of both agencies are concerned with institutions granting degrees or offering work acceptable for degree-credit, such as junior colleges.

**School attendance**—All states require that children attend school. While state laws vary as to the ages and circumstances of compulsory attendance, generally they require that formal schooling begin by age 6 and continue to age 16.

**Schools**—The NCES defines a school as “a division of the school system consisting of students composing one or more grade groups or other identifiable groups, organized as one unit with one or more teachers to give instruction of a defined type, and housed in a school plant of one or more buildings. More than one school may be housed in one school plant, as is the case when the elementary and secondary programs are housed in the same school plant.”

*Regular* schools are those which advance a person toward a diploma or degree. They include public and private nursery schools, kindergartens, graded schools, colleges, universities, and professional schools.

*Public* schools are schools controlled and supported by local, state, or federal governmental agencies; private schools

are those controlled and supported mainly by religious organizations or by private persons or organizations.

The Census Bureau defines *elementary* schools as including grades 1 through 8; *high* schools as including grades 9 through 12; and *colleges* as including junior or community colleges, regular 4-year colleges, and universities and graduate or professional schools. Statistics reported by the NCES and the National Education Association by type of organization, such as elementary level and secondary level, may not be strictly comparable with those from the Census Bureau because the grades included at the two levels vary, depending on the level assigned to the middle or junior high school by the local school systems.

**School year**—Except as otherwise indicated in the tables, data refer to the school year which, for elementary and secondary schools, generally begins in September of the preceding year and ends in June of the year stated. For the most part, statistics concerning school finances are for a 12-month period, usually July 1 to June 30. Enrollment data generally refer to a specific point in time, such as fall, as indicated in the tables.

**Statistical reliability**—For a discussion of statistical collection, estimation, and sampling procedures and measures of statistical reliability applicable to the Census Bureau and the NCES data, see Appendix III.

Table 215. School Enrollment: 1980 to 2019

[In thousands (58,306 represents 58,306,000). As of fall]

Year	All levels			Pre-kindergarten through grade 8		Grades 9 through 12		College <sup>1</sup>

Table 216. School Expenditures by Type of Control and Level of Instruction in Constant (2008 to 2009) Dollars: 1980 to 2009

[In millions of dollars (442,613 represents \$442,613,000,000). For school years ending in year shown. Data shown reflect historical revisions. Total expenditures for public elementary and secondary schools include current expenditures, interest on school debt and capital outlay. Data deflated by the Consumer Price Index, all urban consumers, on a school-year basis (supplied by the National Center for Education Statistics). See also Appendix III. Based on survey of state education agencies; see source for details]

Year	Total	Elementary and secondary schools			Colleges and universities <sup>1</sup>		
		Total	Public	Private	Total	Public	Private
1980.....	442,613	285,245	265,337	19,908	157,368	104,430	52,938

Table 236. Students Who are Homeschooled by Selected Characteristics: 2007

[As of spring, (51,135 represents 51,135,000). For students 5 to 17 with a grade equivalent of K–12. Homeschoolers are students whose parents reported them to be schooled at home instead of a public or private school. Excludes students who were enrolled in school for more than 25 hours a week or were homeschooled due to a temporary illness. Based on the Parent and Family Involvement Survey of the National Household Education Surveys Program; see source and Appendix III for details]

Characteristic	Number of students			Percent distribution		
	Total (1,000)	Home- schooled (1,000)	Percent home- schooled	Total	Home- schooled	Non- Home- schooled

50 percent or more	27,600	80.5	22.5	52.4	72.9	36.6	2.0	5.9	11.7

<sup>1</sup> Violent incidents include rape, sexual battery other than rape, physical attack or fight with or without a weapon, threat of physical attack with or without a weapon, and robbery with or without a weapon. <sup>2</sup> Serious violent incidents include rape, sexual battery other than rape, physical attack or fight with a weapon, threat of physical attack with a weapon, and robbery with or without a weapon. <sup>3</sup> Theft or larceny (taking things worth over \$10 without personal confrontation). Includes pocket picking, stealing purse or backpack (if left unattended or no force was used to take from owner), theft from motor vehicles, etc. <sup>4</sup> Other incidents include possession of a firearm or explosive device, possession of knife or sharp object, distribution of illegal drugs, possession or use of alcohol or illegal drugs, and vandalism. <sup>5</sup> Includes combined schools, not shown separately, which include all other combination of grades, including K–12 schools. <sup>6</sup> Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. <sup>7</sup> Interpret data with caution. <sup>8</sup> These estimates exclude data from Tennessee because schools in this state did not report estimates of student race.

50 percent or more	6.2	27.6	4.2	10.5	16.1	7.8	34.2	3.6

<sup>1</sup> Figure does not meet publication standards. <sup>2</sup> Sexual harassment includes “unsolicited, offensive behavior that inappropriately asserts sexuality over another person. This behavior may be verbal or nonverbal.” <sup>3</sup> Gang includes an “ongoing loosely organized association of three or more persons, whether formal or informal, that has a common name, signs, symbols, or colors, whose members engage, either individually or collectively, in violent or other forms of illegal behavior.” <sup>4</sup> Cult or extremist group includes “a group that espouses radical beliefs and practices, which may include a religious component, that are widely seen as threatening the basic values and cultural norms of society at large.” <sup>5</sup> Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade level is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K–12 schools. <sup>6</sup> Interpret data with caution. <sup>7</sup> These estimates exclude data from Tennessee because schools in this state did not report estimates of student race.

**Table 246. Public Schools Using Selected Safety and Security Measures by School Characteristics: 2000 to 2008**

[In percent. For school year ending in year shown. Based on survey of principals or persons knowledgeable about discipline issues at the school. Refers only to those times during normal school hours or when school activities or events were in session. Based on the School Survey on Crime and Safety and subject to sampling error; for details see source]

Measure	2000	2004	2006	2008
Controlled access during school hours:				
Buildings (locked or monitored doors)	74.6	83.0	84.9	89.5
Grounds (locked or monitored gates)	33.7	36.2	41.1	42.6
Closed the campus for most students during lunch	64.6	66.0	66.1	65.0
Drug testing:				
Any students	4.1	5.3	(NA)	(NA)
Athletes	(NA)	4.2	5.0	6.4
Students in extracurricular activities other than athletes	(NA)	2.6	3.4	4.5
Any other students	(NA)	(NA)	3.0	3.0
Prohibited all tobacco use on school grounds	90.1	88.8	90.3	91.4
Required to wear badges or picture IDs:				
Students	3.9	6.4	6.1	7.6
Faculty and staff	25.4	48.0	47.8	58.3
Metal detector checks on students:				
Random checks <sup>1</sup>	7.2	5.6	4.9	5.3
Required to pass through daily	0.9	1.1	1.1	1.3
Sweeps and technology:				
Random dog sniffs to check for drugs <sup>1</sup>	20.6	21.3	23.0	21.5
Random sweeps for contraband <sup>1,2</sup>	11.8	12.8	13.1	11.4
Provided telephones in most classrooms	44.6	60.8	66.8	71.6
Used security cameras to monitor school <sup>1</sup>	19.4	36.0	42.8	55.0
Provided two-way radios	(NA)	71.2	70.8	73.1
Visitor requirements:				
Sign-in or check-in	96.6	98.3	97.6	98.7
Pass through metal detectors	0.9	0.9	1.0	(NA)
Dress code:				
Required students to wear uniforms	11.8	13.8	13.8	17.5
Enforced a strict dress code	47.4	55.1	55.3	54.8
School supplies and equipment:				
Required clear book bags or banned book bags on school grounds	5.9	6.2	6.4	6.0
Provided school lockers to students	46.5	49.5	50.6	48.9

NA Not available. <sup>1</sup> One or more. <sup>2</sup> For example, drugs or weapons. Does not include dog sniffs.  
Source: U.S. National Center for Education Statistics and U.S. Department of Justice, Bureau of Justice Statistics, *Indicators of School Crime and Safety, 2009*, December 2009, NCES 2010-012. See also <<http://www.nces.ed.gov/programs/crimeindicators/crimeindicators2009/>>.

**Table 247. Students Who Reported Being Bullied at School or Cyber-Bullied by Student Characteristics: 2007**

[In percent. For students aged 12 through 18. For school year ending in 2007. "At school" includes the school building, on school property, on a school bus, or going to and from school. For more information, see Appendix A of source]

Characteristic	Total <sup>1</sup>	Bullied at school					Cyber-bullying anywhere <sup>2</sup>
		Total bullying at school	Made fun of, called names, or insulted	Subject of rumors	Threatened with harm	Pushed, shoved, tripped, spit on	
Total .....	32.2	31.7	21.0	18.1	5.8	11.0	3.7
Sex:							
Male .....	30.6	30.3	20.3	13.5	6.0	12.2	2.0
Female .....	33.7	33.2	21.7	22.8	5.6	9.7	5.3
Race/ethnicity: <sup>3</sup>							
White .....	34.6	34.1	23.5	20.3	6.3	11.5	4.2
Black .....	30.9	30.4	19.5	15.7	5.8	11.3	3.2
Hispanic .....	27.6	27.3	16.1	14.4	4.9	9.9	2.9
Asian .....	18.1	18.1	10.6	8.2	(S)	<sup>4</sup> 3.8	(S)
Other .....	34.6	34.1	20.1	20.8	7.7	14.4	<sup>4</sup> 2.4
Grade:							
6th .....	42.9	42.7	31.2	21.3	7.0	17.6	3.1
7th .....	35.7	35.6	27.6	20.2	7.4	15.8	3.4
8th .....	37.3	36.9	25.1	19.7	6.9	14.2	3.3
9th .....	30.8	30.6	20.3	18.1	4.6	11.4	2.5
10th .....	28.4	27.7	17.7	15.0	5.8	8.6	4.6
11th .....	29.3	28.5	15.3	18.7	4.9	6.5	5.1
12th .....	23.5	23.0	12.1	14.1	4.3	4.1	3.5

S Reporting standards not met. <sup>1</sup> Bullying types do not sum to total because students could have experienced more than one type of bullying. Also, total includes other types of bullying not shown separately. <sup>2</sup> Cyber-bulled includes students who responded that another student "made unwanted contact, for example, threatened or insulted (the respondent) via text (SMS) messaging." This category did not meet reporting standards to be reported separately. <sup>3</sup> Race categories exclude persons of Hispanic ethnicity. Other includes American Indian, Alaska Native, Pacific Islander, and more than one race. <sup>4</sup> Interpret data with caution.

**Table 248. Parent Participation in School-Related Activities by Selected School, Student, and Family Characteristics: 2007**

[In percent, except as noted (51,600 represents 51,600,000). For school year ending in 2007. Covers parents with children in kindergarten through grade 12. Homeschooled students are excluded]

Characteristic	Number of students in grades K through 12 (thousands)	Participation in school activities by parent or other household member				
		Attended a general school or PTO/PTA <sup>1</sup> meeting	Attended regularly scheduled parent-teacher conference	Attended a school or class event	Volunteered or served on school committee	Participated in school fundraising
Total .....	51,600	89	78	74	46	65
School type: <sup>2</sup>						
Public, assigned .....	37,168	89	76	72	42	63
Public, chosen .....	7,951	88	81	74	45	62
Private, religious .....	4,560	96	86	86	73	85
Private, nonreligious .....	1,438	97	90	86	68	72
Student's sex:						
Male .....	26,875	89	79	71	45	65
Female .....	24,725	90	77	78	48	66
Student's race/ethnicity:						
White, non-Hispanic .....	29,832	91	78	80	54	72
Black, non-Hispanic .....	7,837	87	77	65	35	58
Hispanic <sup>3</sup> .....	9,767	87	80	65	32	51
Asian or Pacific Islander, non-Hispanic .....	1,566	90	80	72	46	62
Other, non-Hispanic .....	2,598	90	74	76	47	62
Student's grade level: <sup>4</sup>						
K-2nd grade .....	11,516	93	90	78	63	72
3rd-5th grade .....	11,519	94	92	83	57	71
6th-8th grade .....	12,058	91	76	72	38	63
9th-12th grade .....	16,503	83	61	68	34	57
Parents' highest education level:						
Less than high school .....	3,504	75	70	48	20	34
High school graduate or equivalent .....	11,070	84	74	65	33	55
Vocational/technical or some college .....	14,844	89	77	72	42	67
Bachelor's degree .....	11,353	94	81	83	56	72
Graduate or professional school .....	10,829	95	82	87	64	77
Parents' language at home:						
Both/only parent(s) speak(s) English .....	45,219	90	78	77	49	69
One of two parents speaks English .....	1,022	82	75	63	42	54
No parent speaks English .....	5,359	84	82	57	22	38

<sup>1</sup> Parent Teacher Organization (PTO) or Parent Teacher Association (PTA) meeting. <sup>2</sup> Variables for school characteristics (school type and school size) have a certain number of missing cases due to school non-report; therefore, the number of students across the categories for each school variable does not sum to the total number of students. <sup>3</sup> Persons of Hispanic origin may be any race. <sup>4</sup> Students whose parents reported the student's grade equivalent as "ungraded" were excluded from the analyses of grade level.

**Table 253. Teacher Stayers, Movers, and Leavers by Selected Characteristics: 1988 to 1989 and 2004 to 2005**

[2,386.5 represents 2,386,500. Data compare the teaching status of teacher between one school year and the prior year. Stayers are teachers who were teaching in the same school in both years. Movers are teachers who were still teaching in the current school year but in a different school. Leavers are teachers who left the teaching profession. Based on the School and Staffing Survey; see source for details]

**Table 265. Proficiency Levels on Selected NAEP Tests for Students in Public Schools by State: 2009**

[Represents percent of public school students scoring at or above basic and proficient levels. Basic denotes mastery of the knowledge and skills that are fundamental for proficient work at a given grade level. Proficient represents solid academic performance. Students reaching this level demonstrated competency over challenging subject matter. For more detail, see <<http://www.nagb.org/pubs/pubs.html>>. Based on the National Assessment of Educational Progress (NAEP) tests which are administered to a representative sample of students in public schools, private schools, and Department of Defense schools. Data shown here are for public school students only]

NA Not available. <sup>1</sup> Number of institutions includes count of branch campuses. Due to revised survey procedures, data beginning 1990 are not comparable with previous years. Beginning 2000, data reflect a new classification of institutions; this classification includes some additional, primarily 2-year, colleges and excludes a few institutions that did not award degrees. Includes institutions that were eligible to participate in Title IV federal financial aid programs. Includes schools accredited by the National Association of Trade and Technical Schools. <sup>2</sup> Due to revised survey methods, data beginning 1990 not comparable with previous years. <sup>3</sup> Branch campuses counted according to actual status, e.g., 2-year branch in 2-year category. <sup>4</sup> Includes unclassified students. (Students taking courses for credit, but are not candidates for degrees.)

<sup>1</sup> Full-time equivalent. Includes degree enrollment and enrollment in public postsecondary programs resulting in a certificate or other formal recognition. Includes summer sessions. Excludes medical enrollments. <sup>2</sup> State and local appropriations for general operating expenses of public postsecondary education. Includes American Recovery and Reinvestment Act of 2009 (ARRA) funds, state-funded financial aid to students attending in-state public institutions. Excludes sums for research, agricultural extension, and teaching hospitals and medical schools.

10,000 to 19,999 . . . . .	238	30,325	10,942	1,642	20,625	5,541	1,586	4,838
20,000 or more . . . . .	118	51,872	11,389	2,384	27,528	7,226	2,601	6,446

<sup>1</sup> Full-time equivalent (FTE) staff is calculated by dividing the total number of hours for all part-time positions by the number of hours the library defines as a full-time position. <sup>2</sup> Includes other staff not shown separately. <sup>3</sup> Level refers to the highest level of any degree offered by the institution. Doctoral, master's, and bachelor's level institutions do not sum to total number of 4-year and above institutions because there are 4-year and above institutions that grant "other" degrees and are thus not included in the breakdown.

<sup>4</sup> Full-time equivalent (FTE) enrollment is calculated by adding one-third of part-time enrollment to full-time enrollment.

## Section 5

# Law Enforcement, Courts, and Prisons

---

This section presents data on crimes committed, victims of crimes, arrests, and data related to criminal violations and the criminal justice system. The major sources of these data are the Bureau of Justice Statistics (BJS), the Federal Bureau of Investigation (FBI), and the Administrative Office of the U.S. Courts. BJS issues many reports—see our Guide to Sources for a complete listing. The Federal Bureau of Investigation's major annual reports are *Crime in the United States*, *Law Enforcement Officers Killed and Assaulted*, annual, and *Hate Crimes*, annual, which present data on reported crimes as gathered from state and local law enforcement agencies.

**Legal jurisdiction and law enforcement**—Law enforcement is, for the most part, a function of state and local officers and agencies. The U.S. Constitution reserves general police powers to the states. By act of Congress, federal offenses include only offenses against the U.S. government and against or by its employees while engaged in their official duties and offenses which involve the crossing of state lines or an interference with interstate commerce. Excluding the military, there are 52 separate criminal law jurisdictions in the United States: one in each of the 50 states, one in the District of Columbia, and the federal jurisdiction. Each of these has its own criminal law and procedure and its own law enforcement agencies. While the systems of law enforcement are quite similar among the states, there are often substantial differences in the penalties for like offenses.

Law enforcement can be divided into three parts: Investigation of crimes and arrests of persons suspected of committing them; prosecution of those charged with crime; and the punishment or treatment of persons convicted of crime.

**Crime**—The U.S. Department of Justice administers two statistical programs to measure the magnitude, nature, and impact of crime in the nation: the Uniform

Crime Reporting (UCR) Program and the National Crime Victimization Survey (NCVS). Each of these programs produces valuable information about aspects of the nation's crime problem. Because the UCR and NCVS programs are conducted for different purposes, use different methods, and focus on somewhat different aspects of crime, the information they produce together provides a more comprehensive panorama of the nation's crime problem than either could produce alone.

### Uniform Crime Reports (UCR)—

The FBI's UCR Program, which began in 1929, collects information on the following crimes reported to law enforcement authorities—Part 1 offenses (detail data reported): murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson. For Part 2 offenses, law enforcement agencies report only arrest data for 21 additional crime categories. For UCR definitions of criminal offenses (including those listed), please go to: <[www.fbi.gov/ucr/cius2008/about/offense\\_definitions.html](http://www.fbi.gov/ucr/cius2008/about/offense_definitions.html)>.

The UCR Program compiles data from monthly law enforcement reports or individual crime incident records transmitted directly to the FBI or to centralized state agencies that then report to the FBI. The Program thoroughly examines each report it receives for reasonableness, accuracy, and deviations that may indicate errors. Large variations in crime levels may indicate modified records procedures, incomplete reporting, or changes in a jurisdiction's boundaries. To identify any unusual fluctuations in an agency's crime counts, the Program compares monthly reports to previous submissions of the agency and with those for similar agencies.

The UCR Program presents crime counts for the nation as a whole, as well as for regions, states, counties, cities, towns, tribal law enforcement, and colleges and universities. This permits studies among neighboring jurisdictions and among

those with similar populations and other common characteristics.

The UCR Program annually publishes its findings in a preliminary release in the spring of the following calendar year, followed by a detailed annual report, *Crime in the United States*, issued in the fall. In addition to crime counts and trends, this report includes data on crimes cleared, persons arrested (age, sex, and race), law enforcement personnel (including the number of sworn officers killed or assaulted), and the characteristics of homicides (including age, sex, and race of victims and offenders; victim-offender relationships; weapons used; and circumstances surrounding the homicides). Other periodic reports are also available from the UCR Program.

### **National Crime Victimization Survey (NCVS)**

—The 2006 national crime victimization estimates are not comparable to 2005 and previous years and 2007–2008 because of changes in methodology. The methodological changes included: a new sample, a change in the method of handling first time interviews with households, and a change in the method of interviewing. For more information on methodology, go to <<http://www.ojp.usdoj.gov/bjs/abstract/cv06.htm>>.

A second perspective on crime is provided by this survey of the Bureau of Justice Statistics (BJS). The NCVS is an annual data collection (interviews of persons aged 12 or older), conducted by the U.S. Census Bureau for the BJS. As an ongoing survey of households, the NCVS measures crimes of violence and property both reported and not reported to police. It produces national rates and levels of personal and property victimization. No attempt is made to validate the information against police records or any other source.

The NCVS measures rape/sexual assault, robbery, assault, pocket-picking, purse snatching, burglary, and motor vehicle theft. The NCVS includes crimes reported to the police, as well as those not reported. Murder and kidnapping are not covered. The so-called victimless crimes, such as drunkenness, drug abuse, and prostitution, also are excluded, as are crimes for which it is difficult to identify

knowledgeable respondents or to locate data records.

Crimes of which the victim may not be aware also cannot be measured effectively. Buying stolen property may fall into this category, as may some instances of embezzlement. Attempted crimes of many types probably are under recorded for this reason. Events in which the victim has shown a willingness to participate in illegal activity also are excluded.

In any encounter involving a personal crime, more than one criminal act can be committed against an individual. For example, a rape may be associated with a robbery, or a household offense, such as a burglary, can escalate into something more serious in the event of a personal confrontation. In classifying the survey measured crimes, each criminal incident has been counted only once—by the most serious act that took place during the incident and ranked in accordance with the seriousness classification system used by the FBI. The order of seriousness for crimes against persons is as follows: rape, robbery, assault, and larceny. Personal crimes take precedence over household offenses.

A *victimization*, basic measure of the occurrence of crime, is a specific criminal act as it affects a single victim. The number of victimizations is determined by the number of victims of such acts. Victimization counts serve as key elements in computing rates of victimization. For crimes against persons, the rates are based on the total number of individuals aged 12 and over or on a portion of that population sharing a particular characteristic or set of traits. As general indicators of the danger of having been victimized during the reference period, the rates are not sufficiently refined to represent true measures of risk for specific individuals or households.

An *incident* is a specific criminal act involving one or more victims; therefore the number of incidents of personal crimes is lower than that of victimizations.

**Courts**—Statistics on criminal offenses and the outcome of prosecutions are incomplete for the country as a whole, although data are available for many states individually.

Since 1982, through its National Judicial Reporting Program, the BJS has surveyed a nationally representative sample of 300 counties every 2 years and collected detailed information on demographic characteristics of felons, conviction offenses, type of sentences, sentence lengths, and time from arrest to conviction and sentencing.

The bulk of civil and criminal litigation in the country is commenced and determined in the various state courts. Only when the U.S. Constitution and acts of Congress specifically confer jurisdiction upon the federal courts may civil or criminal litigation be heard and decided by them. Generally, the federal courts have jurisdiction over the following types of cases: suits or proceedings by or against the United States; civil actions between private parties arising under the Constitution, laws, or treaties of the United States; civil actions between private litigants who are citizens of different states; civil cases involving admiralty, maritime, or private jurisdiction; and all matters in bankruptcy.

There are several types of courts with varying degrees of legal jurisdiction. These jurisdictions include original, appellate, general, and limited or special. A court of original jurisdiction is one having the authority initially to try a case and pass judgment on the law and the facts; a court of appellate jurisdiction is one with the legal authority to review cases and hear appeals; a court of general jurisdiction is a trial court of unlimited original jurisdiction in civil and/or criminal cases, also called a "major trial court"; a court of limited or special jurisdiction is a trial court with legal authority over only a particular class of cases, such as probate, juvenile, or traffic cases.

The 94 federal courts of original jurisdiction are known as the U.S. district courts. One or more of these courts is established in every state and one each in the District of Columbia, Puerto Rico, the Virgin Islands, the Northern Mariana Islands, and

Guam. Appeals from the district courts are taken to intermediate appellate courts of which there are 13, known as U.S. courts of appeals and the United States Court of Appeals for the Federal Circuit. The Supreme Court of the United States is the final and highest appellate court in the federal system of courts.

**Juvenile offenders**—For statistical purposes, the FBI and most states classify as juvenile offenders persons under the age of 18 years who have committed a crime or crimes.

Delinquency cases are all cases of youths referred to a juvenile court for violation of a law or ordinance or for seriously "anti-social" conduct. Several types of facilities are available for those adjudicated delinquents, ranging from the short-term physically unrestricted environment to the long-term very restrictive atmosphere.

**Prisoners and jail inmates**—

BJS started to collect annual data in 1979 on prisoners in federal and state prisons and reformatories. Adults convicted of criminal activity may be given a prison or jail sentence. A *prison* is a confinement facility having custodial authority over adults sentenced to confinement of more than 1 year. A *jail* is a facility, usually operated by a local law enforcement agency, holding persons detained pending adjudication and/or persons committed after adjudication to 1 year or less.

Data on inmates in local jails were collected by the BJS for the first time in 1970. Since then, BJS has conducted censuses of facilities and inmates every 5 to 6 years. In 1984, BJS initiated an annual survey of jails conducted in noncensus years.

**Statistical reliability**—For discussion of statistical collection, estimation and sampling procedures, and measures of statistical reliability pertaining to the National Crime Victimization Survey and Uniform Crime Reporting Program, see Appendix III.

Table 302. Crimes and Crime Rates by Type of Offense: 1980 to 2008

[(1,345 represents 1,345,000). Data include offenses actually reported to law enforcement and also offense estimations for nonreporting and partially reporting agencies within each state. Rates are based on Census Bureau estimated resident population as of July 1; 1980, 1990, and 2000, enumerated as of April 1. See source for details. For definitions of types of crimes, go to <[http://www.fbi.gov/ucr/cius2008/about/offense\\_definitions.html](http://www.fbi.gov/ucr/cius2008/about/offense_definitions.html)>]

NA Not Available. <sup>1</sup> Includes offenses reported by the Zoological Police and the Metro Transit Police. <sup>2</sup> Limited data for 2007 and 2008 were available for Illinois. <sup>3</sup> The data collection methodology for the offense of forcible rape used by the Illinois and the Minnesota state Uniform Crime Reporting (UCR) Programs (with the exception of Rockford, Illinois, and Minneapolis and St. Paul, Minnesota) does not comply with national UCR guidelines. Consequently, their state figures for forcible rape and violent crime (of which forcible rape is a part) are not published in this table.

<sup>1</sup> The data collection methodology for the offense of forcible rape used by the Illinois and Minnesota state programs (with the exception of Rockford, Illinois, and Minneapolis and St. Paul, Minnesota) does not comply with national Uniform Crime Reporting (UCR) Program guidelines. Consequently, their figures for forcible rape and violent crime (of which forcible rape is a part) are not published in this table. <sup>2</sup> It was determined that the agency did not follow the national UCR program guidelines for reporting an offense. Consequently, this figure is not included in this table. <sup>3</sup> The population for the city of Mobile, Alabama, includes 60,536 inhabitants from the jurisdiction of the Mobile County Sheriff's Department.

Source: U.S. Department of Justice, Federal Bureau of Investigation, Uniform Crime Reporting Program, see <[http://www.fbi.gov/ucr/cius2008/data/table\\_08.html](http://www.fbi.gov/ucr/cius2008/data/table_08.html)>.

Table 306. Murder Victims—Circumstances and Weapons Used or Cause of Death: 2000 to 2008

[The Uniform Crime Reporting (UCR) Program defines murder and nonnegligent manslaughter as the willful (nonnegligent) killing of one human being by another. The classification of this offense is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, other judicial body. For more information on murder, go to <[http://www.fbi.gov/ucr/cius2008/offenses/violent\\_crime/murder\\_homicide.html](http://www.fbi.gov/ucr/cius2008/offenses/violent_crime/murder_homicide.html)>]

Table 308. Homicide Trends: 1980 to 2007

[Not all agencies which report offense information to the FBI also submit supplemental data on homicides. To account for the total number of homicide victims, the data were weighted to match national and state estimates prepared by the FBI; hence, detail may not equal total. For more information on the methodology, go to <<http://www.ojp.usdoj.gov/bjs/homicide/homtrnd.htm#contents>>]

Year	Number of victims						Rate <sup>1</sup>					
	Total	Male	Female	White	Black	Other	Total	Male	Female	White	Black	Other

Table 309. Homicide Victims by Race and Sex: 1980 to 2006

[Rates per 100,000 resident population in specified group. Excludes deaths to nonresidents of United States. Effective with data for 1999, causes of death are classified by The Tenth Revision International Classification of Diseases (ICD-10), replacing the Ninth Revision (ICD-9) used for 1979–98 data. In ICD-9, the category Homicide also includes death as a result of legal intervention. ICD-10 has two separate categories for these two causes of death. Some caution should be used in comparing data between 1998 and 1999. See text, Section 2]

Year	Homicide victims						Homicide rate <sup>2</sup>

Simple assault .....	446,510	1.8	399,370	3.1	47,140	0.4
Homicide .....	1,531	0.5	1,185	0.8	346	0.2

- Rounds to zero. B Base figure too small to meet statistical standards for reliability of derived figure. <sup>1</sup> Rates are the number of victimizations per 1,000 persons aged 12 or older. Except for Homicide, the number of victimizations is per 100,000 persons aged 12 or older. <sup>2</sup> Due to changes in methodology, the 2006 national crime victimization rates are not comparable to previous years or to 2007 and cannot be used for yearly trend comparisons. However, the overall patterns of victimization at the national level can be examined.

Source: U.S. Department of Justice, Bureau of Justice Statistics, National Crime Victimization Survey, *Intimate Partner Violence in the United States*, Series NCJ-210675, December 2007, and *Crime Victimization*, annual, Series NCJ-224390. See also <<http://bjs.ojp.usdoj.gov/index.cfm?ty=pbdetail&iid=1000>>.

**Table 315. Stalking and Harassment Victimization in the United States: 2006**

[Survey based on population of persons aged 18 or older. The survey defines stalking as a course of conduct directed at a specific person that would cause a reasonable person to feel fear. The survey characterizes individuals as victims of harassment who experience the behaviors associated with stalking but neither reported feeling fear as a result of such conduct nor experienced actions that would cause a reasonable person to feel fear]

Characteristic	Population	Number			Rate per 1,000 persons		
		All	Stalking	Harassment	All	Stalking	Harassment
All victims <sup>1</sup>	246,500,200	5,857,030	3,424,100	2,432,930	23.8	13.9	9.9

**Table 318. Hate Crimes—Number of Incidents, Offenses, Victims, and Known Offenders by Bias Motivation: 2000 to 2008**

[The FBI collected statistics on hate crimes from 13,690 law enforcement agencies representing over 269 million inhabitants in 2008. Hate crime offenses cover incidents motivated by race, religion, sexual orientation, ethnicity/national origin, and disability]

Bias motivation	Incidents reported	Offenses	Victims <sup>1</sup>	Known offenders <sup>2</sup>
2000, total	8,213	9,619	10,117	7,690
2005, total	7,163	8,380	8,804	6,804
2006, total	7,722	9,080	9,652	7,330
2007, total	7,624	9,006	9,535	6,965
2008, total	7,783	9,168	9,691	6,927
Bias motive:				
Race, total	3,992	4,704	4,934	3,723
Anti-White	716	812	829	811
Anti-Black	2,876	3,413	3,596	2,596
Anti-American Indian/Alaska native	54	59	63	61
Anti-Asian/Pacific Islander	137	162	170	140
Anti-multiracial group	209	258	276	115
Ethnicity/national origin, total	894	1,148	1,226	1,034
Anti-Hispanic	561	735	792	711
Anti-other ethnicity/national origin	333	413	434	323
Religion, total	1,519	1,606	1,732	632
Anti-Jewish	1,013	1,055	1,145	353
Anti-Catholic	75	75	89	35
Anti-Protestant	56	60	62	34
Anti-Islamic	105	123	130	85

Sexual orientation, total	1,297	1,617	1,706	1,460
Anti-male homosexual	776	948	981	921
Anti-female homosexual	154	194	198	156
Anti-homosexual	307	415	466	336
Anti-heterosexual	33	33	34	25
Anti-bisexual	27	27	27	22
Disability, total	78	85	85	72
Anti-physical	22	28	28	26
Anti-mental	56	57	57	46
Multiple bias <sup>3</sup>	3	8	8	6

<sup>1</sup> The term "victim" may refer to a person, business, institution, or a society as a whole. <sup>2</sup> The term "known offender" does not imply that the identity of the suspect is known, but only that an attribute of the suspect has been identified which distinguishes him/her from an unknown offender. <sup>3</sup> In a "multiple-bias incident" two conditions must be met: more than one offense type must occur in the incident and at least two offense types must be motivated by different biases.

**Table 325. Federal Drug Arrests and Seizures by Type of Drug: 2000 to 2009**

[For fiscal years ending in year shown. The data have all been revised. In years past, the data for the amount of drugs seized at the Federal level was obtained from the Federal-wide Drug Seizure System (FDSS). A new system has been created called the National Seizure System (NSS). This system will broaden the scope of data collected for the amount of drugs seized (in pounds) at the national level. The data for "Seizure in (pounds)" for years shown are from NSS]

Drug	2000	2002	2003	2004	2005	2006	2007	2008	2009

Felony denials per 1,000 applications .....	(NA)	(NA)	(NA)	17.0	11.4	6.8	6.6	6.9	6.0	5.7	7.2	

NA Not available. <sup>1</sup> Number of applications and estimates of denials for firearm transfers or permits since the inception of the Brady Act, 1994–2007. <sup>2</sup> Background checks on applicants were conducted by state and local agencies, mainly on handgun transfers. See "Presale Handgun Checks, the Brady Interim Period, 1994–98" (NCJ 175034). <sup>3</sup> The period beginning November 30, 1998 is the effective date for the Brady Handgun Violence Prevention Act, P.L. 103–159, 1993. The National Instant Criminal Background Check System (NICS) began operations. Checks on handgun and long gun transfers are conducted by the Federal Bureau of Investigation (FBI), and by state and local agencies. Totals combine Firearm Inquiry Statistics (FIST) estimates for state and local agencies with transactions and denials reported by the FBI. <sup>4</sup> For the period of November 30 to December 31, 1998. Counts are from the NICS operations report and may include multiple transactions for the same application.

Table 336. Financial Crimes: 2003 to 2009

[For the year ending September 30. The FBI focuses its financial crimes investigations on such criminal activities as corporate fraud, securities and commodities fraud, health care fraud, mortgage fraud, insurance fraud, mass marketing fraud, and money laundering. These are the identified priority crime problem areas of the Financial Crimes Section (FCS) of the FBI. The mission of the FCS is to oversee the investigation of financial fraud, and to facilitate the forfeiture of assets from those engaging in federal crimes. For more information on financial fraud types including mortgage fraud, go to <[http://www.fbi.gov/publications/financial/fcs\\_report2009/financial\\_crime\\_2009.htm](http://www.fbi.gov/publications/financial/fcs_report2009/financial_crime_2009.htm)>. For more detailed information on mortgage fraud, go to <[http://www.fbi.gov/publications/fraud/mortgage\\_fraud09.htm](http://www.fbi.gov/publications/fraud/mortgage_fraud09.htm)>]

**Table 337. Delinquency Cases Disposed by Juvenile Courts by Reason for Referral: 1990 to 2007**

[In thousands (1,337 represents 1,337,000), except rate. A delinquency offense is an act committed by a juvenile for which an adult could be prosecuted in a criminal court. Disposition of a case involves taking a definite action such as waiving the case to criminal court, dismissing the case, placing the youth on probation, placing the youth in a facility for delinquents, or such actions as fines, restitution, and community service]

Table 339. Child Abuse and Neglect Cases Substantiated and Indicated—Victim Characteristics: 2000 to 2008

[Based on reports alleging child abuse and neglect that were referred for investigation by the respective child protective services agency in each state. The reporting period may be either calendar or fiscal year. The majority of states provided duplicated counts. Also, varying number of states reported the various characteristics presented below. A substantiated case represents a type of investigation disposition that determines that there is sufficient evidence under state law to conclude that maltreatment occurred or that the child is at risk of maltreatment. An indicated case represents a type of disposition that concludes that there was a reason to suspect maltreatment had occurred]

<sup>1</sup> Data have been revised. <sup>2</sup> A child may be a victim of more than one maltreatment. Therefore, the total for this item adds up to more than 100 percent. <sup>3</sup> The increase in unknown age, sex, and race in 2005 is due to some states reporting summary data without breakdown of corresponding fields. <sup>4</sup> Unknown data not shown. <sup>5</sup> Data have been updated since the release of the annual report.

<sup>1</sup> The number of investigations includes assessments. The number of investigations is based on the total number of investigations that received a disposition in 2008. <sup>2</sup> The number of "Children Subject of an Investigation" is based on the total number of children who were included in an investigation or assessment. <sup>3</sup> Victims are defined as children subject of a substantiated, indicated, or alternative response-victim maltreatment.

**Table 343. Felony Convictions in State Courts: 2000 to 2006**

[In 2006, an estimated 1,205,273 persons were convicted of a felony (federal and state courts). Of that number, 1,132,290 were convicted in state courts, the vast majority (94 percent) of whom pleaded guilty. At the time of sentencing, about 3 out of 4 felons sentenced (77 percent) were sentenced for a single felony]

Most serious conviction	Felony convictions in state courts							
	2000		2002		2004		2006	
	Number	Percent	Number	Percent	Number	Percent	Number	Percent
All offenses	924,700	100	1,051,000	100	1,078,920	100	1,132,290	100.0
Violent offenses	173,200	18.7	197,030	18.8	194,570	18.0	206,140	18.2
Murder <sup>1</sup>	8,600	0.9	8,990	0.9	8,400	0.8	8,670	0.8
Rape/Sexual assault	31,500	3.4	35,500	3.4	33,190	3.1	33,200	2.9

Trafficking	203,400	22.0	212,810	20.2	201,760	18.7	212,490	18.8
Weapon offenses	28,200	3.1	32,470	3.1	33,010	3.1	38,010	3.4
Other offenses <sup>5</sup>	141,600	15.3	155,970	14.8	177,810	16.5	188,730	16.7

<sup>1</sup> A small number of cases were classified as nonnegligent manslaughter when it was unclear if the conviction offense was murder or nonnegligent manslaughter. <sup>2</sup> Includes offenses such as negligent manslaughter and kidnapping. <sup>3</sup> When vehicle theft could not be distinguished from other theft, the case was coded as "other theft." This results in a conservative estimate of vehicle thefts. <sup>4</sup> Includes embezzlement. <sup>5</sup> Composed of nonviolent offenses such as receiving stolen property and vandalism.

NA Not available. <sup>1</sup> U.S. total includes federal prisoners not distributed by state. This total includes all inmates held in public and private adult correctional facilities. <sup>2</sup> Data include both total jail and prison population. Prisons and jails form one integrated system.

<sup>3</sup> Numbers are for custody rather than jurisdiction counts. <sup>4</sup> The transfer of responsibility for sentenced felons from the District of Columbia to the federal system was completed by the year end 2001. <sup>5</sup> The District of Columbia inmates sentenced to more than 1 year are now under the responsibility of the Bureau of Prisons. <sup>6</sup> Estimated data for 2007.

**Table 352. The U.S. Fire Service: Departments and Personnel: 1990 to 2008**

[[In thousands 1,025.7 represents 1,025,700.]] A fire department is a public or private organization that provides fire prevention, fire suppression, and associated emergency and non-emergency services to a jurisdiction such as a county, municipality, or organized fire district. For 2008, there was an estimated 30,170 fire departments in the United States. These fire departments have an estimated 52,400 fire stations, 68,200 pumpers, 6,725 aerial apparatus and 75,300 other suppression vehicles. A fire department responds to a fire every 22 seconds]

Items	1990	1995	2000	2003	2004	2005	2006	2007	2008
Fire departments (Number) . . . . .

---

## Section 6

# Geography and Environment

---

This section presents a variety of information on the physical environment of the United States, starting with basic area measurement data and ending with climatic data for selected weather stations around the country. The subjects covered between those points are mostly concerned with environmental trends but include related subjects such as land use, water consumption, air pollutant emissions, toxic releases, oil spills, hazardous waste sites, municipal waste and recycling, threatened and endangered wildlife, and the environmental industry.

The information in this section is selected from a wide range of federal agencies that compile the data for various administrative or regulatory purposes, such as the Environmental Protection Agency (EPA), U.S. Geological Survey (USGS), National Oceanic and Atmospheric Administration (NOAA), Natural Resources Conservation Service (NRCS), and National Atlas® of the United States. New information on the greenhouse gases and earthquakes may be found in Tables 372 and 385.

**Area**—For the 2000 census and 2008, area measurements were calculated by computer based on the information contained in a single, consistent geographic database, the Topologically Integrated Geographic Encoding & Referencing system (TIGER®) database. The 2008 area measurements may be found in Table 355.

**Geography**—The USGS conducts investigations, surveys, and research in the fields of geography, geology, topography, geographic information systems, mineralogy, hydrology, and geothermal energy resources as well as natural hazards. The USGS provides United States cartographic data through the Earth Sciences Information Center, water resources data through the *Water Resources of the United States* at <<http://water.usgs.gov/pubs/>>. In a joint project with the U.S. Census Bureau, during the 1980s, the USGS provided the basic information on geographic features for input into a national geographic and

cartographic database prepared by the Census Bureau, called TIGER® database. Since then, using a variety of sources, the Census Bureau has updated these features and their related attributes (names, descriptions, etc.) and inserted current information on the boundaries, names, and codes of legal and statistical geographic entities. The 2008 area measures, land and water, including their classifications, reflect base feature updates made in the Master Address File (MAF)/TIGER database through May 1, 2008. The boundaries of the states and equivalent areas are as of January 1, 2008. Maps prepared by the Census Bureau using the TIGER® database show the names and boundaries of entities and are available on a current basis.

An inventory of the nation's land resources by type of use/cover was conducted by the National Resources Inventory Conservation Services (NRCS) every 5 years beginning in 1977 through 2007. The most recent survey results, which were published for the year 2007, covered all nonfederal land for the contiguous 48 states.

**Environment**—The principal federal agency responsible for pollution abatement and control activities is the Environmental Protection Agency (EPA). It is responsible for establishing and monitoring national air quality standards, water quality activities, solid and hazardous waste disposal, and control of toxic substances. Many of these series now appear in the Envirofacts portion of the EPA Web site at <<http://www.epa.gov/enviro/>>.

The Clean Air Act, which was last amended in 1990, requires the EPA to set National Ambient Air Quality Standards (NAAQS) (40 CFR part 50) for pollutants considered harmful to public health and the environment. The Clean Air Act established two types of national air quality standards. **Primary standards** set limits to protect public health,

including the health of "sensitive" populations such as asthmatics, children, and the elderly. **Secondary standards** set limits to protect public welfare, including protection against decreased visibility, damage to animals, crops vegetation, and buildings. See <<http://www.epa.gov/air/criteria.html>>. The EPA Office of Air Quality Planning and Standards (OAQPS) has set National Ambient Air Quality Standards for six principal pollutants, which are called "criteria" pollutants. These pollutants are: Carbon Monoxide, Lead, Nitrogen Dioxide, Particulate Matter (PM<sub>2.5</sub> and 10), Ozone, and Sulfur Dioxide. NAAQS are periodically reviewed and revised to include any additional or new health or welfare data. Table 368 gives some of the health-related standards for the six air pollutants having NAAQS. Data gathered from state networks are periodically submitted to EPA's National Aerometric Information Retrieval System (AIRS) for summarization in annual reports on the nationwide status and trends in air quality. For details, see "Air Trends" on the EPA Web site at <<http://www.epa.gov/airtrends/index.html>>.

The Toxics Release Inventory (TRI), published by the EPA, is a valuable source of information on approximately 650 chemicals that are being used, manufactured, treated, transported, or released into the environment. Sections 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA) and 6607 of the Pollution Prevention Act (PPA), mandate that a publicly-accessible toxic chemical database be developed and maintained by EPA. This database, known as the TRI, contains information concerning waste management activities and the release of toxic chemicals by facilities that manufacture, process, or otherwise use said materials. Data on the release of

these chemicals are collected from about 22,000 facilities and facilities added in 1998 that have the equivalent of 10 or more full time employees and meet the established thresholds for manufacturing, processing, or "other use" of listed chemicals. Facilities must report their releases and other waste management quantities. Since 1994 federal facilities have been required to report their data regardless of industry classification. In May 1997, EPA added seven new industry sectors that reported to the TRI for the first time in July 1999 for the 1998 reporting year. More current information on this program can be found at <<http://www.epa.gov/tri/index.htm>>.

**Climate**—NOAA, through the National Weather Service and the National Environmental Satellite, Data, and Information Service, is responsible for climate data. NOAA maintains about 11,600 weather stations, of which over 3,000 produce autographic precipitation records, about 600 take hourly readings of a series of weather elements, and the remainder record data once a day. These data are reported monthly in the Climatological Data and Storm Data, published monthly and annually in the Local Climatological Data (published by location for major cities).

The normal climatological temperatures, precipitation, and degree days listed in this publication are derived for comparative purposes and are averages for the 30-year period, 1971–2000. For stations that did not have continuous records for the entire 30 years from the same instrument site, the normals have been adjusted to provide representative values for the current location. The information in all other tables is based on data from the beginning of the record at that location through 2007.

Table 355. Land and Water Area of States and Other Entities: 2008

[One square mile = 2.59 square kilometers. Table data have been revised. The area measurements were derived from the Census Bureau's Master Address File/Topologically Integrated Geographic Encoding and Referencing (MAF/TIGER) geographic database. The boundaries of the states and equivalent areas are as of January 1, 2008. The land and water areas, including their classifications, reflect base feature updates made in the MAF/TIGER database through May 1, 2008. These updates show increases in total water area and decrease in land area for nearly every state. For more details, see <<http://www.census.gov/geo/www/tiger/tgrshp2008/tgrshp2008.html>>]

**Table 356. Great Lakes Profile**

[The Great Lakes contain the largest supply of freshwater in the world, holding about 18% of the world's total freshwater and about 90% of the United States' total freshwater. The Lakes are a series of five interconnecting large lakes, one small lake, four connecting channels, and the St. Lawrence Seaway. Combined, the lakes cover an area of over 94,000 square miles (245,000 square kilometers) and contain over 5,400 cubic miles (23,000 cubic kilometers) of water]

Characteristics	Unit	Lake Superior	Lake Michigan	Lake Huron	Lake Erie	Lake Ontario
Length .....	Miles .....	350	307	206	241	193
Breadth .....	Miles .....	160	118	183	57	53

Table 360. Coastline and Shoreline of the United States by State

[In statute miles. Each statute mile equals one mile. The term **coastline** is used to describe the general outline of the seacoast. For the table below, United States coastline measurements were made from small-scale maps, and the coastline was generalized. The coastlines of large sounds and bays were included. Measurements were made in 1948. **Shoreline** is the term used to describe a more detailed measure of the seacoast. The tidal shoreline figures in the table below were obtained in 1939–1940 from the largest-scale charts and maps then available. Shoreline of the outer coast, offshore islands, sounds, and bays was included, as well as the tidal portion of rivers and creeks. Only states with coastline or shoreline are included in the following table]

State	General coastline	Tidal shoreline	State	General coastline	Tidal shoreline
United States	12,383	88,633	Mississippi	44	359
Alabama	53	607	New Hampshire	13	131
Alaska	6,640	33,904	New Jersey	130	1,792
California	840	3,427	New York	127	1,850

Table 361. Flows of Largest U.S. Rivers—Length, Discharge, and Drainage Area

River	Location of mouth	Source stream (name and location)	Length (miles) <sup>1</sup>	Average discharge at mouth (1,000 cubic feet per second)	Drainage area (1,000 sq. miles)
Missouri	Missouri	Red Rock Creek, MT	<sup>3</sup> 2,540	76.2	<sup>2</sup> 529
Mississippi	Louisiana	Mississippi River, MN	2,340	<sup>4</sup> 593	<sup>2, 5</sup> 1,150
Yukon	Alaska	McNeil River, Canada	1,980	225	<sup>2</sup> 328
St. Lawrence	Canada	North River, MN	1,900	348	<sup>2</sup> 396
Rio Grande	Mexico–Texas	Rio Grande, CO	1,900	( <sup>7</sup> )	336
Arkansas	Arkansas	East Fork Arkansas River, CO	1,460	41	161
Colorado	Mexico	Colorado River, CO	1,450	( <sup>7</sup> )	246
Atchafalaya <sup>6</sup>	Louisiana	Tierra Blanca Creek, NM	1,420	58	95.1
Ohio	Illinois–Kentucky	Allegheny River, PA	1,310	281	203
Red <sup>6</sup>	Louisiana	Tierra Blanca Creek, NM	1,290	56	93.2
Brazos	Texas	Blackwater Draw, NM	1,280	( <sup>7</sup> )	45.6
Columbia	Oregon–Washington	Columbia River, Canada	1,240	265	<sup>2</sup> 258
Snake	Washington	Snake River, WY	1,040	56.9	108
Platte	Nebraska	Grizzly Creek, CO	990	( <sup>7</sup> )	84.9
Pecos	Texas	Pecos River, NM	926	( <sup>7</sup> )	44.3
Canadian	Oklahoma	Canadian River, CO	906	( <sup>7</sup> )	46.9
Tennessee	Kentucky	Courthouse Creek, NC	886	68	40.9

<sup>1</sup> From source to mouth. <sup>2</sup> Drainage area includes both the United States and Canada. <sup>3</sup> The length from the source of the Missouri River to the Mississippi River and thence to the Gulf of Mexico is about 3,710 miles. <sup>4</sup> Includes about 167,000 cubic feet per second diverted from the Mississippi into the Atchafalaya River but excludes the flow of the Red River. <sup>5</sup> Excludes the drainage areas of the Red and Atchafalaya Rivers. <sup>6</sup> In east-central Louisiana, the Red River flows into the Atchafalaya River, a distributary of the Mississippi River. Data on average discharge, length, and drainage area include the Red River, but exclude all water diverted into the Atchafalaya from the Mississippi River. <sup>7</sup> Less than 15,000 cubic feet per second.

Source: U.S. Geological Survey, *Largest Rivers in the United States*, September 2005, <<http://pubs.usgs.gov/of/1987/of87-242/>>.

**Table 362. Extreme and Mean Elevations by State and Other Areas**

[One foot = .305 meter. There are 2,130 square miles of the United States below sea level (Death Valley is the lowest point). There are 20,230 square miles above 10,000 feet (Mount McKinley is the highest point in the United States). Minus sign (–) indicates below sea level]

**Table 366. U.S. Wetland Resources and Deepwater Habitats by Type: 1998 to 2004**

[In thousands of acres (148,618.8 represents 148,618,800). Wetlands and deepwater habitats are defined separately because the term wetland does not include permanent water bodies. Deepwater habitats are permanently flooded land lying below the deepwater boundary of wetlands. Deepwater habitats include environments where surface water is permanent and often deep, so that water, rather than air, is the principal medium within which the dominant organisms live, whether or not they are attached to the substrate. As in wetlands, the dominant plants are hydrophytes; however, the substrates are considered nonsoil because the water is too deep to support emergent vegetation. In general terms, wetlands are lands where saturation with water is the dominant factor determining the nature of soil development and the types of plant and animal communities living in the soil and on its surface. The single feature that most wetlands share is soil or substrate that is at least periodically saturated with or covered by water. Wetlands are lands transitional between terrestrial and aquatic systems where the water table is usually at or near the surface or the land is covered by shallow water. For more information on wetlands, see the "Classification of Wetlands and Deepwater Habitats of the United States" at <[http://www.fws.gov/wetlands/\\_documents/gNSDI/ClassificationWetlandsDeepwaterHabitatsUS.pdf](http://www.fws.gov/wetlands/_documents/gNSDI/ClassificationWetlandsDeepwaterHabitatsUS.pdf)>]

Wetland or deepwater category	Estimated area,		Change, 1998 to 2004
	1998	2004	
<b>All wetlands and deepwater habitats, total . . . .</b>	<b>148,618.8</b>	<b>149,058.5</b>	<b>439.7</b>
All deepwater habitats, total . . . . .	41,046.6	41,304.5	247.9
Lacustrine <sup>1</sup> . . . . .	16,610.5	16,773.4	162.9
Riverine <sup>2</sup> . . . . .	6,765.5	6,813.3	47.7
Estuarine Subtidal <sup>3</sup> . . . . .	17,680.5	17,717.8	37.3
All wetlands, total . . . . .	107,562.3	107,754.0	191.8
Intertidal wetlands <sup>4</sup> . . . . .	5,328.7	5,300.3	-28.4
Marine intertidal . . . . .	130.4	128.6	-1.9
Estuarine intertidal nonvegetated . . . . .	594.1	600.0	5.9
Estuarine intertidal vegetated . . . . .	4,604.2	4,571.7	-32.4
Freshwater wetlands . . . . .	102,233.6	102,453.8	220.2
Freshwater nonvegetated . . . . .	5,918.7	6,633.9	715.3
Freshwater vegetated . . . . .	96,414.9	95,819.8	-495.1
Freshwater emergent <sup>5</sup> . . . . .	26,289.6	26,147.0	-142.6
Freshwater forested <sup>6</sup> . . . . .	51,483.1	52,031.4	548.2
Freshwater shrub <sup>7</sup> . . . . .	18,542.2	17,641.4	-900.8

<sup>1</sup> The lacustrine system includes deepwater habitats with all of the following characteristics: (1) situated in a topographic depression or a dammed river channel; (2) lacking trees, shrubs, persistent emergents, emergent mosses or lichens with greater than 30 percent coverage; and (3) total area exceeds 20 acres (8 hectares). <sup>2</sup> The riverine system includes deepwater habitats contained within a channel, with the exception of habitats with water containing ocean derived salts in excess of 0.5 parts per thousand. <sup>3</sup> The estuarine system consists of deepwater tidal habitats and adjacent tidal wetlands that are usually semi-enclosed by land but have open, partly obstructed, or sporadic access to the open ocean, and in which ocean water is at least occasionally diluted by freshwater runoff from the land. Subtidal is where the substrate is continuously submerged by marine or estuarine waters. <sup>4</sup> Intertidal is where the substrate is exposed and flooded by tides. Intertidal includes the splash zone of coastal waters. <sup>5</sup> Emergent wetlands are characterized by erect, rooted, herbaceous hydrophytes, excluding mosses and lichens. This vegetation is present for most of the growing season in most years. These wetlands are usually dominated by perennial plants. <sup>6</sup> Forested wetlands are characterized by woody vegetation that is 20 feet tall or taller. <sup>7</sup> Shrub wetlands include areas dominated by woody vegetation less than 20 feet tall. The species include true shrubs, young trees, and trees or shrubs that are small or stunted because of environmental conditions.

Table 368. National Ambient Air Pollutant Concentrations by Type of Pollutant: 2001 to 2007

[Data represent annual composite averages of pollutant based on daily 24-hour averages of monitoring stations, except carbon monoxide which is based on the second-highest, nonoverlapping, 8-hour average; ozone, the fourth-highest maximum 8-hour value; and lead, the maximum quarterly average of ambient lead levels. Based on data from the Air Quality System. @mg/m³ = micrograms of pollutant per cubic meter of air; ppm = parts per million]

Pollutant	Unit	Monitoring stations, number	Air quality standard <sup>1</sup>	2001	2002	2003	2004	2005	2006	2007
Carbon monoxide	ppm	322	<sup>2</sup> 9	3.3	2.9	2.7	2.5	2.3	2.2	2.0
Ozone	ppm	1,013	<sup>3</sup> 0.075	0.081	0.085	0.080	0.074	0.079	0.077	0.077
Sulfur dioxide	ppm	406	<sup>4</sup> 0.03	0.005	0.004	0.004	0.004	0.004	0.004	0.004
Particulates (PM-10)	µmg/m³	734	<sup>5</sup> 150	86.5	86.8	84.4	69.6	65.2	75.6	68.5
Fine particulates (PM2.5)	µmg/m³									
annual average	µmg/m³	725	<sup>6</sup> 15	13.2	12.7	12.3	11.9	12.9	11.6	11.9
Fine particulates (PM2.5)	µmg/m³									
daily average	µmg/m³	725	<sup>7</sup> 35	34.1	32.9	30.8	30.5	33.5	28.7	30.9
Nitrogen dioxide	ppm	313	<sup>8</sup> 0.053	0.015	0.015	0.014	0.013	0.013	0.013	0.012
Lead	µmg/m³	103	<sup>9</sup> 0.15	0.35	0.17	0.17	0.21	0.16	0.14	0.155

<sup>1</sup> Refers to the primary National Ambient Air Quality Standard. <sup>2</sup> Based on 8-hour standard of 9 ppm. <sup>3</sup> Based on annual standard of 0.03 ppm. <sup>4</sup> Based on 8-hour standard of 0.075 ppm. On March 12, 2008, EPA revised the level of the primary and secondary 8-hour ozone standards to 0.075 ppm. <sup>5</sup> Based on 24-hour (daily) standard of 150 mg/m³. The particulates (PM-10) standard replaced the previous standard for total suspended particulates in 1987. In 2006, EPA revoked the annual PM-10 standard. <sup>6</sup> Based on annual standard of 15 mg/m³. The PM-2.5 national monitoring network was deployed in 1999. National trend data prior to that time is not available. <sup>7</sup> Based on daily standard of 35 mg/m³. The PM-2.5 national monitoring network was deployed in 1999. National trend data prior to that time is not available. <sup>8</sup> Based on annual standard of 0.053 ppm. <sup>9</sup> Based on 3-month standard of 1.5 µmg/m³. On October 15, 2008, EPA revised the form of the primary and secondary lead standards and revised the level to 0.15 mg/m³.

<sup>1</sup> Preliminary. <sup>2</sup> Includes other items, not shown separately. <sup>3</sup> This includes carbon dioxide from international bunker fuels, both civilian and military, which are excluded from the accounting of carbon dioxide emissions under the United Nations convention.

<sup>4</sup> Share of total electric power sector carbon dioxide emissions weighted by sales to this sector. <sup>5</sup> Includes small amounts of petroleum coke. <sup>6</sup> Includes lease and plant fuel. <sup>7</sup> Includes electricity-only and combined heat and power plants whose primary business is to sell electricity, or electricity and heat, to the public. Beginning 2005, also includes emissions from municipal solid waste and geothermal electricity generation. Emissions from the electric power sector are apportioned to each end-use sector according to their share of electricity sales.

Table 377. Toxic Chemical Releases and Transfers by Media: 2003 to 2008

[In millions of pounds (4,447.7 represents 4,447,700,000), except as indicated. Based on reports filed as required by Section 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA), or Title III of the Superfund Amendments and Reauthorization Act of 1986), Public Law 99-499, The Pollution Prevention Act (PPA) of 1990 mandates collection of data on toxic chemicals that are treated on-site, recycled, and combusted for energy recovery. Owners and operators of facilities that are classified within North American Industrial Classification Code groups 31 through 33, 2121, 2122, 2211, 4246, 4247 and 562; have 10 or more full-time employees, and that manufacture, process, or otherwise use any listed toxic chemical in quantities greater than the established threshold in the course of a calendar year are covered and required to report. Includes all Persistent, Toxic (PBT) chemicals and vanadium and vanadium compounds. Does not include off-site disposal or other releases transferred to other TRI facilities that reported the amounts as on-site disposal or other releases. Data for all the years have been revised]

Media	2003	2004	2005	2006	2007	2008
Total facilities reporting	24,593	24,428	24,140	23,543	22,775	21,695

Table 382. Oil Spills in U.S. Water—Number and Volume: 2000 to 2009

[These summary statistics are based on reported discharges of oil and petroleum based products into U.S. navigable waters, including territorial waters (extending 3 to 12 miles from the coastline), tributaries, the contiguous zone, onto shoreline, or into other waters that threaten the marine environment. Spills associated with Hurricanes Katrina and Rita have been excluded]

Table 388. Major U.S. Weather Disasters: 2006 to 2009

[5.0 represents \$5,000,000,000. Covers only weather-related disasters costing \$1 billion or more]

Event	Description	Time period	Estimated cost <sup>1</sup> (bill. dol.)	Deaths (number)
2009 Southwest/Great Plains drought.....	Drought conditions occurred during much of the year causing agricultural losses in TX, OK, KS, CA, NM, and AZ. The largest losses occurred in TX and CA.	Entire year 2009	Over 5.0	-
Western wildfires.....	Residual and sustained drought conditions across western and south-central states resulted in thousands of fires. Most affected states include CA, AZ, NM, TX, OK, and UT.	Summer-Fall 2009	Over 1.0	10
Midwest, South, and Eastern severe weather.....	Sustained outbreak of thunderstorms and high winds in TX, OK, MO, NE, KS, AR, AL, MS, TN, NC, SC, KY, and PA.	June 2009	Over 1.1	-
South/Southeast tornadoes and severe weather.....	Outbreak of tornadoes, hail and severe thunderstorms in AL, AR, GA, KY, MO, SC, TN—with 85 tornadoes confirmed.	April 2009	Over 1.2	6
Midwest/Southeast tornadoes.....	Outbreak of tornadoes in NE, KS, OK, IA, TX LA, MS, AL, GA, TN, KY—with 56 tornadoes confirmed.	March 2009	Over 1.0	-
Southeast/Ohio Valley severe weather.....	Complex of severe thunderstorms and high winds in TN, KY, OK, OH, VA, WV, and PA. The majority of the damage occurred in OK and OH.	February 2009	Over 1.4	10
2008 widespread drought.....	Severe drought and heat caused agricultural losses in areas of the South and West. Record low lake levels. Also occurred in areas of the Southeast. Includes states of CA, GA, NC, SC, TN, and TX.	Entire year 2008	Over 2.0	-
Hurricane Ike.....	Category 2 hurricane made landfall in Texas as the largest (in size) Atlantic hurricane on record, causing wind and considerable surge in coastal and significant flooding damage in AR, IL, IN, KY, LA, MO, OH, PA, and TX.	September 2008	Over 27.0	82
Hurricane Gustav.....	Category 2 hurricane made landfall in Louisiana causing significant wind, storm surge and flood damage in AL, AR, LA, and MS.	September 2008	5.0	43
Hurricane Dolly.....	Category 2 hurricane made landfall in southern Texas causing considerable wind and flooding damage in TX and NM.	July 2008	Over 1.2	3
U.S. wildfires.....	Drought conditions across numerous Western, Central and Southeastern states (15) resulted in thousands of wildfires, national acreage burned exceeding 5.2 million acres (mainly in the West).	Summer-Fall 2008	Over 2.0	16
Midwest flood.....	Heavy rainfall and flooding caused significant agricultural loss and property damage in seven states with Iowa being hardest hit with widespread rainfall totals ranging from 4 to 16 inches.	June 2008	Over 15.0	24
Midwest/Mid-Atlantic storms.....	An outbreak of tornadoes and thunderstorms over the states of IA, IL, IN, KS, NE, MD, MI, MN, MO, OK, VA, WI, WV.	June 2008	Over 1.1	18
Midwest/Ohio Valley storms.....	Outbreak of tornadoes over the Midwest/Ohio Valley over the region (IL, IN, IA, KS, MN, NE, OK, WY, and CO)—with 235 tornadoes confirmed.	May 2008	Over 2.4	13
Southeast/Midwest tornadoes.....	Series of tornadoes and severe thunderstorms across the Southeast and Midwest states (AL, AR, IN, KY, MS, OH, TN, TX)—with 87 tornadoes confirmed.	February 2008	Over 1.0	57
Great Plains and Eastern drought.....	Severe drought with periods of extreme heat resulting in major reductions in crop yields, along with very low stream flows, and lake levels.	Entire year 2007	5.0	( <sup>2</sup> )
Western wildfires.....	Continued drought conditions and high winds over much of the Western United States, resulting in numerous wildfires.	Summer-Fall 2007	Over 1.0	12
Spring freeze.....	Widespread severe freeze over much of the East and Midwest causing losses in fruit crops, field crops, and in the ornamental industry.			
Severe storms and tornadoes.....	Flooding, hail, tornadoes and severe thunderstorms across numerous Eastern and Southern states.	April 2007	2.0	-
Freeze.....	Widespread agricultural freeze over a good portion of California, destroying numerous agricultural crops.	April 2007	1.5	9
Widespread drought.....	Rather severe drought affected crops in states especially during the spring-summer, centered over the Great Plains region, with other areas affected across portions of the South and Far West.	January 2007	1.4	1
Severe storms and tornadoes.....	Outbreak of tornadoes over portions of the Midwest and South during a week-long period.	Spring-Summer 2006	Over 6.0	( <sup>2</sup> )
Numerous wildfires.....	Wildfires mainly over the Western half of the country, due to dry weather and high wind burning nearly 10 million.	March 2006	Over 1.0	10+
		Entire year 2006	Over 1.0	28+

- Represents zero. <sup>1</sup> Represents actual dollar costs at the time of event and is not adjusted for inflation. <sup>2</sup> Some deaths reported due to heat but not beyond typical annual averages. ## Section 7

# Elections

---

This section relates primarily to presidential, congressional, and gubernatorial elections. Also presented are summary tables on congressional legislation; state legislatures; Black, Hispanic, and female officeholders; population of voting age; voter participation; and campaign finances.

Official statistics on federal elections, collected by the Clerk of the House, are published biennially in *Statistics of the Presidential and Congressional Election* and *Statistics of the Congressional Election*. Federal and state elections data appear also in *America Votes*, a biennial volume published by CQ Press (a division of Congressional Quarterly, Inc.), Washington, DC. Federal elections data also appear in the U.S. Congress, *Congressional Directory*, and in official state documents. Data on reported registration and voting for social and economic groups are obtained by the U.S. Census Bureau as part of the Current Population Survey (CPS) and are published in Current Population Reports, Series P20 (see text, Section 1).

Almost all federal, state, and local governmental units in the United States conduct elections for political offices and other purposes. The conduct of elections is regulated by state laws or, in some cities and counties, by local charter. An exception is that the U.S. Constitution prescribes the basis of representation in Congress and the manner of electing the president and grants to Congress the right to regulate the times, places, and manner of electing federal officers. Amendments to the Constitution have prescribed national criteria for voting eligibility. The 15th Amendment, adopted in 1870, gave all citizens the right to vote regardless of race, color, or previous condition of servitude. The 19th Amendment, adopted in 1919, further extended the right to vote to all citizens regardless of sex. The payment of poll taxes as a prerequisite to voting in federal elections was banned by the 24th Amendment in 1964. In 1971, as a result of the 26th Amendment, eligibility to vote

in national elections was extended to all citizens, 18 years old and over.

**Presidential election**— The Constitution specifies how the president and vice president are selected. Each state elects, by popular vote, a group of electors equal in number to its total of members of Congress. The 23rd Amendment, adopted in 1961, grants the District of Columbia three presidential electors, a number equal to that of the least populous state. Subsequent to the election, the electors meet in their respective states to vote for president and vice president. Usually, each elector votes for the candidate receiving the most popular votes in his or her state. A majority vote of all electors is necessary to elect the president and vice president. If no candidate receives a majority, the House of Representatives, with each state having one vote, is empowered to elect the president and vice president, again, with a majority of votes required.

The 22nd Amendment to the Constitution, adopted in 1951, limits presidential tenure to two elective terms of 4 years each or to one elective term for any person who, upon succession to the presidency, has held the office or acted as President for more than 2 years.

**Congressional election**— The Constitution provides that representatives be apportioned among the states according to their population, that a census of population be taken every 10 years as a basis for apportionment, and that each state have at least one representative. At the time of each apportionment, Congress decides what the total number of representatives will be. Since 1912, the total has been 435, except during 1960 to 1962 when it increased to 437, adding one representative each for Alaska and Hawaii. The total reverted to 435 after reapportionment following the 1960 census. Members are elected for 2-year terms, all terms covering the same period. The District of Columbia, American Samoa, Guam, and the Virgin Islands

each elect one nonvoting delegate, and Puerto Rico elects a nonvoting resident commissioner.

The Senate is composed of 100 members, two from each state, who are elected to serve for a term of 6 years. One-third of the Senate is elected every 2 years. Senators were originally chosen by the state legislatures. The 17th Amendment to the Constitution, adopted in 1913, prescribed that senators be elected by popular vote.

**Voter eligibility and participation—**

The Census Bureau publishes estimates of the population of voting age and the percent casting votes in each state for presidential and congressional election years. These voting-age estimates include

a number of persons who meet the age requirement but are not eligible to vote, (e.g. aliens and some institutionalized persons). In addition, since 1964, voter participation and voter characteristics data have been collected during November of election years as part of the CPS. These survey data include noncitizens in the voting-age population estimates, but exclude members of the Armed Forces and the institutional population.

**Statistical reliability—** For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

Source: Chart prepared by U.S. Census Bureau. For data, see Tables 395 and 396.

Table 395. Vote Cast for President by Major Political Party: 1952 to 2008

[In thousands (61,552 represents 61,552,000), except percent and electoral vote. Prior to 1960, excludes Alaska and Hawaii; prior to 1964, excludes D.C. Vote cast for major party candidates includes the votes of minor parties cast for those candidates]

Year	Candidates for President		Vote cast for President						
	Democratic	Republican	Total popular vote <sup>1</sup> (1,000)	Democratic			Republican		
				Popular vote		Electoral vote	Popular vote		Electoral vote
				Number (1,000)	Percent		Number (1,000)	Percent	
1952...	Stevenson	Eisenhower	61,552	27,315	44.4	89	33,779	54.9	442
1956...	Stevenson	Eisenhower	62,027	26,739	43.1	73	35,581	57.4	457
1960...	Kennedy	Nixon	68,836	34,227	49.7	303	34,108	49.5	219

2000...	Ralph Nader	Green	2,530	Pat Buchanan	Reform	324
2004...	Ralph Nader	Independent	156	Michael Badnarik	Libertarian	369
2008...	Ralph Nader	Independent	739	Bob Barr	Libertarian	515

<sup>1</sup> Data include write-ins, scatterings, and/or votes for candidates who ran on party tickets not shown.  
Source: U.S. House of Representatives, Office of the Clerk, *Statistics of the Presidential and Congressional Election*, 2009, biennial. See also <[http://clerk.house.gov/member\\_info/election.html](http://clerk.house.gov/member_info/election.html)>.

Table 397. Democratic and Republican Percentages of Two-Party Presidential Vote by Selected Characteristics of Voters: 2004 and 2008

[In percent. Covers citizens of voting age living in private housing units in the contiguous United States. Percentages for Democratic Presidential vote are computed by subtracting the percentage Republican vote from 100 percent; third-party or independent votes are not included as valid data. Data are from the National Election Studies and are based on a sample and subject to sampling variability; for details, see source]

Characteristic	2004		2008		Characteristic	2004		2008	
	Demo- cratic	Republi- can	Demo- cratic	Republi- can		Demo- cratic	Republi- can	Demo- cratic	Republi- can
Total <sup>1</sup>	50	50	55	45	Race:				
					White	42	58	44	56

**Table 401. Vote Cast for U.S. Representatives by Major Political Party—States: 2004 to 2008**

[In thousands (113,192 represents 113,192,000), except percent. R = Republican, D = Democrat, and I = Independent. In each state, totals represent the sum of votes cast in each Congressional District or votes cast for Representative-at-Large in states where only one member is elected. In all years there are numerous districts within the state where either the Republican or Democratic party had no candidate. In some states the Republican and Democratic vote includes votes cast for the party candidate by endorsing parties]

X Not applicable. <sup>1</sup> No candidate. <sup>2</sup> According to state law, it is not required to tabulate votes for unopposed candidates.  
<sup>3</sup> Louisiana holds an open-primary election with candidates from all parties running on the same ballot. Any candidate who receives a majority is elected; if no candidate receives 50 percent, there is a run-off election in November between the top two finishers.  
<sup>4</sup> Reflects votes cast in the run-off election held on December 6, 2008.

— Represents zero. <sup>1</sup> Excludes women elected to the judiciary, women appointed to state cabinet-level positions, women elected to executive posts by the legislature, and elected members of university Board of Trustees or Board of Education.

<sup>2</sup> Calculated by U.S. Census Bureau based on total (male and female) state legislature (both upper and lower houses) data from Table 411. <sup>3</sup> Nebraska—4-year term and only state to have a nonpartisan legislature.

NA Not available. <sup>1</sup> Includes other races, not shown separately. <sup>2</sup> Beginning with the 2003 Current Population Survey (CPS), respondents could choose more than one race. 2004, 2006, and 2008 data represent persons who selected this race group only and exclude persons reporting more than one race. The CPS in prior years only allowed respondents to report one race group. See also comment on race in the text for Section 1. <sup>3</sup> Prior to 2004, this category was "Asian and Pacific Islanders"; therefore rates are not comparable with prior years. <sup>4</sup> Persons of Hispanic origin may be any race. <sup>5</sup> For composition of regions, see map, inside cover. <sup>6</sup> The General Educational Development (GED) Test measures how well a non-high school graduate has mastered the skills and general knowledge that are acquired in a 4-year high school education. Successfully passing the exam is a credential generally considered to be equivalent to a high school diploma. ## Section 8

# State and Local Government Finances and Employment

---

This section presents data on revenues, expenditures, debt, and employment of state and local governments. Nationwide statistics relating to state and local governments, their numbers, finances, and employment are compiled primarily by the U.S. Census Bureau through a program of censuses and surveys. Every fifth year (for years ending in "2" and "7"), the Census Bureau conducts a census of governments involving collection of data for all governmental units in the United States. In addition, the Census Bureau conducts annual surveys which cover all the state governments and a sample of local governments.

Annually, the Census Bureau releases information on the Internet which presents financial data for the federal government, nationwide totals for state and local governments, and state-local data by states. Also released annually is a series on state, city, county, and school finances and on state and local public employment. There is also a series of quarterly data releases covering tax revenue and finances of major public employee retirement systems.

Basic information for Census Bureau statistics on governments is obtained by mail canvass from state and local officials; however, financial data for each of the state governments and for many of the large local governments are compiled from their official records and reports by Census Bureau personnel. In over two-thirds of the states, all or part of local government financial data are obtained through central collection arrangements with state governments. Financial data on the federal government are primarily based on the *Budget* published by the Office of Management and Budget (see text, Section 9, Federal Government Finances and Employment).

**Governmental units**—The governmental structure of the United States includes, in addition to the federal government and the states, thousands of local governments—counties, municipalities, townships, school districts, and many "special districts." In 2007, 89,527 local governments were identified by the census of governments (see Tables 426–428). As defined by the census, governmental units include all agencies or bodies having an organized existence, governmental character, and substantial autonomy. While most of these governments can impose taxes, many of the special districts—such as independent public housing authorities and numerous local irrigation, power, and other types of districts—are financed from rentals, charges for services, benefit assessments, grants from other governments, and other non-tax sources. The count of governments excludes semi-autonomous agencies through which states, cities, and counties sometimes provide for certain functions—for example, "dependent" school systems, state institutions of higher education, and certain other "authorities" and special agencies which are under the administrative or fiscal control of an established governmental unit.

**Finances**—The financial statistics relate to government fiscal years ending June 30 or at some date within the 12 previous months. The following governments are exceptions and are included as though they were part of the June 30 group; ending September 30, the state governments of Alabama and Michigan, the District of Columbia, and Alabama school districts; and ending August 31, the state governments of Nebraska, Texas, and Chicago school districts. New York State ends its fiscal year on March 31. The federal government ended the fiscal year June 30 until 1976 when its fiscal year, by an act of

Congress, was revised to extend from Oct. 1 to Sept. 30. A 3-month quarter (July 1 to Sept. 30, 1976) bridged the transition.

Nationwide government finance statistics have been classified and presented in terms of uniform concepts and categories, rather than according to the highly diverse terminology, organization, and fund structure utilized by individual governments.

Statistics on governmental finances distinguish among general government, utilities, liquor stores, and insurance trusts. *General government* comprises all activities except utilities, liquor stores, and insurance trusts. Utilities include government water supply, electric light and power, gas supply, and transit systems. Liquor stores are operated by 17 states and by local governments in 6 states. Insurance trusts relate to employee retirement, unemployment compensation, and other social insurance systems administered by the federal, state, and local governments.

Data for cities or counties relate only to municipal or county and their dependent agencies and do not include amounts for other local governments in the same geographic location. Therefore, expenditure figures for "education" do not include spending by the separate school districts which administer public schools within most municipal or county areas. Variations in the assignment of governmental

responsibility for public assistance, health, hospitals, public housing, and other functions to a lesser degree also have an important effect upon reported amounts of city or county expenditure, revenue, and debt.

**Employment and payrolls**— These data are based mainly on mail canvassing of state and local governments. Payroll includes all salaries, wages, and individual fee payments for the month specified, and employment relates to all persons on governmental payrolls during a pay period of the month covered—including paid officials, temporary help, and (unless otherwise specified) part-time as well as full-time personnel. Effective with the 1997 Census of Governments, the reference period for measuring government employment was changed from October of the calendar year to March of the calendar year. As a result, there was no annual survey of government employment covering the October 1996 period. The prior reference month of October was used from 1958 to 1995. Figures shown for individual governments cover major dependent agencies such as institutions of higher education, as well as the basic central departments and agencies of the government.

**Statistical reliability**— For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

Table 426. Number of Governmental Units by Type: 1962 to 2007

**Table 442. State Resources, Expenditures, and Balances: 2008 and 2009**

[In millions of dollars (1,502,492 represents \$1,502,492,000,000). For fiscal year ending in year shown; see text; this section. General funds exclude special funds earmarked for particular purposes, such as highway trust funds and federal funds; they support most on-going broad-based state services, and are available for appropriation to support any governmental activity. Minus sign (-) indicates deficit]

**Table 446. Residential Property Tax Rates for Largest City in Each State: 2008**

[The real property tax is a function of housing values, real estate tax rates, assessment levels, homeowner exemptions and credits. Effective rate is the amount each jurisdiction considers based upon assessment level used. Assessment level is ratio of assessed value to assumed market value. Nominal rates represent the "announced" rates levied by the jurisdiction]

City	Effective tax rate per \$100		Assess-ment level (percent)	Nominal rate per \$100	City	Effective tax rate per \$100		Assess-ment level (percent)	Nominal rate per \$100
	Rank	Rate				Rank	Rate

<sup>1</sup> Player scratches a latex section on ticket which reveals instantly whether ticket is a winner. <sup>2</sup> Players choose and bet on three or four digits, depending on game, with various payoffs for different straight order or mixed combination bets. <sup>3</sup> Players typically select six digits out of a large field of numbers. Varying prizes are offered for matching three through six numbers drawn by lottery. <sup>4</sup> Includes break-open tickets, spiel, keno, video lottery, etc. <sup>5</sup> Sales minus prizes and expenses equal net government income.

## Federal Government Finances and Employment

This section presents statistics relating to the financial structure and the civilian employment of the federal government. The fiscal data cover taxes, other receipts, outlays, and debt. The principal sources of fiscal data are the *Budget of the United States Government* and related documents, published annually by the Office of Management and Budget (OMB), and the U.S. Department of the Treasury's *United States Government Annual Report* and its *Appendix*. Detailed data on tax returns and collections are published annually by the Internal Revenue Service. The personnel data relate to staffing and payrolls. They are published by the Office of Personnel Management and the Bureau of Labor Statistics. Data on federally owned land and real property are collected by the General Services Administration and presented in its annual "Federal Real Property Report."

**Budget concept**—Under the unified budget concept, all federal monies are included in one comprehensive budget. These monies comprise both federal funds and trust funds. Federal funds are derived mainly from taxes and borrowing and are not restricted by law to any specific government purpose. Trust funds, such as the Unemployment Trust Fund, collect certain taxes and other receipts for use in carrying out specific purposes or programs in accordance with the terms of the trust agreement or statute. Fund balances include both cash balances with the Treasury and investments in U.S. securities. Part of the balance is obligated, part unobligated. Prior to 1985, the budget totals, under provisions of law, excluded some federal activities—including the Federal Financing Bank, the Postal Service, the Synthetic Fuels Corporation, and the lending activities of the Rural Electrification Administration. The Balanced Budget and Emergency Deficit Control Act of 1985 (P.L. 99-177) repealed the off-budget status of these entities and placed social security (Federal Old-Age and Survivors Insurance and the federal disability insurance trust funds) off-budget. Though

social security is now off-budget and, by law, excluded from coverage of the congressional budget resolutions, it continues to be a federal program. Receipts arising from the government's sovereign powers are reported as governmental receipts and all other receipts, i.e., from business-type or market-oriented activities, are offset against outlays. Outlays are reported on a checks-issued (net) basis (i.e., outlays are recorded at the time the checks to pay bills are issued).

**Debt concept**—For most of U.S. history, the total debt consisted of debt borrowed by the Treasury (i.e., public debt). The present debt series includes both public debt and agency debt. The *gross federal debt* includes money borrowed by the Treasury and by various federal agencies; it is the broadest generally used measure of the federal debt. *Total public debt* is covered by a statutory debt limitation and includes only borrowing by the Treasury.

**Treasury receipts and outlays**—All receipts of the government, with a few exceptions, are deposited to the credit of the U.S. Treasury regardless of ultimate disposition. Under the Constitution, no money may be withdrawn from the Treasury unless appropriated by the Congress.

The day-to-day cash operations of the federal government clearing through the accounts of the U.S. Treasury are reported in the *Daily Treasury Statement*. Extensive detail on the public debt is published in the *Monthly Statement of the Public Debt of the United States*.

Budget receipts such as taxes, customs duties, and miscellaneous receipts, which are collected by government agencies, and outlays represented by checks issued and cash payments made by disbursing officers as well as government agencies are reported in the *Daily Treasury Statement of Receipts and Outlays of the United States Government* and in the Treasury's *United States Government Annual Report* and its *Appendix*. These deposits

in and payments from accounts maintained by government agencies are on the same basis as the unified budget.

The quarterly *Treasury Bulletin* contains data on fiscal operations and related Treasury activities, including financial statements of government corporations and other business-type activities.

**Income tax returns and tax collections**—Tax data are compiled by the Internal Revenue Service of the Treasury Department. The annual *Internal Revenue Service Data Book* gives a detailed account of tax collections by kind of tax. The agency's annual *Statistics of Income* reports present detailed data from individual income tax returns and corporation income tax returns. The quarterly *Statistics of Income Bulletin* presents data on such diverse subjects as tax-exempt organizations, unincorporated businesses, fiduciary income tax and estate tax returns, sales of capital assets by individuals, international income and taxes reported by corporations and individuals, and estate tax wealth.

**Employment and payrolls**—The Office of Personnel Management collects employment and payroll data from all departments and agencies of the federal government, except the Central Intelligence Agency, the National Security Agency, and the Defense Intelligence

Agency. Employment figures represent the number of persons who occupied civilian positions at the end of the report month shown and who are paid for personal services rendered for the federal government, regardless of the nature of appointment or method of payment. Federal payrolls include all payments for personal services rendered during the report month and payments for accumulated annual leave of employees who separate from the service. Since most federal employees are paid on a biweekly basis, the calendar month earnings are partially estimated on the basis of the number of work days in each month where payroll periods overlap.

Federal employment and payroll figures are published by the Office of Personnel Management in its *Federal Civilian Workforce Statistics—Employment and Trends*. It also publishes biennial employment data for minority groups, data on occupations of white- and blue-collar workers, and data on employment by geographic area; reports on salary and wage distribution of federal employees are published annually. General schedule is primarily white-collar; wage system primarily blue-collar. Data on federal employment are also issued by the Bureau of Labor Statistics in its *Monthly Labor Review* and in *Employment and Earnings* and by the U.S. Census Bureau in its annual publication *Public Employment*.

Table 469. Federal Budget Outlays by Type: 1990 to 2010

[1,253.0 represents \$1,253,000,000,000. For years ending September 30. Given the inherent imprecision in deflating outlays, the data shown in constant dollars present a reasonable perspective—not precision. The deflators and the categories that are deflated are as comparable over time as feasible. Minus sign (–) indicates offset]

**Table 475. Tax Expenditures Estimates Relating to Individual and Corporate Income Taxes by Selected Function: 2009 to 2012**

[In millions of dollars (11,930 represents \$11,930,000,000). For years ending September 30. Tax expenditures are defined as revenue losses attributable to provisions of the federal tax laws which allow a special exclusion, exemption, or deduction from gross income or which provide a special credit, a preferential rate of tax, or a deferral of liability. Minus sign (-) indicates decrease]

Function and provision	2009	2010	2011	2012
National Defense:				
Exclusion of benefits and allowances to armed forces personnel . . . . .	11,930	12,570	11,530	11,570
International affairs:				
Exclusion of income earned abroad by U.S. citizens . . . . .	5,320	5,590	5,870	6,160
Deferral of income from controlled foreign corporations (normal tax method) . . . . .	31,580	30,960	32,720	33,870
Deferred taxes for financial firms on certain income earned overseas . . . . .	5,570	5,460	5,770	5,980
General science, space, and technology:				
Expensing of research and experimentation expenditures (normal tax method) . . . . .	3,820	3,500	4,560	5,720
Credit for increasing research activities . . . . .	8,010	5,890	3,850	3,080
Energy:				
Alternative fuel production credit . . . . .	60	50	20	10
Commerce and housing:				
Financial institutions and insurance:				
Exclusion of interest on life insurance savings . . . . .	20,280	21,140	23,070	24,700
Housing:				
Deductibility of mortgage interest on owner-occupied homes . . . . .	79,400	92,180	104,540	116,620
Deductibility of state and local property tax on owner-occupied homes . . . . .	29,010	18,860	23,710	29,730
Capital gains exclusion on home sales . . . . .	23,500	23,860	31,300	39,510
Exclusion of net imputed rental income . . . . .	27,040	32,530	37,630	40,810
Exception from passive loss rules for \$25,000 of rental loss . . . . .	6,020	5,910	7,330	8,510
Credit for low-income housing investments . . . . .	3,800	5,680	6,170	6,660
Accelerated depreciation on rental housing (normal tax method) . . . . .	3,860	4,640	5,870	7,100
Commerce:				
Capital gains (except agriculture, timber, iron ore, and coal) . . . . .	52,590	45,360	44,290	41,090
Step-up basis of capital gains at death . . . . .	41,370	36,740	44,520	53,270
Accelerated depreciation of machinery and equipment (normal tax method) . . . . .	57,400	10,470	1,170	14,120
Expensing of certain small investments (normal tax method) . . . . .	-130	410	-3,200	-2,820
Graduated corporation income tax rate (normal tax method) . . . . .	2,720	2,860	3,120	3,070
Deduction for U.S. production activities . . . . .	9,020	11,530	13,640	14,420
Transportation:				
Exclusion of reimbursed employee parking expenses . . . . .	2,960	3,020	3,100	3,190
Education, training, employment, and social services:				
Education:				
HOPE tax credit . . . . .	2,920	-	840	4,250
Lifetime Learning tax credit . . . . .	3,860	2,910	3,360	4,780
Exclusion of interest on bonds for private nonprofit educational facilities . . . . .	1,780	1,610	2,220	2,720
Parental personal exemption for students age 19 years or over . . . . .	4,440	2,710	2,780	3,140
Deductibility of charitable contributions (education) . . . . .	4,170	4,290	4,940	5,370
Training, employment, and social services:				
Child credit . . . . .	25,640	23,450	18,550	10,870
Credit for child and dependent care expenses . . . . .	4,330	3,750	2,200	1,890
Deductibility of charitable contributions, other than education and health . . . . .	36,710	37,720	43,850	47,730
Health:				
Exclusion of employer contributions for medical insurance premiums <sup>1</sup> . . . . .	144,412	159,868	176,964	191,540
Self-employed medical insurance premiums . . . . .	4,870	5,250	5,740	6,150
Deductibility of medical expenses . . . . .	8,760	9,090	10,030	10,980
Exclusion of interest on hospital construction bonds . . . . .	2,690	2,440	3,350	4,110
Deductibility of charitable contributions (health) . . . . .	4,150	4,260	4,950	5,380
Income security:				
Exclusion of workers' compensation benefits . . . . .	5,810	5,870	5,940	6,070
Net exclusion of pension contributions and earnings:				
Employer plans . . . . .	40,670	41,360	44,630	47,870
401(k) plans . . . . .	44,126	53,549	67,061	70,168
Individual Retirement Accounts . . . . .	12,090	12,780	14,080	15,770
Keogh plans . . . . .	12,770	13,890	15,120	17,190
Exclusion of other employee benefits:				
Premiums on group term life insurance . . . . .	2,160	2,110	2,160	2,280
Earned income tax credit . . . . .	4,420	6,190	6,200	8,380
Social security:				
Exclusion of social security benefits:				
Social security benefits for retired workers . . . . .	20,970	21,410	20,240	21,380
Social security benefits for disabled . . . . .	6,460	6,950	7,160	7,450
Social security benefits for dependents and survivors . . . . .	3,650	3,850	3,140	3,150
Veterans' benefits and services:				
Exclusion of veterans' death benefits and disability compensation . . . . .	3,900	4,130	4,370	4,630
General purpose fiscal assistance:				
Exclusion of interest on public purpose state and local bonds . . . . .	22,990	20,810	28,660	35,130
Deductibility of nonbusiness state and local taxes other than on owner-occupied homes . . . . .	45,310	33,920	46,500	58,100
Addendum: Aid to state and local governments:				
Deductibility of:				
Property taxes on owner-occupied homes . . . . .	29,010	18,860	23,710	29,730
Nonbusiness state and local taxes other than on owner-occupied homes . . . . .	45,310	33,920	46,500	58,100
Exclusion of interest on State and local bonds for:				
Public purposes . . . . .	22,990	20,810	28,660	35,130
Private nonprofit educational facilities . . . . .	1,780	1,610	2,220	2,720
Hospital construction . . . . .	2,690	2,440	3,350	4,110

2007. ....	27,156	907,656	437,758	13.2	15,714	86,397	41,669	41.4

<sup>1</sup> Constant dollars were calculated using the U.S. Bureau of Labor Statistics consumer price index for urban consumers (CPI-U, 1982–84 = 100). See Table 724. <sup>2</sup> Capital gain distributions are included in net capital gain (less loss). For 1989–1996, and 1999 and later years, capital gain distributions from mutual funds are the sum of the amounts reported on the Form 1040 and Schedule D. For 1997 and 1998, capital gain distributions were reported entirely on the Schedule D.

NA Not available. <sup>1</sup> Includes only the portion of capital losses allowable in the calculation of adjusted gross income. Only \$3,000 of net capital loss per return (\$1,500 for married filing separately) are allowed to be included in negative total income. Any excess is carried forward to future years. <sup>2</sup> Includes farm rental net loss. <sup>3</sup> Net operating loss is a carryover of the loss from a business when taxable income from a prior year was less than zero. <sup>4</sup> Other net loss represents losses reported on Form 1040, line 21, except net operating loss and the foreign-earned income exclusion.

- Represents or rounds to zero. X Not applicable. <sup>1</sup> Consists of income tax after credits (including alternative minimum tax). <sup>2</sup> In addition to low income taxpayers, this size class (and others) includes taxpayers with "tax preferences," not reflected in adjusted gross income or taxable income which are subject to the "alternative minimum tax" (included in total income tax).

**Table 492. Federal Individual Income Tax—Tax Liability and Effective and Marginal Tax Rates for Selected Income Groups: 2000 to 2009**

[Refers to income after exclusions but before deductions for itemized or standard deductions and for personal exemptions. Tax liability is after reductions for tax credits. As a result of the tax credits, tax liability can be negative, which means that the taxpayer receives a payment from the government. The effective rate represents tax liability, which may be negative as a result of the tax credits, divided by stated income. The marginal tax rate is the percentage of the first additional dollar of income which would be paid in income tax. Tax credits which increase with income can result in negative marginal tax rates. Computations assume itemized deductions (in excess of floors) of 18 percent of adjusted gross income or the standard deduction, whichever is greater. All income is assumed to be from wages and salaries. Does not include social security and Medicare taxes imposed on most wages and salaries]

## Section 10

# National Security and Veterans Affairs

---

This section displays data for national security (national defense and homeland security) and benefits for veterans. Data are presented on national defense and its human and financial costs; active and reserve military personnel; and federally sponsored programs and benefits for veterans, and funding, budget and selected agencies for homeland security. The principal sources of these data are the annual *Selected Manpower Statistics* and the *Atlas/Data Abstract for the United States*, *Annual Report of Secretary of Veterans Affairs*, U.S. Department of Veterans Affairs (VA), *Budget in Brief*, U.S. Department of Homeland Security; and *The Budget of the United States Government*, Office of Management and Budget. For data on international expenditures and personnel, see Table 1407, Section 30.

### **Department of Defense (DoD)—**

The U.S. Department of Defense is responsible for providing the military forces of the United States. It includes the Office of the Secretary of Defense, the Joint Chiefs of Staff, the Army, the Navy, the Air Force, and the defense agencies. The President serves as Commander-in-Chief of the Armed Forces; from him, the authority flows to the Secretary of Defense and through the Joint Chiefs of Staff to the commanders of unified and specified commands (e.g., U.S. Strategic Command).

**Reserve components**—The Reserve Components of the Armed Forces consist of the Army National Guard of the United States, Army Reserve, Naval Reserve, Marine Corps Reserve, Air National Guard, Air Force Reserve, and Coast Guard Reserve. They provide trained personnel and units available for active duty in the Armed Forces during times of war or national emergency, and at such other times as national security may require. The National Guard has dual federal/state responsibilities and uses jointly provided equipment, facilities, and budget support. The President is empowered to mobilize the National Guard and to use such of the

Armed Forces as he considers necessary to enforce federal authority in any state. There is in each Armed Force a ready reserve, a standby reserve, and a retired reserve. The Ready Reserve includes the Selected Reserve, which provides trained and ready units and individuals to augment the active forces during times of war or national emergency, or at other times when required; and the Individual Ready Reserve, which is a manpower pool that can be called to active duty during times of war or national emergency and would normally be used as individual fillers for active, guard, and reserve units, and as a source of combat replacements. Most of the Ready Reserve serves in an active status. See Table 511 for Standby Reserve and Retired Reserve detail.

### **Department of Veterans Affairs**

**(VA)**—A veteran is someone 18 years and older (there are a few 17-year-old veterans) who is not currently on active duty, but who once served on active duty in the United States Army, Navy, Air Force, Marine Corps, or Coast Guard, or who served in the Merchant Marine during World War II. There are many groups whose active service makes them veterans including: those who incurred a service-connected disability during active duty for training in the Reserves or National Guard, even though that service would not otherwise have counted for veteran status; members of a national guard or reserve component who have been ordered to active duty by order of the President or who have a full-time military job. The latter are called AGRs (Active Guard and Reserve). No one who has received a dishonorable discharge is a veteran.

The VA administers laws authorizing benefits for eligible former and present members of the Armed Forces and for the beneficiaries of deceased members. Veterans' benefits available under various acts of Congress include compensation for service-connected disability or death; pensions for non-service-connected disability

or death; vocational rehabilitation, education and training; home loan insurance; life insurance; health care; special housing and automobiles or other conveyances for certain disabled veterans; burial and plot allowances; and educational assistance to families of deceased or totally disabled veterans, servicemen missing in action, or prisoners of war. Since these benefits are legislated by Congress, the dates they were enacted and the dates they apply to veterans may be different from the actual dates the conflicts occurred. VA estimates of veterans cover all persons discharged from active U.S. military service under conditions other than dishonorable.

**Department of Homeland Security (DHS)**—The creation of DHS, which began operations in March 2003, represents a fusion of 22 federal agencies (legacy agencies, Coast Guard and Secret Service remained intact) to coordinate and centralize the leadership of many homeland security activities under a single department. The largest organizations under DHS include: Customs and Border Protection (CBP), Immigration and Customs Enforcement (ICE), Transportation Security Administration (TSA), Federal Emergency Management Agency (FEMA), and the Coast Guard.

**Coast Guard**—With more than 218 years of service to the Nation, the Coast Guard is a military, multi-mission, maritime organization that promotes safety and safeguards U.S. economic and security interests throughout the maritime environment. As one of the five Armed Services of the United States, it is the only military organization within the DHS. Unlike its sister services in the Department of Defense (DoD), the Coast Guard is also a law enforcement and regulatory agency with broad domestic authorities.

**Federal Emergency Management Agency (FEMA)**—FEMA manages and coordinates the federal response to and recovery from major domestic disasters and emergencies of all types in accordance with the Robert T. Stafford Disaster Relief and Emergency Assistance Act. The agency ensures the effectiveness of emergency response providers at all levels of government in responding to terrorist

attacks, major disasters, and other emergencies. Through the Disaster Relief Fund, FEMA provides individual and public assistance to help families and communities impacted by declared disasters rebuild and recover. FEMA is also the principal component for preparing state and local governments to prevent or respond to threats or incidents of terrorism and other catastrophic events, through their state and local programs.

The Customs and Border Protection (CBP) is responsible for managing, securing, and controlling U.S. borders. This includes carrying out traditional border-related responsibilities, such as stemming the tide of illegal drugs and illegal aliens; securing and facilitating legitimate global trade and travel; and protecting the food supply and agriculture industry from pests and disease. CBP is composed of the Border Patrol and Inspections (both moved from INS) along with Customs (absorbed from the U.S. Department of Treasury) and Animal and Plant Health Inspections Services (absorbed from the U.S. Department of Agriculture).

The Immigration and Customs Enforcement (ICE) mission is to protect America and uphold public safety by targeting the people, money, and materials crossing the nation's borders that support terrorist and criminal activities. ICE is the largest investigation arm of DHS. ICE is composed of five law enforcement divisions: Investigations, Intelligence, Federal Protective Service, International Affairs, and Detention and Removal Operations. ICE investigates a wide range of national security, financial and smuggling violations including drug smuggling, human trafficking, illegal arms exports, financial crimes, commercial fraud, human smuggling, document fraud, money laundering, child pornography/exploitation, and immigration fraud.

The Transportation Security Administration (TSA) was created as part of the Aviation and Transportation Security Act on November 19, 2001. TSA was originally part of the U.S. Department of Transportation, but was moved to DHS. TSA's mission is to provide security to our nation's transportation systems with a primary focus on aviation security.

Table 504. Department of Defense Payroll and Contract Awards—States: 2008

[In millions of dollars (146,781 represents \$146,781,000,000). For year ending September 30. Payroll outlays include the gross earnings of civilian, active duty military personnel, reserve and national guard, and retired military for services rendered to the government and for cash allowances for benefits. Excludes employer's share of employee benefits, accrued military retirement benefits and most permanent change of station costs. Contracts refer to awards made in year specified; expenditures relating to awards may extend over several years. Military awards for supplies, services, and construction. Net value of contracts of over \$25,000 for work in each state and DC. Figures reflect impact of prime contracting on state distribution of defense work. The state in which a prime contractor is located is not often the state where the subcontracted work is done. Undistributed civilians and military personnel, their payrolls, and prime contract awards for performance in classified locations are excluded]

Table 510. Military Retirement System: 2009

[Payment in millions of dollars (3,849 represents \$3,849,000,000). As of September 30. The data published in this report are produced from the files maintained by the Defense Manpower Data Center (DMDC). This report compiles data primarily from the "Retiree Pay and Survivor Pay" files. Any grouping of members by address reflects mailing, not necessarily residence address. Only those members in plans administered by the Department of Defense (DoD) are included in this table. The data are preliminary because of reporting delays due to the information about many members who retired or died within one month of the September 30 reporting date. These data were not processed in time to be included in this report. For more information, please see *Introduction and Overview* at <<http://www.defenselink.mil/actuary/statbook2009.pdf>>]

<sup>1</sup> Represents military personnel (officers and enlisted) receiving and not receiving pay from DoD. <sup>2</sup> A disabled military member is entitled to disability retired pay if the disability is not the result of the member's intentional misconduct or willful neglect, was not incurred during a period of unauthorized absence, and either: (1) the member has at least 20 years of service; or (2) at the time of determination, the disability is at least 30 percent (under a standard schedule of rating disabilities by the Veterans Administration) and one of three additional conditions are met. For the continuation of this footnote, see U.S. Census Bureau, Statistical Abstract, National Security and Veterans Affairs, Military Personnel and Expenditures, Military Retirement System, <<http://www.census.gov/compendia/statab/>>. <sup>3</sup> Includes states, U.S. territories, and retirees living in foreign countries.

Table 511. Military Reserve Personnel: 1995 to 2009

[As of September 30. The Ready Reserve data include the Selected Reserve which is scheduled to augment active forces during times of war or national emergency, and the Individual Ready Reserve, which, during times of war or national emergency, would be used to fill out Active, Guard, and Reserve units, and which would also be a source for casualty replacements. Ready Reservists serve in an active status (except for the Inactive National Guard—a very small pool within the Army National Guard). The Standby Reserve cannot be called to active duty, other than for training, unless authorized by Congress under “full mobilization,” and a determination is made that there are not enough qualified members in the Ready Reserve in the required categories who are readily available. The Retired Reserve represents a lower potential for involuntary mobilization]

Reserve status and branch of service	1995	2000	2005	2006	2007	2008	2009
<b>Total reserves</b> <sup>1</sup>	<b>1,674,164</b>	<b>1,276,843</b>	<b>1,136,200</b>	<b>1,119,902</b>	<b>1,109,805</b>	<b>1,099,915</b>	<b>1,094,071</b>

Air Force	137,501	154,833	174,326	178,171	182,102	186,435	189,217

<sup>1</sup> Less retired reserves. <sup>2</sup> Includes Army National Guard. <sup>3</sup> Includes Air National Guard. <sup>4</sup> The Army for FY2007 and the Navy for FY2009 did a “scrub” of their Individual Ready Reserve (IRR) category and dropped personnel awaiting retirement or discharge into the Standby Reserve. This action was done in order to give them a better perspective on actual IRR members cleared for mobilization, if required.

<sup>1</sup> The federal spending estimates are for the Executive Branch's homeland security efforts. These estimates do not include the efforts of the Legislative or Judicial Branches. <sup>2</sup> The Department of Homeland Security Appropriations Act, 2004, provided \$5.6 billion for Project BioShield, to remain available through 2013. Including this uneven funding stream can distort year-over-year comparisons. <sup>3</sup> Not all activities carried out by DHS constitute homeland security funding (e.g. response to natural disasters and Coast Guard search and rescue activities). DHS estimates in this table do not represent the entire DHS budget. See Table 524.

— Represents zero. <sup>1</sup> Between 2005 and 2008, the percentage of persons apprehended who were from Honduras, El Salvador, and Brazil declined substantially. These decreases reflect the end of "catch and release," the practice of apprehending illegal aliens from countries other than Mexico and releasing them on their own recognizance pending a removal hearing.

NA Not available. <sup>1</sup> Returns are the confirmed movement of an inadmissible or deportable alien out of the United States not based on an order of removal. Most of the voluntary departures are of Mexican nationals who have been apprehended by the U.S. Border Patrol and are returned to Mexico. <sup>2</sup> Removals are the compulsory and confirmed movement of an inadmissible or deportable alien out of the United States based on an order of removal. An alien who is removed has administrative or criminal consequences placed on subsequent reentry owing to the fact of the removal. <sup>3</sup> Refers to persons removed based on a criminal charge or those with a criminal conviction.

## Social Insurance and Human Services

This section presents data related to governmental expenditures for social insurance and human services; governmental programs for Old-Age, Survivors, Disability, and Health Insurance (OASDHI); governmental employee retirement; private pension plans; government unemployment and temporary disability insurance; federal supplemental security income payments and aid to the needy; child and other welfare services; and federal food programs. Also included here are selected data on workers' compensation and vocational rehabilitation, child support, child care, charity contributions, and philanthropic trusts and foundations.

The principal source for these data is the Social Security Administration's *Annual Statistical Supplement to the Social Security Bulletin* which presents current data on many of the programs.

### **Social insurance under the Social Security Act—**

Programs established by the Social Security Act provide protection against wage loss resulting from retirement, prolonged disability, death, or unemployment, and protection against the cost of medical care during old age and disability. The federal OASDI program provides monthly benefits to retired or disabled insured workers and their dependents and to survivors of insured workers. To be eligible, a worker must have had a specified period of employment in which OASDI taxes were paid. The age of eligibility for full retirement benefits had been 65 years old for many years. However, for persons born in 1938 or later that age gradually increases until it reaches age 67 for those born after 1959. Reduced benefits may be obtained as early as age 62. The worker's spouse is under the same limitations. Survivor benefits are payable to dependents of deceased insured workers. Disability benefits are payable to an insured worker under full retirement age with a prolonged disability and to the disabled worker's dependents on the

same basis as dependents of retired workers. Disability benefits are provided at age 50 to the disabled widow or widower of a deceased worker who was fully insured at the time of death. Disabled children, aged 18 or older, of retired, disabled, or deceased workers are also eligible for benefits. A lump sum benefit is generally payable on the death of an insured worker to a spouse or minor children. For information on the Medicare program, see Section 3, Health and Nutrition.

Retirement, survivors, disability, and hospital insurance benefits are funded by a payroll tax on annual earnings (up to a maximum of earnings set by law) of workers, employers, and the self-employed. The maximum taxable earnings are adjusted annually to reflect increasing wage levels (see Table 542). Effective January 1994, there is no dollar limit on wages and self-employment income subject to the hospital insurance tax. Tax receipts and benefit payments are administered through federal trust funds. Special benefits for uninsured persons; hospital benefits for persons aged 65 and over with specified amounts of social security coverage less than that required for cash benefit eligibility; and that part of the cost of supplementary medical insurance not financed by contributions from participants are financed from federal general revenues.

Unemployment insurance is presently administered by the U.S. Employment and Training Administration and each state's employment security agency. By agreement with the U.S. Secretary of Labor, state agencies also administer unemployment compensation for eligible ex-military personnel and federal employees. Under state unemployment insurance laws, benefits related to the individual's past earnings are paid to unemployed eligible workers. State laws vary concerning the length of time benefits are paid and their amount. In most states, benefits are payable for 26 weeks

and, during periods of high unemployment, extended benefits are payable under a federal-state program to those who have exhausted their regular state benefits. Some states also supplement the basic benefit with allowances for dependents.

Unemployment insurance is funded by a federal unemployment tax levied on the taxable payrolls of most employers. Taxable payroll under the federal act and 12 state laws is the first \$7,000 in wages paid each worker during a year. Forty-one states have taxable payrolls above \$7,000. Employers are allowed a percentage credit of taxable payroll for contributions paid to states under state unemployment insurance laws. The remaining percent of the federal tax finances administrative costs, the federal share of extended benefits, and advances to states. About 97 percent of wage and salary workers are covered by unemployment insurance.

#### **Retirement programs for government employees—**

The Civil Service Retirement System (CSRS) and the Federal Employees' Retirement System (FERS) are the two major programs providing age and service, disability, and survivor annuities for federal civilian employees. In general, employees hired after December 31, 1983, are covered under FERS and the social security program (OASDHI), and employees on staff prior to that date are members of CSRS and are covered under Medicare. CSRS employees were offered the option of transferring to FERS during 1987 and 1998. There are separate retirement systems for the uniformed services (supplementing OASDHI) and for certain special groups of federal employees. State and local government employees are covered for the most part by state and local retirement systems similar to the federal programs. In many jurisdictions these benefits supplement OASDHI coverage.

#### **Workers' compensation—**

All states provide protection against work-connected injuries and deaths, although some states exclude certain workers (e.g., domestic workers). Federal laws cover federal employees,

private employees in the District of Columbia, and longshoremen and harbor workers. In addition, the Department of Labor administers "black lung" benefits programs for coal miners disabled by pneumoconiosis and for specified dependents and survivors. Specified occupational diseases are compensable to some extent. In most states, benefits are related to the worker's salary. The benefits may or may not be augmented by dependents' allowances or automatically adjusted to prevailing wage levels.

#### **Income support—**

Income support programs are designed to provide benefits for persons with limited income and resources. The Supplemental Security Income (SSI) program and Temporary Assistance for Needy Families (TANF) program are the major programs providing monthly payments. In addition, a number of programs provide money payments or in-kind benefits for special needs or purposes. Several programs offer food and nutritional services. Also, various federal-state programs provide energy assistance, public housing, and subsidized housing to individuals and families with low incomes. General assistance may also be available at the state or local level.

The SSI program, administered by the Social Security Administration, provides income support to persons aged 65 or older and blind or disabled adults and children. Eligibility requirements and federal payment standards are nationally uniform. Most states supplement the basic SSI payment for all or selected categories of persons.

The Personal Responsibility and Work Opportunity Reconciliation Act of 1996 contained provisions that replaced the Aid to Families With Dependent Children (AFDC), Job Opportunities and Basic Skills (JOBS), and Emergency Assistance programs with the Temporary Assistance for Needy Families block grant program. This law contains strong work requirements, comprehensive child support enforcement, support for families moving from welfare to work, and other features. The TANF became effective as soon as each state submitted a complete plan implementing TANF, but no later than

July 1, 1997. The AFDC program provided cash assistance based on need, income, resources, and family size.

#### **Federal food stamp program—**

Under the food stamp program, single persons and those living in households meeting nationwide standards for income and assets may receive coupons redeemable for food at most retail food stores or provides benefits through electronic benefit transfer. The monthly amount of benefits or allotments a unit receives is determined by household size and income. Households without income receive the determined monthly cost of a nutritionally adequate diet for their household size. This amount is updated to account for food price increases. Households with income receive the difference between the amount of a nutritionally adequate diet and 30 percent of their income, after certain allowable deductions.

To qualify for the program, a household must have less than \$2,000 in disposable assets (\$3,000 if one member is aged 60 or older), gross income below 130 percent of the official poverty guidelines for the household size, and net income below 100 percent of the poverty guidelines. Households with a person aged 60 or older or a disabled person receiving SSI, social security, state general assistance, or veterans' disability benefits may have gross income exceeding 130 percent of the poverty guidelines. All households in which all members receive TANF or SSI are categorically eligible for food stamps without meeting these income or resource criteria. Households are certified for

varying lengths of time, depending on their income sources and individual circumstances.

#### **Health and welfare services—**

Programs providing health and welfare services are aided through federal grants to states for child welfare services, vocational rehabilitation, activities for the aged, maternal and child health services, maternity and infant care projects, comprehensive health services, and a variety of public health activities. For information about the Medicaid program, see Section 3, Health and Nutrition.

#### **Noncash benefits—**

The U.S. Census Bureau annually collects data on the characteristics of recipients of noncash (in-kind) benefits to supplement the collection of annual money income data in the Current Population Survey (see text, Section 1, Population, and Section 13, Income, Expenditures, Poverty, and Wealth). Noncash benefits are those benefits received in a form other than money which serve to enhance or improve the economic well-being of the recipient. As for money income, the data for noncash benefits are for the calendar year prior to the date of the interview. The major categories of noncash benefits covered are public transfers (e.g., food stamps, school lunch, public housing, and Medicaid) and employer or union-provided benefits to employees.

#### **Statistical reliability—**

For discussion of statistical collection, estimation, and sampling procedures and measures of statistical reliability applicable to HHS and Census Bureau data, see Appendix III.

Other payments to individuals <sup>10</sup> .....	1,742	2,043	7,290	4,504	2,678	2,180	33,477

<sup>1</sup> Consists largely of temporary disability payments, pension benefit guaranty payments, and black lung payments. <sup>2</sup> Consists of medicare and other medical vendor payments. <sup>3</sup> Consists of payments made under the TriCare Management Program (formerly called CHAMPUS) for the medical care of dependents of active duty military personnel and of retired military personnel and their dependents at nonmilitary medical facilities. <sup>4</sup> Through 1990, consists of emergency assistance and aid to families with dependent children. Beginning with 2000, consists of benefits—generally known as temporary assistance for needy families—provided under the Personal Responsibility and Work Opportunity Reconciliation Act of 1996. <sup>5</sup> Consists largely of general assistance, expenditures for food under the supplemental program for women, infants, and children; refugee assistance; foster home care and adoption assistance; earned income tax credits; and energy assistance. <sup>6</sup> Consists of trade readjustment allowance payments, Redwood Park benefit payments, public service employment benefit payments, and transitional benefit payments. <sup>7</sup> Consists largely of veterans' readjustment benefit payments, educational assistance to spouses and children of disabled or deceased veterans, payments to paraplegics, and payments for autos and conveyances for disabled veterans. <sup>8</sup> Consists largely of state and local government payments to veterans. <sup>9</sup> Excludes veterans. Consists largely of federal fellowship payments (National Science Foundation fellowships and traineeships, subsistence payments to state maritime academy cadets, and other federal fellowships), interest subsidy on higher education loans, basic educational opportunity grants, and Job Corps payments. <sup>10</sup> Consists largely of Bureau of Indian Affairs payments, education exchange payments, Alaska Permanent Fund dividend payments, compensation of survivors of public safety officers, compensation of victims of crime, disaster relief payments, compensation for Japanese internment, and other special payments to individuals.

— Represents or rounds to zero. <sup>1</sup> Beginning with the 2003 CPS, respondents could choose one or more races. For example, "White" refers to people who reported White and did not report any other race category. The use of this single-race population does not imply that it is the preferred method of presenting or analyzing data. Information on people who reported more than one race, such as "Asian and Black or African American," is available from Census 2000 through American FactFinder. <sup>2</sup> "Black" refers to people who reported Black and did not report any other race category. <sup>3</sup> Persons of Hispanic origin may be of any race. <sup>4</sup> TANF—Temporary Assistance for Needy Families program; AFDC—Aid to Families with Dependent Children program. <sup>5</sup> Includes estates and trusts reported as survivor benefits.

Source: U.S. Census Bureau: "Table PINC-09. Source of Income in 2008—Number With Income and Mean Income of Specified Type in 2008 of People 15 Years Old and Over, by Race, Hispanic Origin and Sex" (published October 2009), <[http://www.census.gov/hhes/www/cpstables/032009/perinc/new09\\_000.htm](http://www.census.gov/hhes/www/cpstables/032009/perinc/new09_000.htm)>.

**Table 541. Persons Living in Households Receiving Selected Noncash Benefits: 2008**

[In thousands (301,041 represents 301,041,000), except percent. Persons, as of March 2009, who lived with someone (a nonrelative or a relative) who received aid. Not every person tallied here received the aid themselves. Persons living in households receiving more than one type of aid are counted only once. Excludes members of the Armed Forces except those living off post or with their families on post. Population controls for 2008 based on Census 2000 and an expanded sample of households. Based on Current Population Survey; see text, Section 1 and Appendix III]

Age, sex, and race	Total	In household that received means-tested assistance <sup>1</sup>		In household that received means-tested cash assistance		In household that received food stamps		In household in which one or more persons were covered by Medicaid		Lived in public or authorized housing

**Table 550. Private Pension Plans—Summary by Type of Plan: 1990 to 2007**

[712.3 represents 712,300. "Pension plan" is defined by the Employee Retirement Income Security Act (ERISA) as "any plan, fund, or program which was heretofore or is hereafter established or maintained by an employer or an employee organization, or by both, to the extent that such plan (a) provides retirement income to employees, or (b) results in a deferral of income by employees for periods extending to the termination of covered employment or beyond, regardless of the method of calculating the contributions made to the plan, the method of calculating the benefits under the plan, or the method of distributing benefits from the plan." A **defined benefit** plan provides a definite benefit formula for calculating benefit amounts—such as a flat amount per year of service or a percentage of salary times years of service. A **defined contribution** plan is a pension plan in which the contributions are made to an individual account for each employee. The retirement benefit is dependent upon the account balance at retirement. The balance depends upon amounts contributed, investment experience, and, in the case of profit sharing plans, amounts which may be allocated to the account due to forfeitures by terminating employees. Employee Stock Ownership Plans (ESOP) and 401(k) plans are included among defined contribution plans. Data are based on Form 5500 series reports filed with the U.S. Department of Labor and exclude (1) most pension plans qualified under sections 403(b), 457(b) and 457(f) of the Internal Revenue Code, (2) most SARSEP, SEP and SIMPLE IRA plans, (3) unfunded excess benefit plans, (4) most church plans, (5) top hat plans, (6) individual retirement accounts, and (7) governmental plans]

<sup>1</sup> Excludes all plans covering only one participant. <sup>2</sup> Includes active, retired, and separated vested participants not yet in pay status. Also includes double counting of workers in more than one plan. <sup>3</sup> Includes any workers currently in employment covered by a plan and who are earning or retaining credited service under a plan. Also includes any nonvested former employees who have not yet incurred breaks in service. <sup>4</sup> Asset amounts shown exclude funds held by life insurance companies under allocated group insurance contracts for payment of retirement benefits. These excluded funds make up roughly 10 to 15 percent of total private fund assets. <sup>5</sup> Includes both employer and employee contributions. <sup>6</sup> Includes benefits paid directly from trust and premium payments made from plans to insurance carriers. Excludes benefits paid directly by insurance carriers.

55 to 64 years old	21.8	22.3	21.3	20.5	33.4	23.9
Percent of work disabled—						
Receiving social security income	35.5	36.0	35.0	36.7	31.7	26.7
Receiving food stamps	19.3	15.0	23.3	16.6	29.5	22.6
Covered by Medicaid	65.4	68.9	62.0	67.8	60.7	56.6
Residing in public housing	5.9	4.7	7.1	4.4	11.1	7.5
Residing in subsidized housing	3.4	2.3	4.4	2.7	6.1	4.4

<sup>1</sup> Includes other races, not shown separately. <sup>2</sup> Beginning with the 2003 Current Population Survey asked respondents to choose one or more races. White alone refers to people who reported White and did not report any other race category. The use of this single-race population does not imply reported more than one race, such as "White and American Indian and Alaska Native" or "Asian and Black or African American," is available from Census 2000 through American FactFinder. About 2.6 percent of people reported more than one race in 2000. <sup>3</sup> Black alone refers to people who reported Black and did not report any other race category. <sup>4</sup> Hispanic persons may be of any race.

**Table 560. Workers' Compensation Payments by State: 2000 to 2007**

[In millions of dollars (47,699 represents \$47,699,000,000). Calendar-year data. Payments represent compensation and medical benefits and include insurance losses paid by private insurance carriers (compiled from state workers' compensation agencies and A.M. Best Co.); disbursements of state funds (compiled from the A.M. Best Co. and state workers' compensation agencies); and self-insurance payments (compiled from state workers' compensation agencies and authors' estimates)]

**Table 567. Child Support Enforcement Program—Caseload and Collections: 1990 to 2009**

[For years ending September 30 (12,796 represents 12,796,000). Includes Puerto Rico, Guam, and the Virgin Islands. The child support enforcement program locates absent parents, establishes paternity of children born out of wedlock, and establishes and enforces support orders. By law, these services are available to all families that need them. The program is operated at the state and local government level, but 66 percent of administrative costs are paid by the federal government. Child support (CS) collected for families not receiving Temporary Assistance for Needy Families (TANF) goes to the family to help it remain self-sufficient. Most of the child support collected on behalf of TANF families goes to federal and state governments to offset TANF payments. Some states pass-through a portion of the CS collections to help families become self-sufficient. Based on data reported by state agencies. Minus sign (–) indicates net outlay]

2006.....	11,315	52.2	17.9	23.1	25,595	49.2 8.7
2007.....	11,563	51.3	17.9	23.9	25,926	49.1 8.7
2008.....	12,465	50.9	18.5	22.6	27,791	48.6 9.1

<sup>1</sup> Total does not include those who are ineligible or those receiving disaster benefits. <sup>2</sup> Persons 60 years old and over. <sup>3</sup> The substantial increase in 1995 and decrease in 2003 are due in part to the changes in definition of a disabled household. Prior to 1995, disabled households were defined as households with SSI income but no members over age 59. In 1995, that definition changed to households with at least one member under 65 who received SSI, or at least one member aged 18–61 who received Social Security, veterans' benefits, or other government benefits as a result of a disability. Because of changes to the QC data in 2003, the definition of a disabled household changed to households either SSI income or a medical expense deduction and without an elderly person, and households containing a nonelderly adult who does not appear to be working and who is receiving Social Security, veterans' benefits, or workers' compensation.

**Table 573. Number of Emergency and Transitional Beds in Homeless Assistance Systems Nationwide: 2008**

[Data include beds located in Puerto Rico, Guam, and the Virgin Islands. Data are based on a nationally representative sample of 80 jurisdictions that collect data from emergency shelters and transitional providers. The data estimate homeless persons who used emergency shelters or transitional housing from January 1 through June 30, 2008. As a compliment to the survey, a "Continuum of Care" community was derived from each jurisdiction in order to estimate the number of unsheltered homeless persons and the number of emergency shelter and transitional housing beds available on a single night in January 2008. The data do not include homeless individuals living outside a sampled jurisdiction or homeless individuals not using an emergency shelter or a transitional housing program. For more information on data collection and methodology, see Appendix B of source]

Homeless programs	Year-round units/beds <sup>1</sup>			Total year-round beds	Other beds	
	Family units	Family beds	Individual beds		Seasonal beds <sup>2</sup>	Overflow/voucher <sup>3</sup>
Emergency shelters . . . . .	30,117	98,703	112,519	211,222	20,413	37,141
Transitional housing . . . . .	35,470	110,973	94,089	205,062	(NA)	(NA)
Total inventory . . . . .	65,587	209,676	206,608	416,284	20,413	37,141
Permanent supportive housing . . . . .	26,729	76,581	119,143	195,224	(NA)	(NA)

NA Not available. <sup>1</sup> Year-round beds are available for use throughout the year and are considered part of the stable inventory of beds for homeless persons. <sup>2</sup> Seasonal beds are typically available during particularly high-demand seasons of the year (e.g. winter months in the North or summer months in the South) to accommodate increased need for emergency shelters to prevent illness or death due to the weather. <sup>3</sup> Overflow beds are typically used during unanticipated emergencies (e.g., precipitous temperature drops or a natural disaster that displaces residents). Voucher beds are made available in a hotel or motel, and often function like overflow beds.

<sup>1</sup> The sum for the states does not add to the total because other components are not shown in this table. <sup>2</sup> U.S. totals do not agree with Table 487 in Section 9 because this table also includes (1) "substitutes for returns," whereby the IRS constructs returns for certain nonfilers on the basis of available information and imposes and income tax on the resulting estimate of the tax base and (2) returns of nonresident or departing aliens. In addition, in this table, income tax includes the alternative minimum tax, but differs from total income tax in Table 487 in that it is after subtraction of all tax credits except a portion of the earned income credit.

## Section 12

# Labor Force, Employment, and Earnings

---

This section presents statistics on the labor force; its distribution by occupation and industry affiliation; and the supply of, demand for, and conditions of labor. The chief source of these data is the Current Population Survey (CPS) conducted by the U.S. Census Bureau for the Bureau of Labor Statistics (BLS). Comprehensive historical and current data are available from the BLS Internet site at <<http://www.bls.gov/cps/>>. These data are published on a current basis in the BLS monthly publication *Employment and Earnings Online*. Detailed data on the labor force are also available from the Census Bureau's decennial census of population.

**Types of data**—Most statistics in this section are obtained by two methods: household interviews or questionnaires and reports of establishment payroll records. Each method provides data that the other cannot suitably supply. Population characteristics, for example, are readily obtainable only from the household survey, while detailed industrial classifications can be readily derived only from establishment records.

Household data are obtained from a monthly sample survey of the population. The CPS is used to gather data for the calendar week including the 12th of the month and provides current comprehensive data on the labor force (see text, Section 1, Population). The CPS provides information on the work status of the population without duplication since each person is classified as employed, unemployed, or not in the labor force. Employed persons holding more than one job are counted only once, according to the job at which they worked the most hours during the survey week.

Monthly, quarterly, and annual data from the CPS are published by the BLS in *Employment and Earnings Online*. Data presented include national totals of the number of persons in the civilian labor force by sex, disability status, race, Hispanic origin, and age; the number

employed; hours of work; industry and occupational groups; usual weekly earnings; and the number unemployed, reasons for, and duration of unemployment. Annual data shown in this section are averages of monthly figures for each calendar year, unless otherwise specified. Historical national CPS data are available at <<http://www.bls.gov/cps/>>.

The CPS also produces annual estimates of employment and unemployment for each state, 50 large metropolitan statistical areas, and selected cities. These estimates are published by the BLS in its annual *Geographic Profile of Employment and Unemployment* available at <<http://www.bls.gov/gps/>>. More detailed geographic data (e.g., for counties and cities) are provided by the decennial population censuses.

Data based on establishment records are compiled by the BLS and cooperating state agencies as part of an ongoing Current Employment Statistics program. The BLS collects survey data monthly from a probability-based sample of nonfarm, business establishments through electronic data interchange, touchtone data entry, and computer-assisted telephone interviews, Internet, other electronic media, fax, or mail. CES data are adjusted annually to data from government unemployment insurance administrative records, which are supplemented by data from other government agencies. The estimates exclude self-employed persons, private household workers, unpaid family workers, agricultural workers, and members of the Armed Forces. In March 2009, reporting establishments employed 2.9 million manufacturing workers (24 percent of the total manufacturing employment at the time), 20.1 million workers in private nonmanufacturing industries (20.9 percent of the total in private nonmanufacturing), and 15.5 million federal, state, and local government employees (67 percent of total government).

The establishment survey counts workers each time they appear on a payroll during the reference period (the payroll period that includes the 12th of the month). Thus, unlike the CPS, a person with two jobs is counted twice. The establishment survey is designed to provide estimates of nonfarm wage and salary employment, average weekly hours, and average hourly and weekly earnings by detailed industry for the nation, states, and selected metropolitan areas. Establishment survey data also are published in *Employment and Earnings Online*. Historical national data are available at <<http://www.bls.gov/ces/>>. Historical data for states and metropolitan areas are available at <<http://www.bls.gov/sae/>>.

CES estimates are currently classified by the 2007 North American Industry Classification System (NAICS). All published series for the nation have a NAICS-based history extending back to at least 1990. Employment series for total nonfarm and other high-level aggregates start in 1939.

In June 2003, the BLS completed a comprehensive sample redesign of the establishment survey begun in June 2000, changing from a quota-based sample to a probability-based sample. Also in June 2003, all establishment survey employment, hours, and earnings series were converted from being classified by the 1987 Standard Industrial Classification (SIC) system to being classified by the 2002 North American Industry Classification System (NAICS). The NAICS conversion resulted in major definitional changes to many of the previously published SIC-based series. All establishment survey historical time series were reconstructed as part of the NAICS conversion process and all published series have a NAICS-based history extending back to at least 1990. For total nonfarm industries and other high-level aggregates, NAICS history was reconstructed back to the previously existing start date for the series, 1939 in most cases. More information on the sample redesign, the conversion to NAICS, and other changes to the establishment survey implemented in June 2003 appears in "Revisions to the Current Employment Statistics National Estimates Effective May

2003" in the June 2003 issue of *Employment and Earnings*, as well as the Establishment Data portion of the Explanatory Notes and Estimates of Error section of *Employment and Earnings Online*.

The completion of the sample redesign and the conversion to NAICS for state and metropolitan area establishment survey data were implemented in March 2003 with the release of January 2003 estimates. For a discussion of the changes to the state and area establishment survey data, see "Revisions to the Current Employment Statistics State and Area Estimates Effective January 2003" in the March 2003 issue of *Employment and Earnings Online*.

**Labor force**—According to the CPS definitions, the civilian labor force comprises all civilians in the noninstitutionalized population 16 years and over classified as "employed" or "unemployed" according to the following criteria: Employed civilians comprise (a) all civilians, who, during the reference week, did any work for pay or profit (minimum of an hour's work) or worked 15 hours or more as unpaid workers in a family enterprise and (b) all civilians who were not working but who had jobs or businesses from which they were temporarily absent for noneconomic reasons (illness, weather conditions, vacation, labor-management dispute, etc.) whether they were paid for the time off or were seeking other jobs. Unemployed persons comprise all civilians who had no employment during the reference week, who made specific efforts to find a job within the previous 4 weeks (such as applying directly to an employer or to a public employment service or checking with friends) and who were available for work during that week, except for temporary illness. Persons on layoff from a job and expecting recall also are classified as unemployed. All other civilian persons, 16 years old and over, are classified as "not in the labor force."

Various breaks in the CPS data series have occurred over time due to the introduction of population adjustments and other changes. For details on these breaks in series and the effect that they had on the CPS data, see the BLS Web site at

<[www.bls.gov/cps/documentation.htm#concepts](http://www.bls.gov/cps/documentation.htm#concepts)>.

Beginning in January 2009, the CPS data reflect the introduction of revised population controls. The effect of the revised population controls on the monthly CPS estimates was to decrease the December 2008 employment level by 407,000 and the civilian noninstitutional population by 483,000. The updated controls had little or no effect on unemployment rates and other ratios. For additional information on the effects of the revised population controls on estimates from the CPS, see <[www.bls.gov/cps/documentation.htm#pop](http://www.bls.gov/cps/documentation.htm#pop)>.

**Hours and earnings**—Average hourly earnings, based on establishment data, are gross earnings (i.e., earnings before payroll deductions) and include overtime premiums; they exclude irregular bonuses and value of payments in kind. Hours are those for which pay was received. Wages and salaries from the CPS consist of total monies received for work performed by an employee during the income year. It includes wages, salaries, commissions, tips, piece-rate payments, and cash bonuses earned before deductions were made for taxes, bonds, union dues, etc. Persons who worked 35 hours or more are classified as working full-time.

**Industry and occupational groups**—Industry data derived from the CPS for 1983–91 utilize the 1980 census industrial classification developed from the 1972 SIC. CPS data from 1971 to 1982 were based on the 1970 census classification system, which was developed from the 1967 SIC. Most of the industry categories were not affected by the change in classification.

The occupational classification system used in the 1980 census and in the CPS for 1983–91, evolved from the 1980 Standard Occupational Classification (SOC) system, first introduced in 1977. Occupational categories used in the 1980 census classification system are so radically different from the 1970 census system used in the CPS through 1982, that their implementation represented a break in historical data series.

Beginning in January 1992, the occupational and industrial classification systems used in the 1990 census were introduced into the CPS. (These systems were largely based on the 1980 SOC and the 1987 SIC systems, respectively.)

Beginning in 2003, the 2002 Census Bureau occupational and industrial classification systems were introduced into the CPS. These systems were derived from the 2000 SOC and the 2002 NAICS. The composition of detailed occupational and industrial classifications in the new classification systems was substantially changed from the previous systems in use, as was the structure for aggregating them into broad groups. Consequently, the use of the new classification systems created breaks in existing data series at all levels of aggregation. CPS data using the new classification systems are available beginning 2000. Additional information on the 2002 Census Bureau occupational and industrial classifications systems and details on the changes over time appear on the BLS Web site at <[www.bls.gov/cps/documentation.htm#oi](http://www.bls.gov/cps/documentation.htm#oi)>. Establishments responding to the establishment survey are classified according to the 2007 NAICS. Previously they were classified according to the SIC manual. See text, Section 15, Business Enterprise, for information about the SIC manual and NAICS.

**Productivity**—BLS publishes data on productivity as measured by output per hour (labor productivity), output per combined unit of labor and capital input (multifactor productivity), and, for industry groups and industries, output per combined unit of capital, labor, energy, materials, and purchased service inputs. Labor productivity and related indexes are published for the business sector as a whole and its major subsectors: nonfarm business, manufacturing, and nonfinancial corporations, and for over 200 detailed industries. Productivity indexes that take into account capital, labor, energy, materials, and service inputs are published for 18 major manufacturing industry groups, 86 detailed manufacturing industries, utility services, and air and railroad transportation. The major sector data are published in the BLS quarterly news release *Productivity and Costs* and

in the annual *Multifactor Productivity Trends* release. Industry productivity measures are updated and published annually in the news releases *Productivity and Costs by Industry* and *Multifactor Productivity Trends by Industry*. The latest data are available at the Labor Productivity and Costs Web site at <http://www.bls.gov/lpc/> and the Multifactor Productivity Web site at <http://www.bls.gov/mfp/>. Detailed information on methods, limitations, and data sources appears in the BLS *Handbook of Methods*, BLS Bulletin 2490 (1997), Chapters 10 and 11 at <http://www.bls.gov/opub/hom/home.htm>.

**Unions**—As defined here, unions include traditional labor unions and employee associations similar to labor unions. Data on union membership status provided by BLS are for employed wage and salary workers and relate to their principal job. Earnings by union membership status are usual weekly earnings of full-time wage and salary workers. The information is collected through the Current Population Survey.

**Work stoppages**—Work stoppages include all strikes and lockouts known to BLS that last for at least 1 full day or shift and involve 1,000 or more workers. All stoppages, whether or not authorized by a union, legal or illegal, are counted. Excluded are work

slowdowns and instances where employees report to work late or leave early to attend mass meetings or mass rallies.

**Seasonal adjustment**—Many economic statistics reflect a regularly recurring seasonal movement that can be estimated on the basis of past experience. By eliminating that part of the change which can be ascribed to usual seasonal variation (e.g., climate or school openings and closings), it is possible to observe the cyclical and other nonseasonal movements in the series. However, in evaluating deviations from the seasonal pattern—that is, changes in a seasonally adjusted series—it is important to note that seasonal adjustment is merely an approximation based on past experience. Seasonally adjusted estimates have a broader margin of possible error than the original data on which they are based, since they are subject not only to sampling and other errors, but also are affected by the uncertainties of the adjustment process itself. Consistent with BLS practices, annual estimates will be published only for not seasonally-adjusted data.

**Statistical reliability**—For discussion of statistical collection, estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau and BLS data, see Appendix III.

**Table 584. Civilian Population—Employment Status: 1970 to 2009**

[In thousands (137,085 represents 137,085,000), except as indicated. Annual averages of monthly figures. Civilian noninstitutionalized population 16 years old and over. Based on Current Population Survey; see text, Section 1 and Appendix III]

Year	Civilian noninstitutional population	Civilian labor force					Unemployed		Not in labor force	
		Total	Percent of population	Employed	Employment/population ratio <sup>1</sup>		Number	Percent of labor force	Number	Percent of population
1970	137,085	82,771	60.4	78,678	57.4		4,093	4.9	54,315	39.6

NA Not available. <sup>1</sup> Civilian labor force as a percent of the civilian noninstitutional population. <sup>2</sup> See footnote 2, Table 584.

<sup>3</sup> Includes other races, not shown separately. <sup>4</sup> The 2003 Current Population Survey (CPS) allowed respondents to choose more than one race. Beginning 2003, data represent persons who selected this race group only and exclude persons reporting more than one race. Prior to 2003 the CPS only allowed respondents to report one race group. See also comments on race in the text for Section 1. <sup>5</sup> Prior to 2005, includes Pacific Islanders. <sup>6</sup> Persons of Hispanic or Latino origin may be any race.

**Table 587. Foreign-Born and Native-Born Populations—Employment Status by Selected Characteristics: 2009**

[235,801 represents 235,801,000. For civilian noninstitutional population 16 years old and over, except as indicated. The foreign born are persons who reside in the United States but who were born outside the country or one of its outlying areas to parents who were not U.S. citizens. The foreign born include legally admitted immigrants, refugees, temporary residents such as students and temporary workers and undocumented immigrants. Annual averages of monthly figures. Based on Current Population Survey; see text, Section 1 and Appendix III]

**Table 606. Type of Work Flexibility Provided to Employees: 2008**

[In percent. The National Study of Employers does not ask employers to report on whether they have "written policies," but rather whether their organization "allows employees to" ... or "provides the following benefits or programs ...". The wording is used for two reasons. First, employers may have written policies, but not "allow" employees to use them. Second, smaller employers are less likely to have written policies than larger ones. For methodology, see source]

Type of work flexibility provided (to employee)	Employer allows all or most employees	Employer size	
		50 to 99 employees	1,000 or more employees
FLEX TIME AND PLACE			
Periodically change starting and quitting times within some range of hours . . . .	37	40	37
Change starting and quitting times on a daily basis . . . . .	10	11	
Compress workweek by working longer hours on fewer days for at least part of the year . . . . .	8	10	5
Work some regular paid hours at home occasionally . . . . .	3	3	2
Work some regular paid hours at home on regular basis . . . . .	1	1	1
CHOICES IN MANAGING TIME			
Have control over when to take breaks . . . . .	55	54	51
Have choices about and control over which shifts to work . . . . .	16	16	16
Have control over paid and unpaid overtime hours . . . . .	13	14	15
REDUCED TIME			
Move from full time to part time and back again while remaining in same position or level . . . . .	13	12	12
Share jobs . . . . .	8	9	5
Work part year (work reduced time on annual basis) . . . . .	11	10	11
CAREGIVING LEAVE			
Return to work gradually after childbirth or adoption. . . . .	57	56	54
TIME OFF			
Family or personal time off without loss of pay . . . . .	45	46	47
Compensatory time off program . . . . .	18	21	9
Do volunteer work during regular work hours . . . . .	21	24	20
FLEX CAREERS			
Phase into retirement by working reduced hours overtime prior to full retirement . . . . .	25	25	20
Take sabbaticals (paid or unpaid for six months or more) . . . . .	21	24	14
Take paid or unpaid time off for education or job training skills . . . . .	40	41	33
Take extended career breaks for caregiving or other personal or family reasons . . . . .	47	48	44
Receive special consideration when returning to the organization after an extended career break. . . . .	28	29	21
